Bill Gipps, VE7ISV, new BC/YK Regional Director -
Following the March 1, 2009, close of nominations for the British Columbia/Yukon Region Director position, an Election Committee was convened, chaired by RAC Corporate Secretary, Linda Friars, VE9GLF.
The committee met to open and review the sole nomination received for the position, as required by the By-laws.
There being no other nominees, and the nomination documents found to be in order, the committee declared Bill Gipps, VE7ISV, elected as the RAC Director for the BC/YK Region to complete the remainder of a two-year term that began January 1, 2009, effective immediately.
The RAC president, board and executive welcome Mr. Gipps and thank him for volunteering his services.
Past Director Ed Frazer, VE7EF, who did not stand for re-election, had agreed to stay on by special appointment of the Board in an acting role pending the election of a replacement.
RAC extends a heartfelt thank-you to Mr. Frazer for his years of service on the Board and for his dedication and commitment to Radio Amateurs of Canada. [RAC Bulletin]

Scheduled RAC AGM Postponed
March 18, 2009
Due to a change in the bookkeeping system at the Radio Amateurs of Canada headquarters office resulting in unforeseen related complications, the Annual General Meeting of RAC members, scheduled for May 24, 2009, at Sorel-Tracy, Québec, has had to be cancelled. The hamfest organisers were notified directly, prior to release of this bulletin.
Presentation of an audited financial statement at the AGM is an important and long established practice, facilitating face to face discussion and questions from members. Because of the unexpected delay caused by the transfer to a new bookkeeping method, the possibility of an audited statement being ready for the AGM is virtually nil. This conclusion was reached at a recent special meeting of the RAC Board.
It was deemed adviseable to make this decision now, to give sufficient notice to the Québec Provincial Hamfest organisers rather than waiting to the last minute in the faint hope the AGM might still take place as planned, only for it be cancelled with very little notice. That would have been unfair to the RAC membership and to the hamfest organisers.
RAC has been looking forward to the Quebec venue for the AGM and deeply regrets the need for this decision.
Another venue for the required 2009 AGM is being sought and will be announced as soon as one is known.

The MARCH 2009 Issue #903-C files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? I have
started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections
to me for the Rejected project in GoWin. This Rejected list is also
now in the weekly data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

Hi friends
This weekend your editor will be joining up with two or three other ops at 4U1UN. We will be especially looking for those who have never worked 4U1UN. If you have never worked the United Nations Headquarters station I would like to hear from you as to the best time and band for your area. We are especially looking for openings to Japan, Australia, New Zealand, Pacific and all parts of Asia. Over the next day or two please listen for the 4U1UN beacon on the following frequencies.

14100, 18110, 21150, 24930, 28200.

For those of you who need 4U1UN for an ALL TIME NEW ONE please monitor 4U1UN over the next day or two and report the best time.

4U1UN activity will probably begin around 2100Z on Friday March 20th and continue into midday Sunday. An official announcement with more details will be sent out by Friday.

Storm continues, transceiver fixed (03-20-2009 from AA7JV)

Friday, March 20 0800 UTC, Marion Reef. Extreme WX conditions
continue preventing us from leaving Marion Reef. Winds are
40 kts + (75+ km/h) and waves are 12 to 16 feet (3.5-5m) high outside
the reef. The low pressure system behind this extreme weather is now
forecast to develop into a Tropical Low by Mar 21 and a Tropical
Cyclone by Mar 23. Movement is forecast to be to the north and north-east
(away from us and from Mellish), but the forecast is tentative at this stage.
We will keep a close eye on this system as it poses a serious danger to us.
While waiting at Marion Reef we have been testing our equipment (and
making a number of MM QSO-s). We have found that the K3 got damaged
in transport. With great on-line support from Wayne (N6KR) of Elecraft, we
were able to fix the radio. Now it is only weather...

20/03/2009 1:35 UTC - Information from Alexey UA4HOX?
The guys are getting ready for operation as JT1R in the Russian DX contest. ?
So far they have prepared one and a half working positions. The MonstIR is repaired,
two beverage antennas are stretched, the 80m dipole is hanged. Today they are
going to adjust the vertical TITANEX. RK3AD is focused on the power amplfier.
There are no many QSOs in the log so far. Please call us in the contest. After the contest
the team is going to be active on all the bands. The return flight tickets? are already
bought for March 26, so there will be enough time for working on the bands, please
do not worry.

Hi folks,
??? My DX activity is down, but my email Spam has really
increased lately.? I look at the headers and it seems that I
am sending myself all the spam..:)
??? I am going to have to do some re-working of my spam
filters on my computer and I would like to ask for your help.
To make sure any email message you send to me makes
my IN BOX, please put one of the following words in the
Subject line: GOLIST, WTDXA, RAC, DX TELNET,
WIN EQF, QSL INFO.
All other mail will go to my Trash box. I will look at those headers
and try to pick up messages that got filtered.
I get hundreds of emails daily and I have to have some way to
sort them and then delete the spam in batch form.
??? Thank you for your help with this.

Gerry,
Not sure about Africa specific, but his qsls are still coming
out. He fills them out by hand, so it takes him longer to get
the back log worked out.

Saturday, March 21 0000 UTC, Marion Reef. It appears the Tropical Low
has dissipated. If this is correct, a serious danger to us has been removed.
Winds, however, are still near gale force and are forecast to remain strong
at least until Tuesday. This means that we will not be able to leave for Mellish
until Wednesday, the earliest. The soonest we are likely to be on the air from
Mellish is Friday, Mar 27. In any case, we will be able to extend the operation
to make up for any lost time. While we continue waiting at Marion Reef for the
weather to break, we are operating as HA7RY/MM and AA7JV/MM using a
short vertical and 100W.

8332. SPECIAL BULLETIN FROM QRZ-DX

From: K1XN
Topic: 8332 Message: 8332

Hello DXers:

I've received a few items that will be of interest to many of you this weekend, thus this extra bulletin.

4U1UN – UN HQ
Although there has been some activity from the UN Hq station, the demand is still high. This weekend Mohamed, KA2RTD; Johnny, LA2IIA/NQ2G; George, N2GA; Tony, N2UN and Bernie, W3UR will be on the air, with two stations simultaneously. They have been spotted this morning on 40 & 30 CW and 20 RTTY. There is no mention of how long they will be able to operate. The announcement does give times for areas "most needed" --- for JA, 20 meters, 2130-2300Z; for VK/ZL/Pacific, 40 meters, 0900-1100Z and for VK6, 20 meters, 0000Z and 40 meters via long path 2230-2330Z.
Outside of the above, they will focus on 160 and 80; 6 & 60 and RTTY.
Remember QSL route is via HB9BOU.

VK9GMW – MELLIS REEF
On Wednesday, the following message came from the team:
"VK9GMW will operate from Mellish Reef between about March 22 and April 6, 2009.
This will be another low-key, simple DXpedition by AA7JV and HA7RY. It will be the two guys operating; and doing everything else. They will have a strong low-band focus, although they intend to operate on all HF bands. Weather will be a critical factor, therefore please check the www.vk9gmw.com (http://www.vk9gmw.com) web-site for updates on the actual operating dates which are likely to change due to weather. Currently (18 March), the team is waiting at Marion Reef for the weather to turn better before they can cross to Mellish."

Indeed, the weather did become a major factor as the following reports this morning:

"VK9GMW operation suffers delay - Saturday, March 21 0000 UTC, Marion Reef.
It appears the Tropical Low has dissipated. If this is correct, a serious danger to us has been removed. Winds, however, are still near gale force and are forecast to remain strong at least until Tuesday.
This means that we will not be able to leave for Mellish until Wednesday, the earliest. The soonest we are likely to be on the air from Mellish is Friday, Mar 27. In any case, we will be able to extend the operation to make up for any lost time. While we continue waiting at Marion Reef for the weather to break, we are operating as HA7RY/MM and AA7JV/MM using a short vertical and 100W.
Please follow updates at www.VK9GMW.com" (http://www.VK9GMW.com%E2%80%9D)

Hope these "hot" news items are helpful to you this weekend.

Dear All:
This is indeed a very sad occasion for SARTS to have lost one of our very established and dedicated founding members.
I have known David for many years with an especial tie due to our links to 9V1 and VK3.
My happy memories especially was with him and our Spanish and Portuguese friends who visited only just over a year ago
on their way to Christmas Island DX expedition.
I am copying this message to our friends from afar and leave it to them to inform others and make the appropriate obituaries.
On my return to Singapore two years ago, David has said how he had like my quote below:

MELLISH REEF News:

Storm continues, transceiver fixed (03-20-2009 from AA7JV)

Friday, March 20 0800 UTC, Marion Reef. Extreme WX conditions continue
preventing us from leaving Marion Reef. Winds are 40 kts + (75+ km/h) and
waves are 12 to 16 feet (3.5-5m) high outside the reef. The low pressure
system behind this extreme weather is now forecast to develop into a
Tropical Low by Mar 21 and a Tropical Cyclone by Mar 23. Movement is
forecast to be to the north and north-east (away from us and from Mellish),
but the forecast is tentative at this stage. We will keep a close eye on
this system as it poses a serious danger to us. While waiting at Marion Reef
we have been testing our equipment (and making a number of MM QSO-s). We
have found that the K3 got damaged in transport. With great on-line support
from Wayne (N6KR) of Elecraft, we were able to fix the radio. Now it is only
weather...

IARU:

In the IARU Calendar, No 188 dated March 11, 2009, IARU Secretary David Sumner, K1ZZ, reported that the Union des Radioamateurs du Congo (URAC) in the Republic of the Congo has applied to become an IARU Member-Society (IARU Proposal No 245) <http://www.iaru.org/cal188.html>.

Sumner said that the Republic of the Congo (whose capital is Brazzaville) is not to be confused with the Democratic Republic of the

Congo (whose capital is Kinshasa); that country's amateurs are already represented in the IARU by the Association des Radio Amateurs du Congo (ARAC). The Republic of the Congo was formerly a part of French Equatorial Africa and became independent in 1960. Its ITU-allocated call sign prefix is TN.

URAC was formed in Brazzaville on October 8, 2008. Its officers are President Mao Monguimet, TN5MM; Secretary General Ulysse Yinda, and Treasurer Chynauldat Bangue. The URAC lists 15 members on its roster, including three licensed radio amateurs.

Bonjour à tous

9V1RH, SK

Cher tous:
C'est un très triste évènement pour la SARTS que la perte de l'un de ses plus éminents fondateurs, en la personne de David Rankin, 9V1RH.
Je connaissais David depuis de nombreuses années grâce aux liens établis entre 9V1 et VK3.
Un de mes meilleurs souvenirs sera notre rencontre entre lui et moi avec nos amis Espagnols et Portugais, il y a environ un an, en escale à Singapour, au cours de leur expédition à Christmas.
Merci de faire suivre à la communauté amateur.
Best Wishes,
TUCK 9V1TC/VK3CCA/M0TCC

Mar 23, 0000 UTC, Marion Reef. A fresh low has developed just
north of Mellish Reef and according to forecasts it is predicted to
move towards Mellish. Winds of 30 to 40 knots are indicated for
the area. The low is forecast to instensify with the possibility of
turning into a cyclone (hurricane). Under these circumstances we

A station signing EP2IA has been QRV this week on 40 mtrs CW,
asking for QSL via qrz.com. This was my call in the 1970's but I know
nothing about the current operation. If the call-sign had been
re-issued I would expect him to give a valid QSL route. But qrz.com
points at G3SXW so I must conclude that this is a pirate operation.

?

Please help me to spread the word: PIRATE! I will receive many
QSLs that will be returned to sender (extra work for me) and very
disappointing for many DXers who think that they have worked
a new country. There are some very selfish people in this world.

Hi friends
From Bill/NG3K – DX
From: David Hutchinson <william.hutchinson6@...>
Reply-To: Buddipole@yahoogroups.com

I am organising a DXpedition to Swaziland during the first fortnight in August 2009. This DXpedition was as the result of a request for an amateur radio station at an International scout camp which will run from 31st July until 11th August 2009. The scout camp is near to Manzini. I have operated from Hawane Resort (near Mbabane) as 3DA0DJ on two previous occasions ? in March 2007 (CQWPX SSB) and in October 2008 (CQWW SSB).

Hawane Resort is located in the mountains of Western Swaziland at over 4,000ft asl. It has been used for DXpeditions on quite a few occasions and is serviced by Daniel Hubbard ZS6JR of African DX Safaris. There are permanent antennas on site including a 60ft lattice steel tower with HF beams for 20/15/10m and the WARC bands. There is a Four Square array of 40m dipoles suspended from the tower. Daniel usually erects a vertical for 80/160m in addition to these antennas.

It would be our intention to stay at and operate from Hawane Resort and in addition provide operators for the scout camp on a daily basis. The camp site will use the callsign 3DA0SS but each team member will have their own 3DA0 callsign. The camp site is about an hour's drive away. Unfortunately the campsite is not as well situated for takeoff to Europe and USA as Hawane Resort. The campsite is on a southerly facing hillside. We would like to provide as many modes and as many bands as possible on this DXpedition. The March 2007 operation included an EME station which was very successful and made contacts in 100 different countries.

Team members are GI4FUM David, G4LDL Tony, M0MVV Gerry, NC4MM Michael, UT5EL Yuri

During our stay at Hawane there is another DXpedition to Lesotho also serviced by African DX Safaris and team members from that DXpedition may join us during our time there. John 9M6XRO will be transferring to Hawane during the 2nd week of our stay.

Hi friends
De Bill/NG3K – DX
Origine : David Hutchinson <william.hutchinson6@...>
Répondre le cas échéant à : Buddipole@yahoogroups.com

J’organise une expédition au Swaziland dans la première quinzaine d’août.
Cette expédition sera le résultat d’une invitation de radioamateurs à
participer à un camp scout qui se tiendra du 31 juillet au 11 août.
Le camp se tiendra près de Manzini.
J’ai déjà été actif à deux reprises depuis le Hawane Resort (près de
Mbabane) - 3DA0DJ – en Mars 2007 et octobre 2008 pour les CQWPX et CQWW SSB.

Le Hawane Resort est situé dans les montagnes de l'Ouest Swaziland à environ 1350m d'altitude . A plusieurs reprises des expéditions s'y sont installées, et ils travaillent avec l Daniel Hubbard ZS6JR des African DX Safaris. Il y a des antennes à demeure y compris une tour de 20m vec des beams HF pour 20/15/10m et bandes WARC.
Pour40m il y a une 4 verticales en phase.
A la demande Daniel installe sans aucun problèmes une verticale pour 80/160m en plus de ces antennes permanentes.

Notre intention est d'être actifs depuis Hawane Resort et en plus de fournir des opérateurs pour le camp scout, chaque jour.
L'indicatif sera : 3DA0SS , mais chaque membre aura également son propre indicatif 3DA0 .
Le camp est à une heure de via mais malheureusement bien moins situé pour les directions Europe/USA. Le camp se trouve sur un versant de colline .
Nous essaierons d'être actifs avec le maximum de bandes et de modes, qui nous seront permis par les conditions de propagation durant cette quinzaine.
La dernière expédition de 2007 avait même permis des contacts EME avec succès dans plus de 100 pays.
Equipe : GI4FUM David, G4LDL Tony, M0MVV Gerry, NC4MM Michael, UT5EL Yuri

Pendant que nous serons au Swaziland, une seconde expédition se tiendra au Lesotho, organisée par les African DX Safaris. Les membres de l'équipe avec John 9M6XRO nous rejoindront la deuxième semaine de notre séjour.

Mar 24, 0000 UTC, Marion Reef. There is a new tropical cyclone (hurricane)!
TC Jasper is now located 200 km east of Mellish Reef. Fortunately, it is
forecast to move in a south-easterly direction, away from Mellish Reef and
us. On Marion Reef currently the winds are 25 to 30 kts from the south-east.
Seas are 3 to 4 meters, too big for a safe crossing, even if there was no
cyclone. Early forecasts indicate possible easing of winds Thursday morning
(Mar 26). If winds indeed drop to at least 20 kts, and TC Jasper continues to
move away from us, we will attempt the crossing to Mellish on Thursday.
If not, we will continue waiting at Marion. We have sufficient supplies and fuel
to wait here another week and still be able to mount a ten day operation on
Mellish. The only thing we are running short of at this time is patience.

?Update on my 2009 YK trip

?I will be arriving Damascus on 3/29 evening and should be
QRV as YK1BA again from 3/30 till 4/10, returning home to
Texas on 4/11.? As usual, my operating hours will be spotty,
but I'll try to put in as much radio time as possible.? Most probably,
my operating hours will be between 20:00 - 23:00 UTC
or between 02:00 - 05:00 UTC and possibly some occasional
activities between 12:00 -14:00 UTC.? I suspect that 30, 40,
and 80 Meter will be the bands of choice, and
I will be active on SSB, CW, and TTY.

QSL via N5FF (QRZ for details)

Please share with the DX community.

Mar 25, 0600 UTC, Marion Reef. We are still on Marion Reef. This morning, when trying to free the anchor from the coral in preparation for our departure, the entire bow pulpit broke off. We have made some temporary repairs, so we are back in business, but still on Marion. We intend to leave tomorrow for Mellish. Cyclone Jasper is gone (we hope permanently) and the weather is forecast to improve.

NI5DX, Buzz, and his brother, WD5IQR, Al, will be operating
from NA-143 (Galveston Island) on Monday, March 30.? If conditions
warrant, the pair will return to Galveston Island on Tuesday morning
for another day of operation.? As the Galveston Island State Park is
still closed due to damage from Hurricane Ike this past September,
the brothers will use generator power.? They will run barefoot into
a ZeroFive 43 foot vertical.? Monday's operation is planned to be
mainly SSB, with the possibility of some CW and digital modes.

Mar 25, 2200 UTC, Marion Reef. We have departed for Mellish Reef.
WX conditions are marginal, but this is our best WX window yet and
we must use it. If things go according to plan, we should arrive at
Mellish on Friday, Mar 27 around 0600 UTC.

We will be on the air starting March 25th with 3 active stations.

?One station each for CW, SSB, and digital modes.? Antennas will be

T-8 Log-periodics thanks to Tennedyne, and they will be up at about 50 feet plus.

There will also be a 40 meter 4 square and possible 80 meter 4 square.

Of course the 72 foot vertical will be up for 160/80/30 meters.

We will be using one Tokyo Hy-Power amp, and two IC-2KL amps.?

We will participate in the CQWW WPX Phone contest,

so be sure to look for us!

?

We will be on all bands from 160- 10m this trip.

The APRIL 2009 Issue #904 files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? I have
started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections
to me for the Rejected project in GoWin. This Rejected list is also
now in the weekly data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

I.C.P.O. Bulletin (March 26 - April 03, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

26/03/2009: Max, M0GHQ (FISTS #13247) will be visiting the Philippines between late March and late April. He expects to operate from the islands of Cebu (OC-129, WLOTA 1901), Samal (OC-235, 29-31 March) and Mindanao (OC-130, WLOTA 2803), and to attend the Philippine Amateur Radio Association's 77th annual hamvention, to be held April 17-19th on Leyte Island (OC-129, WLOTA 1103). He plans to be active on 160-10 meters (plus possibly 6 meters) SSB, PSK31 and RTTY with 100 watts and wire antennas. QSL via home call, direct or Bureau. [425 DX News]

26/03/2009: Operators Lance/W7GJ (E51SIX) and Bob/ZL1RS (E51EME) will be in Rarotonga (OC-013, WW Loc. BG08dr16vv) to activate E51 on EME on 6 meters (Lance) and 2 meters (Bob). They expect that the earliest possible activity would be on their moonrise on Thursday March 26, and the last 6m activity will probably be their moonrise window on Saturday April 4 GMT. 50 MHz operation will take place on 50.190 MHz. Details of Bob's callsign and activity were not provided. Plans are to use a newly designed M2 8 element 6M8GJ yagi with a 43' long boom, fed with 75' of Times Microwave LMR600 coaxial cable, for a feedline loss of .4 dB. The receiver will be a K3 with the PR6 preamp. Please QSL direct to W7GJ with self addressed envelope with stamp (from USA) or USD$ 1.00 (from foreign) for postage to E51SIX/W7GJ, Lance Collister, P.O. Box 73, Frenchtown, MT 59834-9973 USA. Further information can be found at: www.bigskyspaces.com/w7gj/E51SIX.htm [OPDX Bulletin]

26/03/2009: Members of the Strumblehead DX and Contest Group will be on the air from their headquarters at the Farm in Wales for a period before, during and after the CQ WPX SSB Contest (March 28-29th). They will be using the club calls MC0SHL before and after the contest with some activity on 30 meter RTTY around 10148 kHz. During the contest they will be using both MW9W and MC0SHL - depending on the number of operators, there may be more callsigns on air. Please QSL via the club's manager M0URX. All details and photographs will be on the clubs website (www.mc0shl.com/) and they may even have a live webcam for the contest too. [Pete's-DX-Newsdesk]

27/03/2009: Operators Tang/BM2AAV, Wu/BM2APH, James/BU2AT, Eddie/BV2DD, Bruce/BV2KI, Lee/BV2NT and Chung/BX4AF will be active from P'enghu Island (AS-103) as BP0A from March 27-30th. Expect activity on all bands and modes. QSL via BV2KI, direct or Bureau. [rsgbiota.org]

27/03/2009: VK9GMW will be operating from Mellish Reef (VK9M, OC-072) between March 27nd and April 6th(?). This will be another low-key, simple DXpedition by George/AA7JV and Tomi/HA7RY. Please note that the dates are approximate and may change due to weather. The operation will have a strong low-band focus, although VK9GMW will operate on all HF bands, 160-10m. Equipment will be K3 and ICOM IC-746 PRO and two SGC SG-500 solid state amplifiers. QSL via HA7RY (Tamas Pekarik, Alagi ut 15., H-2151 Fot, Hungary). Logs will be uploaded to LoTW. Further information at: www.vk9gmw.com/ [VK4FW]

27/03/2009: Dennis F5VHY (G3MXJ) and Nigel G3TXF plan to operate as YJ0MXJ and YJ0TXF from the Aore Island Resort off Espiritu Santo (OC-035), in Vanuatu, for six days from 1000z Friday 27 March to 1500z Wednesday 01 April. This will be a CW only operation. Given the current paucity of sun-spots the main bands are expected to be 40m, 30m, 20m and 17m. They will try 80m if local conditions permit. Short operations are also planned from New Caledonia [Grand Terre] (OC-032, DIFO FK-001, WLOTA 1280) on the way out to Vanuatu, using the callsigns FK/G3MXJ and FK/G3TXF; and from Norfolk Island (OC-005, WLOTA 1469) on the way back, using the callsigns G3MXJ/VK9N and G3TXF/VK9N. QSL YJ0MXJ, FK/G3MXJ and G3MXJ/VK9N via F5VHY. QSL YJ0TXF, FK/G3TXF and G3TXF/VK9N via G3TXF. All logs will be up-loaded to LoTW when they return home. [G3TXF]

30/03/2009: Buzz/NI5DX and his brother Al/WD5IQR will be operating from Galveston Island (NA-143, USi TX-001S, Galveston county), Texas, on Monday, March 30th. If conditions warrant, the pair will return to Galveston Island on Tuesday morning for another day of operation. As the Galveston Island State Park is still closed due to damage from Hurricane Ike this past September, the brothers will use generator power. They will run barefoot into a ZeroFive 43 foot vertical. Monday's operation is planned to be mainly SSB, with the possibility of some CW and digital modes. [K1XN]

30/03/2009: Saad, N5FF will be arriving Damascus, Syria, March 29th evening and should be QRV as YK1BA again from March 30th to April 10th, returning home to Texas on April 11th. As

usual, his operating hours will be spotty, but he will try to put in as much radio time as possible. Most probably, operating hours will be between 2000 - 2300 UTC or between 0200 - 0500 UTC and possibly some occasional activity between 1200 - 1400 UTC. Focus will be on 30, 40, and 80 meters using SSB, CW, and RTTY. QSL via N5FF (QRZ.com). [K1XN]

31/03/2009: Bodo, DL3OCH will be active as 5N0OCH from the end of March until July from Nähe Abuja, Nigeria. QRV on all bands (especially 160m) using CW, SSB and also RTTY. QSLs will be answered 100% via Bureau or direct through his home call. Further information at: www.dl3och.de/ [UBA HF News]

31/03/2009: It was announced, at the Maui Ham Club, that the extremely rare Kalawao County will be on 40m and 20m on March 30th and 31st. MARC member, Jayson Kohama, WH6BXK, will be working there on those days. After he gets off work each day, he plans to be on HF making as many contacts as possible. His station, WH6BXK, will be on the air each day after 18:00 local (6pm) i.e. 0400z. He will be on 7.188MHz and 14.335MHz SSB. Kalawao County is one of the rarest USA counties. It is the 2nd smallest county and the poorest in the USA. It is just the Kalaupapa peninsula on the island of Molokai (OC-019, USi HI-015S, WLOTA 1045). It is the old Hawaiian leper colony. Because it was a leper colony, it was totally isolated from the rest of the islands and had its own separate county government, which was administered by the state. Hams must have special permission to go there and operate. Thus it is extremely rare for any ham signals to ever radiate from Kalawao. QSL via WH6BXK (QRZ.com). [VK4FW]

31/03/2009: Simon, M0VKY will be active from Lanzarote Island (AF-004, DIE S-007, WLOTA 0099) as EA8/homecall between March 31st and April 5th. Working conditions will be FT857D 1/2 wave dipole for 20m, 1/2 wave dipole for 40 and 15 meters. QSL via home call, direct or Bureau. [rsgbiota.org]

31/03/2009: Cezar, VE3LYC will be active as VY0A from Fox Island (NA-186) between March 31st and April 3rd. QRV on SSB and CW with 100 watts and a multi-band vertical antenna, with focus on 20, 30 and 40 meters. This IOTA group was activated only once and very briefly sixteen years ago. The costs associated with this operation are considerable and both group and individual donors are being sought. QSL via VE3LYC. [425 DX News]

01/04/2009: Piotr/SP2JMR and Slavo/SP2JMB will be active as 3B9/homecalls from the Rodrigues Islands (AF-017) April 1-8th, and as 3B8/homecalls from Mauritius Island (AF-049, WLOTA 0595) April 9-17th. They plan to operate SSB and CW on all bands. QSL via home calls. [425 DX News]

01/04/2009: Operators Eltje/PA3CEE, Rene/PE1L and Ronald/PA3EWP will be here and active between April 1-12th. Eltje and Rene are expected to be active as 5Z4EME on 2 meters and 70 cm EME (no 6 meters allowed in Kenya). Grid locator is KI79MO. For 2 meters they will be using two 10 element yagis, a 400 watt amp and a preamp (there will be a smaller setup for 70cm). Suggested frequencies for transmitting and receiving will be on 144.124 MHz, and on 144.084 MHz for Japan. Ronald will be active on HF with the call 5Z4/PA3EWP using a Elecraft K2 with a homemade amplifier and vertical antennas for 40-10 meters. QSL 5Z4EME via Eltje, PA3CEE. QSL 5Z4/PA3EWP via Dennis, PA7FM. Complete details at: www.emelogger.com/kenya [OPDX Bulletin]

01/04/2009: Jan, PA4JJ will be operating holiday-style as PJ2/PA4JJ from the island of Curacao (SA-006, also count for WLOTA 0942) from April 1-11th. Jan reports that he will try to be active on as many bands as he can, except 160m. He will be on all modes but mostly digital. His equipment is a FT-897 and a a ZS6BKW antenna (which he states can be tuned on

6m, and he will be using WSJT (JT6M) on 6m). QSL via home call, direct only. A logsearch will be available at www.pa4jj.nl/ [NG3K]

02/04/2009: Richard, G3RWL will be active as 8P6DR from Barbados (NA-021, WLOTA 0999) from April 2-24th. He will operate holiday style on 160-10 meters using CW and digital modes. Better not to expect him on the bands on 8 April, as it will be his wedding day! QSL via home call, direct or Bureau (e-mail requests for bureau cards can be sent to (g3rwl at amsat.org). [425 DX News]

02/04/2009: John/VE8EV, Wally/VE8DW and Gerry/VE8GER will be active from Ellice Island (NA-192), April 2-5th, using the callsign VX8X. QRV 40, 20, and 15 meter SSB/CW; 24 hours per day non-stop operation. Expect to see them on CW, but most of the focus will be on 20 meter SSB on 14.260 MHz. QSL via the information at QRZ.com under VX8X. [rsgbiota.org]

03/04/2009: Frank, DL4KQ plans on being active from Grandi Island (AS-177 New One!), off the coast of Vasco da Gama, Goa, between April 3rd and 8th. QRV mainly on the usual island and IOTA frequencies. More info forthcoming [PlanetHam.org]

03/04/2009: Toshiyuki, JP1PZE will be active April 3-7th as K7XF/KH0 from Saipan (OC-086). He plans to be QRV on 80-10 meters using CW, SSB and RTTY. QSL via JP1PZE, direct or Bureau. [425 DX News]

Be sure to check Bill's (NG3K) website for updated CQWW WPX SSB Contest activity at: www.ng3k.com/misc/wpxs2009.html .. Good luck to all participants & have fun!!!

04/04/2009: Wade, KU4OJ will activate Savage Island (Not IOTA, USi GA-038, Bryan county) inside Fort McAllister State Park, near Savannah, Georgia. QRV mornings and evenings (or whenever he can get the best ropagation!) on or near 14.260 and 7.225 MHz. QSL direct to home call w/SASE. DX can QSL via home ll either direct or by the Bureau. [USi]

05/04/2009: The Amateur Radio Club UBA-LGE Liège (ON5VL) will activate the Castle of Wegimont (LG-075) as ON5VL/p on April 5th (0700-1200 UTC), 40 meters only. QSL via the Bureau to ON5VL, or direct to ON5PO. [ON5VL]

21/04/2009: JH1AWN (JT1AWN), JA7AGO (JT1AGO) JA7LU (JT1LU) and JA7ZP (JT1ZP) will be active from Mongolia between April 21st and 28th. QRV 80-6m, possibly 160m, using CW, SSB, RTTY and PSK31. QSL via home calls, direct or Bureau. [dx-hamspirit]

10/05/2009: Look for special event station W1AW/8 to be on the air during the Dayton HamVention (May 15-17th). They are currently looking for volunteers to operate the station for 4 hour shifts. Volunteers will receive an on-grounds parking pass, an admission ticket and a hat. Sign up in advance is STRONGLY recommended -- first come first served on requested shifts. This WILL fill up quickly. Contact via E-mail Jerry Bodey, N8OWV at: jerrybodey@... [OPDX Bulletin]

24/06/2009: Jimmy, W6JKV will be operating as V29JKV from the island of Antigua (NA-100, WLOTA 1118) between June 24th to July 3rd. QRV HF, but focus will be on 6 meters (Grid FK97). He has a very good location and will have large antenna (possibly a 10 element M2) and power (3X3CX800 amplifier). QSL will be via his home QTH in Austin, Texas. [MMMonVHF/N8OFS]

25/06/2009: Special event station VY1/K7Y will be active June 25th to July 4th on 20, 40 and 80 meters from Kluane Lake in the Yukon. Emphasis will be for Field Day from Jacquot Island ("new one" for CIsA, WW Loc. CP01OH). Primary frequencies 14.260 and 7.260 MHz (+/- QRM); also 3.960 MHz. This will be a joint venture of clubs KL7RST, VY1RST and VE8RST to promote Amateur Radio in the north. QSL KL7JR direct w/SASE for full-color QSL. [CIsA]

24/07/2009: Dennis, M0LSB will be active as MM0LSB/p from Great Bernera (EU-010, IOSA OH12, SCOTIA HI27) from July 24-27th, including an entry in the RSGB IOTA Contest (July 25-26th). QSL via home call, direct or Bureau. [rsgbiota.org]

25/07/2009: Brani, OM2FY will be QRV as TK/OM2FY from Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) for the RSGB IOTA Contest (July 25-26th) as a IOTA DXpedition/Single-Op Unassisted/CW/24hr/Low-Power enty. QSL via home call, direct or bureau. [rsgbiota.org]

31/07/2009: David GI4FUM is organising a DXpedition to Swaziland as the result of a request for an amateur radio station at an International scout camp which will run from July 31st until August 11th. The scout camp is near to Manzini. It would be their intention to stay at and operate from Hawane Resort and in addition provide operators for the scout camp on a daily basis. The camp site will use the callsign 3DA0SS but each team member will have their own 3DA0 callsign. The camp site is about an hour's drive away. Team members are David/GI4FUM, Tony/G4LDL, Gerry/M0MVV, Michael/NC4MM and Yuri/UT5EL. During the stay at Hawane there is another DXpedition to Lesotho and team members from that DXpedition might join them. John, 9M6XRO will be transferring to Hawane during the 2nd week of their stay. Further information to follow ... stay tuned! [GI4FUM]

QSL INFO -

A station signing EP2IA has been QRV this week on 40 mtrs CW, asking for QSL via qrz.com. This was my call in the 1970's but I know nothing about the current operation. If the call-sign had been re-issued I would expect him to give a valid QSL route. But qrz.com points at G3SXW so I must conclude that this is a pirate operation.
Please help me to spread the word: PIRATE! I will receive many QSLs that will be returned to sender (extra work for me) and very disappointing for many DXers who think that they have worked a new country. There are some very selfish people in this world.
Greetings - 73 de Roger/G3SXW.

QSLs received Bureau - 1A4A, 3B8/SP2JMB, 4K9W, 4O7A, 4O/DD5FZ, 5T5DC, 8Q7QR, 9M4DXX, A25KDJ, A45WD, A52AM, CT3/DF1LON, D4C, EH6FB, FG/F5OIU, FS/DL5CF, MJ0LON, OJ0/OG3A, PJ2HQ, TF3YH, UN9PQ, YB0EIN, Z360M and ZD7X.

I've combined my love of railroads and railroad history with ham radio and created an organization called "Railroad Depots on the Air." The purpose is to activate railroad depots and sites where railroad depots once were, similar to how lighthouses are activated for WLOTA. If you're interested, please visit:

Dear Castle Friends,

As many of you know, MSN has ceased the Groups Services. The old DCS-SSD pages on the MSN Groups have lastly ceased to exist, we already moved time ago to a new private server in HB9 , kindly offered to us by HB9DRV , and left a redirection page on MSN groups. Now that

page does not exist anymore.
Some of you have on your weeb pages an OLD link to our Castles Award DCS-SSD , so we urge you to correct those links as follow:
http://groups.msn.com/DCS-DCTI-DCIN (OLD)
has to be substituted with this one:
http://castles.ham-radio.ch/
that comprises and regards all our awards DCS, DCTI, DCIN, DCS-WE, and other specials, and the pages for the Swiss Abbeys Awards DAS DATI DAIN (Works in progress) .
I thank you very much and hope to meet you soon on the air.

Special Event Station celebrates 100 years of Naval Aviation -

On 7th May 1909 the Admiralty began a process that was to lead to the formation of the Fleet Air Arm.

As 2009 is the Centenary Year of Naval Aviation, there are a number of events and publications throughout the year to celebrate and commemorate this event.

The Royal Naval Amateur Radio Society is to operate a special event station during May 2009. The station will have the call sign GB100FAA and will be operated by members of the Society, initially from HMS Collingwood at Fareham and latterly at the Royal Naval Air Station at Yeovilton in Somerset.

The RNARS Chairman Mick Puttick says: "This is a chance for us to assist in publicising this historic occasion. Contacts with the special event stations and with RNARS members will also count towards the awards issued by the Society."

Operation will be on SSB and CW on the usual RNARS frequencies, band conditions permitting, and, +/- QRM:

SSB - 3740, 7055, 14294/14335, 18150, 21360, 28940.

CW - 3520, 7020, 10118, 14052, 18087, 21052, 24897, 28052.

It is expected that a 2 metre FM station will also be operational.

More information about the Society and the awards can be found at: www.rnars.org.uk.

EUCW Societies activities :

EUCW/FISTS QRS WEEK:
The annual EUCW/FISTS QRS Party will happen over five days, Monday-Friday, following the 4th
Sunday in April each year. In 2009 from

Work any station, including members of EUCW clubs
(see below), but send only in QRS. Standard QSO's with
non-participating stations can be included in logs.

DATES/TIMES: From Monday 0000z to Friday 2359z in the week after the 4th Sunday in April.
2009: Monday 27th April 2009, 0001 UTC, to Friday 1st May 2009, 2359 UTC

MODE: CW only.

POWER: Any authorised power.

CALL: CQ QRS. Stations may be worked once per day, per band.

FREQUENCIES: Recommended areas of activity, +/- 10 kHz of the FISTS calling frequencies, including WARC bands (see below), but contacts can be made on any frequency. Non-QRP stations should avoid calling CQ on the popular QRP frequencies (see below).

KEYS/SPEEDS: Use any type of key or keyer. No keyboard sending or pre-programmed messages from computers or keyers, but pre-programmed CQ calls or CQ loops are permitted. Maximum speed 14 words per minute

(70 cpm).. The speed of a QSO should be at the speed of the slower station.

CONTACTS: Normal friendly QSOs, no special requirements. QSOs with any station count. Work any station in any country, including stations not taking part in the QRS Party but try to persuade them to work QRS.

LOGS/FEEDBACK: This is not a contest, but logs and feedback will be welcomed in the following classes:

A - More than 10w input or 5w output power
B - QRP (10w input or 5w output, or less)
C - Shortwave listeners.

Logs should show Date, Time, Callsign, Name, QTH and EUCW Club/Number (if appropriate) of the stations worked/heard, and may include up to three votes for "Most Readable Morse Heard" (one vote per station).

AWARDS:

a) A certificate will be awarded to the three participants working/hearing the most stations in each class.

b) Certificates of Merit will be awarded to the three operators receiving most votes for the "Most Readable Morse Heard", provided the operators nominated have also submitted a log. If the operators receiving the most votes have not submitted a log the certificates of merit will be awarded to the qualifying operators with the next highest number of votes. In the event of a tie in first, second or third places, multiple certificates will be awarded, marked "Shared Award".

SEND LOGS TO:
FISTS/EUCW QRS Party Organiser,
Robert Walker M0BPT, 87A Whitehall Road, West Bromwich, B70 0HG. England.
EMAIL m0bpt(at)yahoo.co.uk

UPDATE -
==========
There was an error in the bulletin posted by Radio Amateurs of Canada.
The callsign of Catherine June (Cathy) Hrischenko should be VE3GJH and
NOT VE3FBL. The bulletin should have read as follows:

RAC Bulletin 2009-010E : Catherine June (Cathy) Hrischenko,
VE3GJH SK - Popular TCA Columnist Becomes Silent Key

March 26, 2009

Radio Amateurs of Canada sadly reports the death of Catherine June
(Cathy) Hrischenko, VE3FBL.

Author of the YL column in The Canadian Amateur (TCA) magazine for over
25 years, Cathy died peacefully at her home on Friday, March 20, 2009,
surrounded by her husband George VE3DGX and her family, after a fight
with cancer.

A funeral service will be held at 3 p.m. Sunday, March 29, at Mount
Albert United Church, 41 Alice Street, Mount Albert, Ontario, L0G 1M0.
Visitation is from 2 p.m. to 3 p.m. at the church.

Heartfelt condolences are extended to Cathy's family and friends by the
RAC Board and Executive.

Hi folks,
??? I just made a large update to the web database and I also
produced a new GODATA file for your computer.? The computer
file is still named GO904.exe.? It contains many qsl routes for
stations that will be on the air this weekend in the contest.
??? If you have already downloaded the GO904 file, you will
want to download this new one today or this weekend.
There are quite a few updates and new records and I thought
you should have it available right away.
??? Good luck with your DX this weekend.

FOR IMMEDIATE RELEASE
March 28, 2009

MULTIMEDIA IN AMATEUR RADIO CONTESTING AT RADIO ARCALA

Amateur Radio contesting is not typically a public friendly activity as an extreme sport. With the access and power of the DX Summit and its large monitoring
population, Radio Arcala is poised to challenge all historical scenarios by bringing live contest monitoring and related attractive live sessions to the public domain.

During this weekend's CQ WPX Contest, the Arcala team is testing several hi-tech functions. The range includes indoor and outdoor webcams, score monitoring and chat rooms. Live contest score review studios are still being tested for internal use by the team. Audio playbacks are similarly under testing. Also, target review and score development monitoring is under review. As selected stations and teams are competing publicly against each other, this will quickly bolster needed public coverage during the race and can push radiosport to new heights.

Since many of these functions will theoretically challenge traditional patterns and rules for live monitoring of radio contesting, many of these features need to be assessed in the context of current rulings. Hence they will be implemented with care and together with contest organizing.

You can now examine some of the technical capabilities of these powerful functions by clicking www.radioarcala.com (http://www.radioarcala.com) and entering the WPX 2009
section.

These include a station OG8X M2 category in motion, a live score sheet as well as outdoor cameras on Radio Arcala's seven towers. An M7 button will give you a camera to look at a 300-plus ft. massive rotating tower and 160M 3-L and 80M 5-L full-size beams.

Your feedback and ideas can also be presented in the chat room publicly or via oh8x@... privately.

VK9GMW QRV with temporary setup (03-29-2009 from AA7JV)

Mar 29, 0000 UTC, Mellish Reef. We spent all of Saturday setting up the station. Unfortunately, our brand new tent was lacking some vital parts (poor quality control in China, I guess) and we've spent a lot of time rigging up a shelter from tarps and drift-wood. (The tarps generate a lot of noise flapping in the 50 km/h breeze! Mechanical QRN.) We ran out of time to get the complete antenna up and were unable to operate on 160. Spent the night on 80 meters, although the partial antenna was not ideal for that band either. Conditions were variable: during the early part of the evening NA was strong but signals ?dropped after 1300 UTC. Conditions to EU were mediocre, with mostly eastern and northern Europe dominating (especially OH). We will complete the antenna (and lots of other chores) today and hope to be on 160 tonight.

VK9GMW up and running (03-29-2009 from AA7JV)

Mar 29, 2200 UTC, Mellish Reef. We are up and running although the antenna still needs radials. So far we have operated without radials, but it appears that we need some at low tide, as the tidal range is almost 2 meters here. Will install radials today. We also will build a 160/80 RX ANT as the TS noise is high. So far we have only operated at nights -- and therefore on the low bands -- as we had to work on the station during the day. From today onwards we will be active on the higher bands. RTTY in a few days time. At this time we are trying to get as many QSO-s as possible, as our presence here is tenuous due to the always present threat of cyclones (hurricanes). 160 m Report: Despite weak signals from NA and EU last night we put a good number of stations into the log (see log-search). JA signals were strong with a dense pile up. Apologies to the JA stations who got squeezed-in between our TX FRQ at 1823.5 and their upper band limit of 1825, but this method allows us to work NA while still working JA during the NA propagation lulls. Given the fact that band from here is open to JA almost all night, while the NA window is narrow, we believe that this is not unfair.

The following was received from Martin G3VOF:

GB6GEO on the air again for the 2nd Global Geoparks Communication Event - 23/24th May 2009

Again this year "GB6GEO" will be on the air during the weekend of 23/24th May 2009 from Kents Cavern Prehistoric Caves in Torquay, Devon, UK as part of the European Geoparks Festival week, along with other Geopark stations operating from England, Scotland, Wales, N.Ireland, Portugal, Malaysia, Australia, Greece, France and other many other participating countries yet to be confirmed.

There will be many other attractions at the Torquay Kents Cavern site, including Cave Radio, Satellite Communications, Amateur TV and paying tribute to a local Devonshire man Oliver Heaviside, a scientist who discovered the Heaviside Layer in radio propagation. There will also be a number of scouting groups doing their communications badges, and a chance to send greetings to other Geoparks around the world. The event at Torquay will be run by the combination of the Torbay Amateur Radio Society and the West Devon Radio Club, in conjunction with Nick Powe, proprietor of Kents Cavern and Chairman of the English Riviera Geopark.

Kents Cavern is famous internationally for its remarkable history of ancient human occupation going back more than 500,000 years. It is an English Protected National Monument, International Prehistoric Show cave and a gateway to UNESCO's English Riviera Global Geopark.

Nick Powe says "The geological heritage and associated rich cultural heritage of this well known seaside resort on the South West coast of England always surprises people who first visit. Famous in the past as a traditional English seaside resort, the area now has a lot more to offer today's visitors. With a growing reputation for good food, hospitality and quality leisure experiences, the UNESCO endorsed English Riviera Global Geopark gives the area a golden opportunity to attract new visitors not just from the UK but also from overseas. This 2nd Global Geopark Communication will again give visitors to Kents Cavern in the English Riviera Geopark an opportunity to feel connected not only to the fantastic geological heritage of this coastal area but to that of some other amazing landscapes around the world."

Visitors over the weekend will be able to exchange greetings and will receive a souvenir certificate recording the station they spoke to.

For amateur radios stations around the world who contact Geopark stations, the English Riviera Geopark will be offering a special commemorative European Geoparks Network radio amateur certificate for contacts with GB6GEO and one other Geopark station, or three Geopark stations excluding GB6GEO.

Certificates will cost UK ?2.20 each, Europe ?3 and Rest of the world USD5. Managing the global certificate scheme is Torquay based Radio Amateur, Martin Foster G3VOF.

1) Radio Amateurs wishing to participate from Global Geoparks should contact Martin Foster (G3VOF) or martin@...

2) Geopark stations so far are GB6GEO, GB2GEO, GB1MAC, EI2GEO, DK0GEO, J48GEO, CT, VK, and 9M2

3) The frequencies that will be used plus or minus the qrm as where possible will be 3.680Mhz, 7080Mhz, 14.180Mhz, 21.180Mhz, 28.480Mhz, 2mtrs, and 6m mtrs will also be used at the operators discretion, but there will be no spot frequencies for these two bands.

4) Certificate Manager/ qsl's to Martin Foster G3VOF QTHR or QRZ.COM. Please also see qrz.com for the latest updates. Only log details necessary.

5) GB6GEO will be a 48hour working station, SSB will be used during the day, because of visitors to the station. CW will be used during the night time hours, CW frequencies will again be at the operators discretion.

I am, John. I previously had Qwest, but they migrated to Verizon and we made the change to Verizon about 2 weeks ago. I know one thing, there is a hill here that is near our house. It is a street called Fillmore and is about a half mile long and quite a hill. With Qwest (and my son has AT&T) there is no coverage at the top of the hill and at the grocery store up there that we go to. So, this weekend Mary called me from the top of Fillmore Hill and we had solid coverage. Also, in the grocery store, what was usually a dead zone, we had solid communications. Plus, I have a lot better phone than I had with the previous provider.

Just and FYI, when you come up to visit me someday, Verizon works really good at my QTH. I have AT&T (old Cellular One) but my college kid has Verizon as she is back east and she has nice coverage here too, phone and text.

Yes to Verizon with both voice and text.

I will say I?really only?have text on my account due to?my kids. I do find it handy at times to receive messages on, Not to hold a conversation. Don't send out much at all...

When I was county hunting a few years?back before I finished that award I used to have "spots I needed" sent to my cell from the county hunting spotting site. So when I was home it was easy to head to the radio for a new one and not sit?their all day waiting for something to happen. The wife liked it better that way.

Mar 31, 0400 UTC, Mellish Reef. We are fully operational now, although work continues to enhance the station. 40 meters was very good this morning towards Europe (and, of course, Japan) but the pile ups were ?dense and unruly, resulting in a lower QSO rate. We have moved to 30 meters, which was open to NA and JA. Fortunately, the JA stations are disciplined which allowed us to work more stations. Low Bands: Last night was miserable on 160: high noise and weak NA and EU signals resulted in a low QSO count. Even the JA stations were weak. At one point we had to QSY to 80, as 160 was almost unusable. This morning we have built a large pennant and hope that it will help with the noise tonight. Also, will move the TX FRQ down to 1822.5 (if free) to allow a larger split for the JA stations. Will listen for NA above 1825.0.

??? I received an email from a user with a minor problem about
8 pm. I then received an email complaint from the same user
complaining that I did not take care of their problem immediately
last night. I did apologize and sent him the reason for the delay.
??? This situation made me think, since I do have somewhat
irregular hours in the office, maybe I should make everyone aware
of how I do work.
??? My day normally starts around 2:30 am in the morning checking
emails and fixing problems that occur overnight. Checking with friends
in Asia and the Middle East and looking at DXpedition web pages for
news. I spend most of the daylight hours in the office working on orders,
fixing problems, sending out confirmation emails and the like. In the
evening I end my day at dinner time (usually around 6 pm). Most of the time
I do not look at the computer until the next morning. There are two days
in the week (Wed and Thurs) that the local hams will put up with me and allow
me to join them at breakfast. This breakfast starts around 7 am and we have
been known to stay for lunch. I seldom pull 24 hr days any more but occasionally
I forget to goto bed.
??? So if you send me an email message during the evening hours and I do not
respond to you quickly, it is because I either forgot to come home from breakfast,
or remembered to stop work and eat dinner.
??? It's a dull life, but it's mine and I have to live it out.
??? Thanks to all of you for putting up with me.

Hi friends
United Kingdom:
The following was received from Martin G3VOF:

GB6GEO on the air again for the 2nd Global Geoparks Communication Event - 23/24th May 2009

Again this year "GB6GEO" will be on the air during the weekend of 23/24th May 2009 from Kents Cavern Prehistoric Caves in Torquay, Devon, UK as part of the European Geoparks Festival week, along with other Geopark stations operating from England, Scotland, Wales, N.Ireland, Portugal, Malaysia, Australia, Greece, France and other many other participating countries yet to be confirmed.

There will be many other attractions at the Torquay Kents Cavern site, including Cave Radio, Satellite Communications, Amateur TV and paying tribute to a local Devonshire man Oliver Heaviside, a scientist who discovered the Heaviside Layer in radio propagation. There will also be a number of scouting groups doing their communications badges, and a chance to send greetings to other Geoparks around the world. The event at Torquay will be run by the combination of the Torbay Amateur Radio Society and the West Devon Radio Club, in conjunction with Nick Powe, proprietor of Kents Cavern and Chairman of the English Riviera Geopark.

Kents Cavern is famous internationally for its remarkable history of ancient human occupation going back more than 500,000 years. It is an English Protected National Monument, International Prehistoric Show cave and a gateway to UNESCO's English Riviera Global Geopark.

Nick Powe says "The geological heritage and associated rich cultural heritage of this well known seaside resort on the South West coast of England always surprises people who first visit. Famous in the past as a traditional English seaside resort, the area now has a lot more to offer today's visitors. With a growing reputation for good food, hospitality and quality leisure experiences, the UNESCO endorsed English Riviera Global Geopark gives the area a golden opportunity to attract new visitors not just from the UK but also from overseas. This 2nd Global Geopark Communication will again give visitors to Kents Cavern in the English Riviera Geopark an opportunity to feel connected not only to the fantastic geological heritage of this coastal area but to that of some other amazing landscapes around the world."

Visitors over the weekend will be able to exchange greetings and will receive a souvenir certificate recording the station they spoke to.

For amateur radios stations around the world who contact Geopark stations, the English Riviera Geopark will be offering a special commemorative

European Geoparks Network radio amateur certificate for contacts with GB6GEO and one other Geopark station, or three Geopark stations excluding GB6GEO. Certificates will cost UK £2.20 each, Europe ?3 and Rest of the world USD5. Managing the global certificate scheme is Torquay based Radio Amateur, Martin Foster G3VOF.

1) Radio Amateurs wishing to participate from Global Geoparks should contact Martin Foster (G3VOF) or _martin@..._ (mail to:martin@riviera.fm)

2) Geopark stations so far are GB6GEO, GB2GEO, GB1MAC, EI2GEO, DK0GEO, J48GEO, CT, VK, and 9M2

3) The frequencies that will be used plus or minus the qrm as where possible will be 3.680Mhz, 7080Mhz, 14.180Mhz, 21.180Mhz, 28.480Mhz, 2mtrs, and 6m mtrs will also be used at the operators discretion, but there will be no spot frequencies for these two bands.

4) Certificate Manager/ qsl's to Martin Foster G3VOF QTHR or QRZ.COM. Please also see qrz.com for the latest updates. Only log details necessary.

5) GB6GEO will be a 48hour working station, SSB will be used during the day, because of visitors to the station. CW will be used during the night time hours, CW frequencies will again be at the operators discretion.

RTTY :

From: "John Barber GW4SKA" <_ska@..._ (mailto:ska@...) >

Pat Leeper recently informed me that she would be unable to continue
managing
the ANARTS RTTY contest due to failing health. She has made every effort to
find
someone else in VK to take over the contest but with no success.

BARTG have had close links with ANARTS over the years and we felt that we
should
help in some way. After discussions between Pat and the BARTG committee we
have
decided on a course of action which I hope will meet with the approval of
the
RTTY contesting community.

For this year only the contest will be managed by John GW4SKA, the BARTG
contest
manager, with help towards expenses from ANARTS. The rules are much the same
as
in previous years but logs must come direct to _anarts@..._
(mailto:anarts@...) . You can find
the rules at _http://www.anarts.http://www.anarthttp_
(http://www.anarts.com.au/rules2009.htm) and they will also be
available on the BARTG website shortly. This will save any disappointment

for
those of us who have made plans to enter the contest this year.

2009 will be the last running of the ANARTS RTTY contest. From 2010 we will
be
moving the BARTG HF RTTY Contest from March to the 2nd weekend in June. This
will give us a bit more time between our Sprint and HF contests and also
avoid
the March clash of dates with the very popular Russian DX contest.

My thanks go to Pat for her cooperation and hard work in running the
previous
contests. The ANARTS test has always been one of my favourites and I know
that
Pat did not want to let anyone down at short notice.

73 and see you all in June,

John GW4SKA
BARTG Contest Manager

ITALY:
From the desk of IK1AWV Sal , RBLOB Member , DCI management Team

Dear Friends, Hunters and Castles Award Operators ,

Last year RBLOB held in Alessandria Zone, a mini castles-xpedition, and this
year RBLOB does it again, but this time the activity will be even greater:
at least about 3 times larger !!
One of the RBLOB's Member did a hard work in the last months, now all is
ready, and I am proud to present you the:
RBLOB SPRING ACTIVITY 2009,
Bergamo , April 18 and 19 2009,
- UNICEF for Children -

As you know, RBLOB does not care only of Ham Radio activities, Operations
Group is always interested to cooperate with some humanitarian project in
Africa.
We feel the duty to improve the living conditions of that poor people,
specially the children, and we choose to do it raising funds, helping them via
the UNICEF projects !

On RBLOB website pages, _www.rblob.com_ (http://www.rblob.com/) , you can
find our plans for the next spring activity, this time will be held in
Bergamo.
The Webmaster, Roberto IW8BZ made a very fine job.
On the 1st page there is a link to the presentation; from there you'll find
other 4 links:
The first one shows the UNICEF Project "Water for Nomad Children" .
The second page leads to an interactive map; with the pointer on the tower
you'll see the DCI References , and clicking on the tower you'll open a

window showing the list of the
references and the photo of the operator, clicking on the reference's name
you'll access to its photo.
The third page link leads you to a list of all the references that may be
activated during this operation and their operator's callsign
The fourth page is a photo album of the reference.
And last but not least you''ll be able to discover at the end who's the man
that managed all this, and believe me, we will never able to thank him enough.

Finally, we have to ask you a courtesy:
as you can see, we will put "on air" to Hunter's disposal about 200 DCI &
DAI references (!!!) in TWO days!
Considering the propagation conditions, the costs of the operation, the
stress and many kilometer the operators will have to run, but overall,
considering the UNICEF project, we will sponsor with this operation, we would kindly
suggest you , please to avoid, in these two days, to activate other DCI or
DAI References.
So, only RBLOB activity will be there and this will surely help to reduce
the mess and the pile-up, improving so the operations conditions for all YL and
OM involved as operators and as Hunters. This is another positive way , not
to forget, in order to help us to collect funds for Unicef Project.

I thank you All , 73

On behalf of All Operators,

MELLISH REEF :
VK9GMW up and running (03-29-2009 from AA7JV)
Mar 29, 2200 UTC, Mellish Reef. We are up and running although the antenna
still needs radials. So far we have operated without radials, but it appears
that we need some at low tide, as the tidal range is almost 2 meters here.
Will install radials today. We also will build a 160/80 RX ANT as the TS
noise is high. So far we have only operated at nights -- and therefore on
the low bands -- as we had to work on the station during the day. From today
onwards we will be active on the higher bands. RTTY in a few days time. At
this time we are trying to get as many QSOs as possible, as our presence
here is tenuous due to the always present threat of cyclones (hurricanes).
160 m Report: Despite weak signals from NA and EU last night we put a good
number of stations into the log (see log-search). JA signals were strong
with a dense pile up. Apologies to the JA stations who got squeezed-in
between our TX FRQ at 1823.5 and their upper band limit of 1825, but this
method allows us to work NA while still working JA during the NA propagation
lulls. Given the fact that band from here is open to JA almost all night,
while the NA window is narrow, we believe that this is not unfair.

VK9GMW QRV with temporary setup (03-29-2009 from AA7JV)
Mar 29, 0000 UTC, Mellish Reef. We spent all of Saturday setting up the station. Unfortunately, our brand new tent was lacking some vital parts (poor quality control in China, I guess) and we've spent a lot of time rigging up a shelter from tarps and drift-wood. (The tarps generate a lot of noise flapping in the 50 km/h breeze! Mechanical QRN.) We ran out of time to get the complete antenna up and were unable to operate on 160. Spent the night on 80 meters, although the partial antenna was not ideal for that band either. Conditions were variable: during the early part of the evening NA was strong but signals dropped after 1300 UTC. Conditions to EU were mediocre, with mostly eastern and northern Europe dominating (especially OH). We will complete the antenna (and lots of other chores) today and hope to be on 160 tonight.

Rockall is the summit of an old volcano located between the North tip of

BARTG

Pat Leeper a indiqué récemment qu'elle était désormais incapable pour
raisons de santé d'assurer le management du concours ANARTS RTTY.
Elle a essayé en vain de trouver un remplaçant en Australie.
Bien que les liens aient été rompus dans le passé, Pat a discuté avec le
comité du BARTG
mmunauté numérique. Il a été décidé d'agir en commun pour la satisfaction de
la communauté des oncurrents des concours RTTY.
Pour cette année uniquement le concours de l'ANARTS RTTY sera géré par John
GW4SKA, le contest manager du BARTG avec l'aide financière de l'ANARTS.
Les règlements sont inhangés seuls les logs seront adressés à :
anarts@... (mailto:anarts@...) .
Règlement disponible à : _http://www.anarts.com.au/rules2009.htm_
(http://www.anarts.com.au/rules2009.htm) et sur le site BARTG dans quelques jours.
Ainsi pour ceux qui avaient prévu de participer à ce concours, il n'y a rien
de changé dans la compétition.

2009 szra la dernière du concours ANARTS RTTY. En 2010, il fusionnera avec
le BARTG HF RTTY, qui se tient le deuxième week end de juin.
Les clashes avec le concours Russian DX seront ainsi évités.
Merci beaucoup à Pat pour sa coopération et le travail important réalisé
pour gérer les précédents concours.

italiens.
Hers amis
L'an dernier le RBLOB a organizé vers Alessandria, une mini expédition
château et cette année, l'opération est renouvelée avec un peu plus d'imôrtance.

Nous présenterons donc le :
RBLOB SPRING ACTIVITY 2009, à Bergame les 18 et 19 avril 2009,
UNICEF pour les enfants.
Comme vous le savez , RBLOB n'est pas seulement une activité radio amateur.
Le groupe est toujours actif lors d'opérations humanitaires en Afrique.
Nous sommes conscients d'avoir à lutter pour améliorer les conditions de vie

de ces populations pauvres et spécialement celles des enfants. Nous avons donc choisi de lever des fonds dans ce but afin d'aider les projets de l' UNICEF !

Sur la page du RBLOB , , _www.rblob.com_ (http://www.rblob.com/) , vous trouverez les informations relatives au prochaines activités de ce printemps qui ce tiendront cette fois ci à Bergame.

Lors de ces journées les chasseurs pourront trouver environ 200 références château sur l'air.
Merci à tous de ne pas activer d'autres châteaux en dehors de ce programme ces jours là.
Merci d'aider les projets UNICEF.
I thank you All , 73

Nous sommes actifs même si quelques verticales manquent de radians à marée basse.

Des radians supplém"entaires sont maintenant en place ce jour 31 mars.
Nous acons érigé une antenne RX 160/80 RX car le bruit de fond est important.
Nous aons jusqu'à maintenant été actifs la nuit sur les bandes basses. A partir du 31/03_01/04 nous monterons en fréquence et seront également en RTTY sous quelques jours.

nous essayons d'engranger un maximuim de QSO car la durée notre présence est incertaine à cause des cyclônes toujours présent s sur zone.

Eb dépit des faibles signaux nous avons eu sur 160m de nombreux QSO avec l' Europe et l'Amérique du Nord. Les JA arrivent très fort et occasionnent des pile ups importants.
Nous sommes désolés d'en manquer à cause de leurs fréquences TX FRQ at 1823.5 et leur bande supérieurs à 1825, avec lesquelles il n'est pas facile de jongler quand ils arrivent en même temps que les Américains.
Nous avons travaillé tout le samedi avec une station provisoire, pendant qu' on finissait d'installer le reste du matériel.

Nous avons eu de gros ennuis avec notre tente fabriquée en Chine sur laquelle nous avons passé beaucoup de temps en réparations avec de nombreux rouleaux d'adhésif.
A par la zone Nord Europe et la Finlande les conditions avec le reste de ce continent ont été médiocres.

John,

Is it possible when you post a question such as this that you ask people to reply in private to you direct? So many times you post a question regarding the RAC or other items and for days our mailboxes are filled with replies on the reflector that we are not really interested in reading. Maybe not so bad at home but when traveling I hate to open my mailbox and find so many useless emails to sort thru and delete.

TIA

I made a polite reasonable request. No need for such a rude reply. Maybe I'll start forwarding all my SPAM to your email address before I delete it and see how you like it.

There are 380 people subscribed to this reflector. Do you think all 380 of us want to know when you received your RAC or if you use Verizon? What if all 380 people decided they would reply and their replies were posted on the reflector?

Most reflectors are configured that when a person makes a reply his reply goes directly to the sender but the GOLIST is set that all replies go to the list. This results in an excessive amount of frivolous posts that people just delete.

Guess it is time to unsubscribe.

Is it possible when you post a question such as this that you ask people to reply in private to you direct? Maybe not so bad at home but when traveling I hate to open my mailbox and find so many useless emails to sort thru and delete.

Zack, you did indeed make a polite request and another user told
me how to reconfigure the reflector so that the responses would only
goto the sender and not the list. The change has been made to the
Golist reflector and also the WTDXA reflector. Now maybe I won't
screw up so bad. But a dollar bill says I will find another way to do it.

I am very good at this Zack, just after getting a full blown ISP and not
really knowing how to use an email client, I did this:
I have a real good friend with whom I fuss and fight with all the time,
mainly in public. It is just something we do. One night, in a weak
moment, I decided to send him a hate message. I wrote it very large
print " You Make Me Sick". I sent it only to him, WRONG!!! that message
went to everyone in my email address book, so 2 or 3 hundred people.
Well, most figured out what I did, but some I have not heard from for
several years.

Life is hard and I make it worse!!

Thanks for making the change, John. For everyone's info, if anyone
wants their response to go to both the sender *and* the list, all
they have to do is a Reply All instead of just a vanilla Reply.

Hi folks,
??? The Golist is fortunate to have the major DX Bulletins
sharing their information either directly to me or many even
post directly to the Golist reflector. Publications like OPDX,
425 DXNews, VA3RJ's I.C.O.P. bulletin, QRZ-DX and DX
Magazine and others.? These folks have been at their trade
for many years and do a great job in keeping all of us informed.
??? Many Qsl Managers are also Golisters and keep me up to date
with their client stations. I get updates from many managers that
handle hundreds of clients, but still find the time to alert me when
they have a change. You can not imagine how much this helps me
in keeping the Golist information accurate for you folks. Many of
the Golisters are also DXpeditioners and they keep me informed as
well.
??? DXers are much better informed today than yesterday, mainly by
the efforts of the DX bulletin authors. Their information is accurate
and timely.? Unlike the info from the DX Clusters which is often
old or misinformation in total.
??? I spend many hours on the DX Clusters just plugging in the DX calls
on the cluster to see if the Qsl Manager info in the comments field is
the same as I have recorded.? If it is not, I start to find out if my info is
outdated by contacting the manager I have listed and the manager from
the cluster spot and the DX station directly. Most often I hear from all
of them, but in most cases I do get verified info.
??? My thanks to all of those that send and share their information with me.
It helps me keep all the Golisters informed with accurate information.

Midway Island 2009
Press Release Number 2???????? March 31, 2009
We are pleased to announce the anticipated dates for the DXpedition are now set for 9 through 19 October. These dates have been selected to allow maximum operation for the eleven days we will on the island and most importantly provide Midway Island over two weekends.
Logistical planning is under way and equipment is being arranged. Plans for six stations to be located in two separate locations are proceeding with two antenna fields feeding these two
operating sites. Modes will be CW, SSB and RTTY with at
least one station on 20 meters 24 hours a day to provide that
new entity to those who need it. A link is now provided showing
the radio site at the X on the beach area on the north side of
the island where the operating positions will be located.

The DXpedition web site www.midway2009.com (http://www.midway2009.com) is fully functional.
New additions are a poll to find out what bands and modes are
most needed and a Midway 2009 memorabilia store. Follow the
links to tell us your Midway DX needs and to add to your DX
memorabilia collection.

The team is highly experienced and anxious. We invite you to become
familiar with some of the team by visiting

Station fully functional (01-04-2009 from AA7JV)

Apr 1 0000 UTC, Mellish Reef. The station is fully functional now,
except for RTTY, which we will get to in a couple of day's time.
We had an interesting opening on 15 m yesterday evening towards
Europe: stations were coming in at S9+ three hours past our sunset.
The 20 m opening to NA this morning was short but intense with a pile-up
that sounded like a waterfall. Could it be that the unusually good conditions
on the higher bands correspond to the poorer conditions on the low bands?
Low Bands: 160 m: Unfortunately, the pennant did not work due to a
broken transformer wire that I only found this morning (thin wire, needed
the light). Noise, however, was lower than the night before and NA was workable,
albeit at a low QSO rate. JA traffic seems to be thinning out; perhaps a result
of us moving the TX FRQ down to 1825.5 to allow for a wider split, or perhaps
with over 500 JA TB QSO-s, we have satisfied some of the demand. Will be on
TB again tonight, hopefully with a (well) working pennant. An interesting aside on
the faulty pennant. The primary of the transformer was only connected to the lower wire.
This has resulted in extremely weak signals, except for signals from UA9 and UA6,
at 90 degrees to the intended RX direction. Totally unexpectedly, I was able to
work stations from that direction that were totally inaudible on the TX antenna
through the S4-5 noise. After the West-Coast traffic faded out (sometimes around
1200 UTC, quite early!), QSY-ed to 80 m for a second dip at the West-Coast and
some very good pile-ups from Asia and Eastern Russia. Went back to 160 for EU
but stations were weak and the QSO rate low. Many stations were being helpful by
sending actual reports. This is appreciated because our antenna has several
configurations and we are trying to find out which are the best for particular directions,
especially on 80.

Hi friends
CORSICA - TK :
IOTA : EU-014, DIFM TK-001.
Between April 8 to 15th, look for Joachim, F6BUL, to be active as TK/HC/qrp, from Querciolo, about 25 km south far from Bastia.
Holiday style traffic in QRP, CW/SSB, with ICOM IC-703 , 10 w into Walkabout or HF-5S Diamond. Antenna.
Frequencies : 7011 = 7048 = 10109 = 14011 = 14111 = 18078 = 18131 and if open 21011 = 21211 = 24898 = 24928 = 28011 = 28411 .
I'll be also active in V/UHF with a FT-50 for local traffic or through the repeaters.
QSL via F6BUL when back home, direct or via the French REF-Bureau.
Salutations de Joachim
Tks Joachim, F6BUL

MALTE – 5H
Hi Dear Friends,

This year I will spend my short eastern holidays from 9th to 14th of April, in Malta, IOTA-EU-023 , and have obtained the callsign 9H3JR .

I will be in Bugibba, loc JM75EW, St. Paul's bay, and /p around the islands if the weather will be ok .

I will be active time to time, holidays style, both /P and from QTH, in ssb mainly on 40 and 17, but any band 80 to 6 is possible.

I take with me my FT817 for /p, and IC7k with ah4 for fixed .
The antennas will be long wire, dipoles or a 10m fishing rod, depending on bands, places and space available.

The APRIL 2009 Issue #904-A files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? I have
started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections
to me for the Rejected project in GoWin. This Rejected list is also
now in the weekly data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

Pile ups, birds, saving gas (02-04-2009 from AA7JV)

Apr 02, 2009, 0100 UTC, Mellish Reef. The pile-ups continue. They are dense to the point where it is difficult to maintain a good QSO rate. We will try to spread them a bit, although we do not want to take up too much of the bands. The weather continues to be fine and we hope that we will be able to stay beyond Apr 10. We have started catching fish to supplement our food supplies. We have also reduced the number of trips between the island and the boat to conserve gas. Again we have noticed that many stations have poor TX/RX switching (hot switching), where the first element of a morse letter is lost (not amplified). We are getting calls from a lot of OA (JA), M (W), TA (AA), IL (DL) stations. This is a surprising wide-spread problem. Low Band Report: 160 meters started off great last night. We got on the band early at 0830 UTC (we were working JA on 12 meters just 6 minutes earlier!). Signals from NA (and JA) were strong and exceptionally clear for about two hours, after which the noise level increased to the point where even JA signals became very difficult to copy. (The increase in noise level probably corresponds with sunset over regions to the north-west of us, where the monsoon season is active.) At 1049 we QSY-ed to 40 meters for an hour to meet a strong demand from NA (especially from the East-Coast). When we returned to 160m at 1144, conditions towards NA were somewhat better (West-Coast stations with stronger signals). The pennant failed again. We have finally figured that during the night large birds fly into it. Will strengthen it today and hopefully we will have better ears tonight. 80 meters was very good to both NA and EU during the night. We intend to start on 160 early at 0700, trying to take advantage of the better conditions that seem to exist before 1030. 160 Split: NA stations should call on clear frequencies up from 1825.0 rather than piling-on the last QSOs frequency (unless you are very good at tail-gating.) We will be tuning the RX up from 25.0 and will get around to you. This will hopefully spread the pile-up and allow us to work more stations.

18/04/2009: The Algarve STAR DX Team will activate Doca Olhao (Parsena Olhao) West Lighthouse (ARLHS POR-129, DFFA Fa-32 for the Algarve Lighthouse Award) on Amateur Radio Day, April 18th, between 0700 and 1300 UTC. Callsign will be announced later. All information will be online at: algarvedx.com/ [Algarve S.T.A.R. DX Team]

29/04/2009: The Teresina DX Group is preparing a DXpedition to the Canarias Islands (IOTA 072, DIB MA-05, DFB MA-11, WW Loc. GI97BF), on the coast of Piaui, Brazil, from 1600 UTC April 29th to May 3rd. QRV 160 to 10 meters (SSB, CW, PSK31 and RTTY), including 6 meters, 144 MHz (SSB and FM). They also plan the following satellite activity (SSB/FM): AO-7 (A and B), FO-29, AO-51, VO-52, SO-50 and the ISS in repeater mode if active. Team members include PS8BBC, PS8DX, PS8ET, PS8FSM, PS8HF, PS8JN, PS8NF, PS8PY, PS8RF and PS8TV. QSL via PS8DX (QRZ.com). [PS7AB]

30/04/2009: A Belgian group of die-hard amateur radio operators along with ON4HIL, ON4ATW, ON6CC, ON4IA, ON5TN, ON7YT, ON6ZU, ON4AHF, ON5GS, ON6NL and ON4BR took up the challenge to land and to be active from Rockall island as MM0RAI/p (EU-189), in order to make thousands of radio contacts from the "most wanted" spot for ten thousands of hams. They are planning to start their activities on April 30th to May 3rd. Operations will be lead from 80 to 10m on CW and SSB only. QSL via the bureau or direct through ON4BR. Further info at: www.rockall.be/ [UBA HF News]

07/05/2009: Special Event Station celebrates 100 years of the Fleet Air Arm. On 7th May 1909 the Admiralty began a process that was to lead to the formation of the Fleet Air Arm. As 2009 is the Centenary Year of Naval Aviation, there are a number of events and publications throughout the year to celebrate and commemorate this event.
RNARS will be operational with the SES GB100FAA from the 7 May to the 15 May 09 from HMS Collingwood and from 19 May to 21 May 09 from RNAS Yeovilton.
The RNARS Chairman Mick Puttick says: "This is a chance for us to assist in publicising this historic occasion. Contacts with the special event stations and with RNARS members will also count towards the awards issued by the Society."
Operation will be on SSB and CW on the usual RNARS frequencies, band conditions permitting, and, +/- QRM: SSB - 3740, 7055, 14294/14335, 18150, 21360, 28940 kHz; CW - 3520, 7020, 10118, 14052, 18087, 21052, 24897, 28052 kHz. It is expected that a 2 metre FM station will also be operational. More information about the Society and the awards can be found at: www.rnars.org.uk. [Southgate ARC/Pete's-DX-Newsdesk]

23/05/2009: Fellow club members of CRD (Club Radio Durnal) of the UBA will be aired as OT65ALG from May 23rd to 24th in order to be active from Airfield of Temploux (Namur). They will be active from 80 to 15m on SSB and digimodes only. Airfield of Temploux was considered as an Advanced Landing Ground by USAAF during WWII. Her callsign was ALG Y47 air strip and nicknamed as "gangway advanced". QSL cards are welcomed via the bureau or direct with sufficient postage (USD 2,-) or equivalent in Euro. Insufficient request will be answered via the bureau. Each QSO will be confirmed by a special QSL card. [UBA HF News]

30/05/2009: Ulf/DL5AXX and Frank/DL8WAA will be active as CS9L from Santana, Madeira Island (AF-014, DIP MA-001, LH-0053), during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. They are looking for 1 more operater. Pse email to dl5axx@... . QSL via DJ6QT, direct or Bureau. [NG3K]

25/06/2009: Alan/G0RCI, Pete/M0USY, Harry/G7DEH and Alan/G4VUA will be active from Holy Island, Wales, as GW0GRC from 1100 UTC June 25th to 1200 UTC June 29th. QRV all HF bands, around the usual island and IOTA frequencies. QSL via G0RCI, direct or Bureau. [rsgbiota.org]

ON65CLM - CANADIAN LIBERATION MARCH
The special event station ON65CLM stands for the "Canadian Liberation March" and will be aired by UBA club station ONZ from March 1st until December 31st. This march is to remember the liberation of the Town Knokke by the Canadian armed forces in November 1944. The original march of the liberators started in Hoofdplaat in the Netherlands, 33 km away from Knokke. Nowadays thousands of grateful marchers participate every year at this 33 km long walk in remembrance of those brave men. QSL to the bureau. [UBA HF News]

U.S. COUNTY HUNTING - USA-CA

N4AAT - Scottie - 6* - April 2nd to April 8th - SSB and CW
I will be running some counties in VA, WV, MD, PA, NY, and all of NJ. Then back through some in PA, MD, VA, and NC. I will start early Thursday morning and try to run counties on 80 and 40 meters, untill someone hears me. Then I will run 40 and 20 SSB. I will run 80 SSB and 40 CW on request only, time permitting. I will have with me 20, 40, 80 SSB and 17, 20, 30, 40 CW resonators with me. If I'm next to a last county that you need, let me know so I can take a little side trip and get it for you. I must be in NY by Sat. Time premitting I will try to run Bronx, New York, Queens, Nassau, Suffolk, Kings, Richmond, but maybe not in that order. I will run all the counties that my truck takes me to, LOL. MY route looks like Northwest VA, Northeast WV, Western PA, Western NY, southeast NY, all of Jersey and the middle of VA south. Send me an E-Mail if you need something special within my route. Good luck, and hope I can fill some needs. Good for all your stars, N prefix, Bingo, Master Gold, Master Platium, and good for nothing, LOL. Scottie. Send email requests to scoosh@pbtcomm.net [County Hunter Web]

ZL2CD Bill SK
To those who remember Bill Hamer ZL2CD this a sad message to say that Bill passed away on Sunday 29 March 2009 at Wellington Hospital.
Bill received a QSM for services to radio but will be remembered by untold thousands of amateur radio ops all over the world for his QSOs.
He was mostly active on CW but his voice was heard on SSB. His great times were on 6m until NZ television on channel 1 finished that for him.
As QSL Manager for the Wellington Amateur Radio Club I can say that from the huge number of cards received for him he was a constant operator. Not many could match his activity.
I will miss Bill and there will be many, many hams all over the world who will wonder why they do not hear from him any more. [ZL2MM]

MELLISH REEF UPDATE
Station fully functional (01-04-2009 from AA7JV)
Apr 1 0000 UTC, Mellish Reef. The station is fully functional now, except for RTTY, which we will get to in a couple of day's time.
We had an interesting opening on 15 m yesterday evening towards Europe: stations were coming in at S9+ three hours past our sunset. The 20 m opening to NA this morning was short but intense with a pile-up that sounded like a waterfall. Could it be that the unusually good conditions on the higher bands correspond to the poorer conditions on the low bands?
Low Bands: 160 m: Unfortunately, the pennant did not work due to a broken transformer wire that I only found this morning (thin wire, needed the light). Noise, however, was lower than the night before and NA was workable, albeit at a low QSO rate. JA traffic seems to be thinning out; perhaps a result of us moving the TX FRQ down to 1825.5 to allow for a wider split, or perhaps with over 500 JA TB QSO-s, we have satisfied some of the demand. Will be on TB again tonight, hopefully with a (well) working pennant. An interesting aside on the faulty pennant. The primary of the transformer was only connected to the lower wire. This has resulted in extremely weak signals, except for signals from UA9 and UA6, at 90 degrees to the intended RX direction. Totally unexpectedly, I was able to work stations from that direction that were totally inaudible on the TX antenna through the S4-5 noise. After the West-Coast traffic faded out (sometimes around 1200 UTC, quite early!), QSY-ed to 80 m for a second dip at the West-Coast and some very good pile-ups from Asia and Eastern Russia. Went back to 160 for EU but stations were weak and the QSO rate low. Many stations were being helpful by sending actual reports. This is appreciated because our antenna has several configurations and we are trying to find out which are the best for particular directions, especially on 80. [K1XN]

Midway Island 2009
Press Release Number 2 March 31, 2009

We are pleased to announce the anticipated dates for the DXpedition are now set for 9 through 19 October. These dates have been selected to allow maximum operation for the

eleven days we will on the island and most importantly provide Midway Island over two weekends. Logistical planning is under way and equipment is being arranged. Plans for six stations to be located in two separate locations are proceeding with two antenna fields feeding these two operating sites. Modes will be CW, SSB and RTTY with at least one station on 20 meters 24 hours a day to provide that new entity to those who need it. A link is now provided showing the radio site at the X on the beach area on the north side of the island where the operating positions will be located.

The DXpedition web site www.midway2009.com is fully functional. New additions are a poll to find out what bands and modes are most needed and a Midway 2009 memorabilia store. Follow the links to tell us your Midway DX needs and to add to your DX memorabilia collection.

The team is highly experienced and anxious. We invite you to become familiar with some of the team by visiting http://www.midway2009.com/meettheops.html.

This activity counts for the Istanbul Lighthouses On The Air Award. The rules and more details about the award can be found online at: www.ta0u.com/detay.asp?id=4296 [DX Newsletter]

DXCC Rule Change: At the request of the Program and Services Committee (PSC) the DX Awards Committee (DXAC) investigated the impact of an amendment to the DXCC rules. The DXAC and the PSC have unanimously decided to bring into force the following rule from April 1, 2009, 0000Z: To meet the growing outrages of direct-QSLs to put to an end only bureau mediated QSL-cards will be credited for DXCC. Intended side effect is a higher degree of organization of radio amateurs in the respective national associations combined with a strengthening of the IARU and the total of Amateur Radio. ANARTS and BARTG contests .. the future

From: "John Barber GW4SKA" <ska@...>

Pat Leeper recently informed me that she would be unable to continue managing the ANARTS RTTY contest due to failing health. She has made every effort to find someone else in VK to take over the contest but with no success.

BARTG have had close links with ANARTS over the years and we felt that we should help in some way. After discussions between Pat and the BARTG committee we have decided on a course of action which I hope will meet with the approval of the RTTY contesting community.

For this year only the contest will be managed by John GW4SKA, the BARTG contest manager, with help towards expenses from ANARTS. The rules are much the same as in previous years but logs must come direct to anarts@.... You can find the rules at www.anarts.com.au/rules2009.htm and they will also be available on the BARTG website shortly. This will save any disappointment for those of us who have made plans to enter the contest this year.

2009 will be the last running of the ANARTS RTTY contest. From 2010 we will be moving the BARTG HF RTTY Contest from March to the 2nd weekend in June. This will give us a bit more time between our Sprint and HF contests and also avoid the March clash of dates with the very popular Russian DX contest.

My thanks go to Pat for her cooperation and hard work in running the previous contests. The ANARTS test has always been one of my favourites and I know that Pat did not want to let anyone down at short notice.

73 and see you all in June,
John GW4SKA

BROADCASTING STATIONS TO MOVE FROM 40M BAND
>From 29 March 2009, broadcasting stations will be moving away from the 7100-7200 kHz band as per WRC 2003 decisions to pave the way for extension of the 40-metre Amateur Radio band. The frequencies between 7100 to 7120 kHz were used by broadcast stations for decades.

8408. HELP WITH A CALL SIGN

Yahoo group: GOLIST (2007 — 2010)

From: K1XN
Topic: 8408 Message: 8408

John & Others on the list,

I am looking for help in trying to figure out a call of a station I worked.

I worked (what I thought was) A91A Sunday March 29th @1647z on 14.233 during the CQ WPX SSB Contest.?

After the contest I went through my logs and saw I had?4 new?DXCC countries. I located QSL routes for them but A91A was not coming up. After further searching some spotting sites it's quite evident it probably was not even a A9. The couple of sites I looked at you could only search by callsign, Being that's what I was looking for I was having problems. I could not figure out how to search by date, freq or time frame to narrow my search to try and?figure out?the correct callsign. I generally?recall the contact as I didn't make that many. The station was using phonetics and had a?ok signal but the English had a accent and I was questioning the 9 in the call. After listening several more times I was convinced he was saying A91A. Looks like I was wrong...

Can any of you help me with this?

Thanks,
Brian - NX0X

Thanks guys for the couple of replies I received looking for A91A...

After studying a file I was sent?on spots?during the time of that contact. I found S51A was spotted twice 15 minutes before I stumbled upon him on generally the same freq.

I was questioning the 9 when I heard it but really missed the "S".

Sierra, Alpha..... I better get my ears checked.

Thanks Again,

onditions and Policies (04-04-2009 from AA7JV)
Apr 04, 2009, 0100 UTC, Mellish Reef. We continue with our efforts to give VK9m to as many amateurs as we can. There have been a lot of requests (and some complaints) that we should spend more time on the higher bands (i.e. 40 meters and up). As advertized, we are a small DXpedition with a low-band focus. At night we work the 160, 80 and 40 meter bands; in that order of importance. During the day we work the higher bands (and don't sleep). Despite the low-band focus, more than 40% of our roughly 8000 QSO-s to date were on 30 to 12 meters. We feel that's reasonable.

Winds have increased last night and we had to re-enforce the tent several times. Even worse, the flapping of the tarpaulins is creating a lot of noise: mechanical QRN! Forecasts indicate that winds will moderate somewhat. (From 30 knots to 20.)

Low Band Report: We had another difficult night on 160. We started at 1940 UTC but noise was high and signals from NA were fluttery with rapid QSB. Stations should send their calls at least twice (maybe three times if running less than 5 kW) to give us a chance for an accurate copy in these conditions. Like during the previous night, noise increased after 1230. We QSY-d to 80 meters at 1255, where we had good conditions into NA and Asia until 1500 hours. After that we worked 40 meters until 1900, as 160 continued to be noisy. Returned to 160 at 1900 (probably a tad late) and worked a few dozen Europeans before all signals faded out at 1952. Following that, 80 m was mediocre at best, but we found good conditions on 40 meters.

The following operating pattern is emerging as our most productive:
160: 0930 until 1230
80 : 1240 until 1500
40 : 1500 until 1730
160: 1730 until 1950

Of course, should we encounter good conditions on 160, we will remain on 160 as long as those conditions last. The same goes for 80.

The pennant is helping to mitigate the noise. Interestingly, while it was intended for NA on 160, it helps most on 80 towards Europe. On the other hand, the 'mechanical QRN' of the flapping tent is making copying weak signals very difficult, despite our noise-canceling head-phones. The new mini-beverage (100 m long), completed late last night, heard only one signal: our generator! This morning we have added some filtering and moved the grounding wires to reduce the noise. We will see tonight whether it helps with QSO-s.

Dear hunters of degree program WFF!

We are glad to inform you that our service program WFF LogSearch, which allows to satisfy a condition of diplomas of program WFF on the basis of electronic dens WFF of expeditions is started in that, certainly, will allow to save a lot of time and forces at drawing up of demands and will facilitate human work.

Service WFF LogSearch only has started to operate, but already in its database is presented more than 200 WFF expeditions from 5 continents of the world, more than 320 000 QSO and, already every day WFF the committee receives many electronic dens for various WFF expeditions.

We invite expeditioners, from among participants or organizers of expeditions who are set off under program WFF, to take part in work WFF Logsearch and to give the broad gulls in format ADIF. We hope that this service will allow many hunters to become closer behind diplomas to program WFF which dynamically develops every day and grows. Certainly, each hunter can increase the results and to the electronic demand to put the demand on the basis of received QSL’s which also go to offset the WFF program.

We are all aware that CQ Magazine and Eqsl.cc have

??? Many DX stations and Qsl Managers are still not using
the Eqsl.cc service.? I know paper Qsl cards still work for
both CQ and ARRL awards.? What is your opinion of the

John,

While I still like to look at the paper QSLs, LoTW and eQSL are an order of magnitude easier and less expensive for all concerned. I have at least one "paper" QSL for all 338 countries, so I'm 100% behind doing everything electronically for band fills, etc.

I still believe most DXers would like to have one traditional QSL for a photo album as they chase DXCC, etc. However, the cost and time required to get paper QSLs is sure making the electronic versions shine.

Check me off as a fan of LoTW and eQSL. I'd like the wait time a year or two to upload logs (as is the case with many DXpeditions) eliminated as well. As soon as the operation is over and the logs are in good shape, I'd like them to be uploaded. This is 2009, not 1980. Any of us who want a paper QSL should be able to get it as long as we are willing to send a SAE and return postage, but that should be optional and not required.

I am not a fan of Eqsl since the ARRL does not count it. Too much bookkeeping to track.

I do have an Eqsl account, but I seldom look at it.

It takes a lot of time just to keep track of my LOTW and paper QSLs since I am busy trying for 7 and 8 band DXCC at the moment.

* I upload to both services, but prefer LOTW. More and more DXpeditions
are starting to post their logs to LOTW now. I understand the reluctance of
DXpeditions to use the new services as there is a fear of losing support
monies for there operations. I am sure this is justified to a degree,
but I
trust those of us who send donations will continue to do so regardless of
the method of Qsling. I personally like the archive aspect of LOTW for logs
of individuals and dxpeditions. I would like to see more managers use LOTW
just for that very reason. We don't live forever, but our logs could be
preserved.

I use and prefer LOTW. I don't feel eQSL is as secure and
maintaining two separate systems is too much trouble.

I also doubt you will find many major DXpeditions providing immediate
on-line uploading. Donations in return for QSLs is a major source of
funding and without it a lot of projects simply won't be able to
finance themselves. So while I don't think it is reasonable to
expect free immediate on-line QSL'ing, I think immediate on-line log
confirmations are to everyone's benefit. On-line log confirmations
tend to reduce multiple "guarantee" QSOs resulting in smaller
pile-ups as the project continues.

Dick, et al,

This raises a good point. I'm believe that:

(1) Individual donations (the ones in the QSL envelopes sent to the manager after the fact) are not a significant portion of the cost recovery. Most people just put in a SASE or an IRC or the minimum number of GSs necessary, depending on where the manager is located.

(2) We would donate more if we felt the LoTW uploads would take place a few weeks after the DXpedition, as opposed to a year or more.

I, for one, would be much more inclined to make a larger donation if I thought the logs would be available right away - Point (2) above. From Canada it costs me $1.65 to mail a letter overseas, and I have to include 2 GSs, often 3. Throw in the cost of two envelopes and my QSL, and I'm looking at $5.00. This with little or none going to offset the cost of the DXpedition. Far better to give the $5.00 to the DXpedition team.

I have donated to several DXpeditions in the past, and one I felt "forced to" because the return of QSLs, either electronic or direct, was based on donations. I believe we are starting down a slippery slide when we set a precedent that those who donate the most get their QSLs first.

Major DXpeditions cost a fortune -- some upwards of $250K or more. Large donations by clubs, equipment manufacturers and some wealthy Hams offset this to a degree. For the most part, the team members absorb the brunt of the cost. I can't afford to send $100 to every operation that goes to a semi-rare location. There are at least a dozen a year that fall into that category. However, I would send them a PayPal or equivalent donation of $10-20 if I knew the

LoTW (and eQSL) uploads would be done as soon as practical. I believe getting even $5-10 from most of the DXers via electronic transfer would far outweigh the spare 50-cents or whatever is left over from traditional QSLing.

We've made the leap from 1975 to 2009 in terms of QSL media. Should we not attempt to do the same with cost recovery? Holding back the electronic uploads until everyone has sent for their paper card (which become redundant as soon as the upload occurs) is wasteful and not really doing a lot to help offset the cost.

I only use LoTW. It is a good system but I still prefer paper QSL cards. Reason being I will never get to most of these places in the world before I become a SK. So for me it is the trip I never took.

The expense is not a factor. Any hobby is expensive. Later when looking for cards for my next submission I'll remember the memories of the QSO.

I have been told there are QSL waiting for me on Eqsl however since I not a member and don't plan to become one they are a waste of time by the other station. Sorry.

Both LoTW and Eqsl will expand as amateurs want faster confirmations and little to no cost. When I work a DXpedition they receive a donation and then additional with my QSL.

RTTY operation may be cancelled (04-06-2009 from AA7JV)

Apr 06, 2300 UTC, Mellish Reef. We are now operational on SSB. RTTY, however, may not be possible, as the RTTY computer got wet (alongside with Tomi, who fell into the water with it). If we are able to dry it and make it work (a very big if with salt water) we will get on RTTY during the next few days. We will know by tomorrow and will post on the situation. (The computer is now on top of the generator: gentle vibrations and heat -- you never know...)

Low Band Report: Very difficult conditions on 160 meters both last night and this morning. We got on 160 at 0945 UTC. The band was extremely noisy, with loud S7 crashes (on the beverage) that went on for several seconds at a time. NA stations were generally weak until about 1100, when suddenly signals became quite strong but very fluttery and hollow sounding. (They were perhaps arriving via a different path.) The good conditions lasted for about 30 minutes, after which signals became week again. One can definitely feel that the 160 meter season is changing. We quit 160 110 QSO-s later at 1230, when the noise became too painful to bear. We QSY-d to 80 meters where signals were strong both from NA and JA, and later, EU. 40 meters was relatively poor, except later in the morning, between 1730 and 1830. We returned to 160 to find that conditions did not improve: noise was still horrendous. Some EU stations, however, did manage to get through, especially around 1910, when a sudden signal enhancement produced a few loud signals. There was a bit of a spot-light effect, with the majority of the QSO-s coming from Germany. It did not help that during the last two nights a fishing beacon has been parked on 1825.0 with a steady S6 signal. And the irony is, that its call-sign is 2AHAM!

QSO Procedures Advice: Stations when hearing their correct call-sign from us should reply with the report and call-sign, or QSL, or R, or CFM and the report and their call-sign, but should not send their call-sign before the report, especially not repeatedly. Under the difficult conditions we are having, the operator can easily get the call wrong and change an already correct call, believing that it is being repeated because it is incorrect. If your call-sign being sent by us is correct, leave it alone. If it is not correct, just reply with the correct call-sign and don't send the report until we get your call-sign right. By the way, we feel that we are doing a lot better now that stations are sending their call-signs three times in their initial calls. Some callers, however, seems to have problems hearing us despite having great signals here. I came back to one of them so many times this morning that I ended up loading his call into the K3's memory.

MELLISH REEF:

The following update is from AA7JV, George Wallner, one of the two VK9GMW ops.

Apr 05, 0200 UTC, Mellish Reef. Piles-ups continue to be dense. It appears that there is an almost insatiable appetite for VK9m on all bands. To unclog the pile-ups, and to allow access by stations beyond the 'JA wall' we often call NA/SA. We believe that this is fair, given the fact that Japanese amateurs have at least three bands open to us at any time - and they are generally loud here - while openings to North and South America - especially on 160 and 80 - are short and difficult. The situation is similar with Europe: although we have longer openings to Easter and Central Europe.

Western Europe, however, has a very narrow and difficult window to us on 160 and 80 meters. Therefore we greatly appreciate when the JA stations allow us to work NA, SA and Europe. An unintended side effect of this is that we also exclude some Asian UA stations. As they are not numerous, they should feel free to call us anytime. We are also considering to be on 30 meters between 1130 and 1230 UTC to meet the demand from NA West-Coast stations on that band. This will take place, however, only if conditions deteriorate on 160 by that time, which they usually do.

We intend to remain on Mellish Reef at least until Apr 10. After that we will be looking for a favorable WX window for the return trip to the Australian mainland. We have supplies until Apr 15 - maybe 18, if stretch them and reduce power on the higher bands. Otherwise, we are using 'natural resources' to feed ourselves. (And, in any case, some of the crew could use some dieting.)

Low Band Report: 160 meters was wonderful last night. The station was being operated by Tomi who QSY-ed to 160 at 0810 to meet a large pile-up of NA stations. He went unexpectedly QRX at 0822 to complete a QSO with NA1SS (International Space Station) on 2 meters, but was back by 0832. Noise was low and the new mini-beverage was working, allowing Tomi to log 240 QSO-s by 1249, when he went to sleep. (Again, a beverage working near sea water!) Tomi was back at the key at 1630 to work another 100, mostly European stations by 1950. Noise was low during the entire period. QSB was moderate. Unfortunately, some stations participating in the SP contest were operating close to the TX frequency with loud clicks (DL8QS), forcing Tomi to QSY to 1823.5, although that only helped a little. Being close is OK, generating clicks is not: it is most often just carelessness, perhaps the result of over-driving the PA, or some other adjustment. If you feel that you may have missed out on VK9m on TB because of these clicks, please let DL8SQ know. Perhaps all he needs to do is adjust his rig.

The following update is from AA7JV, George Wallner, one of the two VK9GMW ops on Mellish Reef. They have a log search at http://www.vk9gmw.com/logsearch.html.

Apr 6, 0200 UTC, Mellish Reef. We are up and running on SSB. From here-on we will be on SSB for two to three hours daily. The weather continues to be good, with no threat of cyclones (yet).

Low Band Report: 160 m was noisy last night but signals from NA were workable from 0930 onwards, although QSB and fluttery signals made copy difficult. Around 1015 UTC signals increased substantially and we completed around 200 QSO-s by the time the window to NA closed at 1155. QSY-d to 80 at 1200 where conditions were very good. The mini-beverage worked well 160 and it shined on 80. We returned to 160 meters at 1740 to hear loud and prolonged lightning crashes peaking over S9 on pennant, which we've reoriented towards Europe the day before. Noise was even more on the TX

antenna. Nevertheless, signals from Europe were strong and clear between the crashes and we logged over 100 EU contacts. There was a substantial enhancement of EU signals around 1830, with a second, less pronounced, enhancement around 1910, about 40 minutes before our SR. Interestingly, during the enhancements, the TX antenna became he better RX antenna. Many callers continue sending their call only once or twice, which resulted in lost opportunities and wasted time. Lightning noise makes getting the call right on the first call (unless it is a very strong signal) very difficult. We really need the call three times for a good copy under these conditions.

MELLISH REEF:

Informations transmises par AA7JV, George Wallner, un des deux opérateurs de VK9GMW.

1)
5 avril 0200 utc.
Les pile ups sont toujours très denses et l'appétit pour les contacts avec VK9 semblent inextinguibles.
Pour permettre à de nouveaux opérateurs de nous contacter, derrière le mur JA, il nous arrive souvent NA/SA.
Nous pensons qu'il nous faut le faire car les JA ont la chance d'avoir au moins trois bandes ouvertes en permanence dans notre direction, et lorsqu'ils arrivent ici, « ils cassent tout », alors que pour nous cela correspond aux ouvertures courtes et difficiles sur les bandes basses .
Il nous faut dire quand même que les JA sont très disciplinés et nous laissent travailler avec NA, SA et l' Europe.
Un effet inattendu de ce mode de trafic nous a fit découvrir qu'il excluait pratiquement toutes les stations UA9 t UA0. Comme ils sont nombreux, nous admettons pour eux des appels à n'importe quel moment.
Pour le 30m nous avons ajouté une fenêtre de trafic sur 30m entre 1130 et 1230 pour les stations US Côte Ouest. Nous nous y tiendrons dans la mesure où le trafic sur 160m se détériorerait à cette heure où nous sommes normalement sur la Top band.
Nous resterons vraisemblablement sur Mellish Reef jusqu'au 10 avril.
Ensuite nous surveillerons les fenêtres météo et profiterons de la première pour rentrer sur le continent australien.
Nous avons des vivres et de l'énergie jusqu'au 15 avril, au 18 en se serrant un peu et en réduisant la puissance sur les bandes hautes.
Pour la nourriture, nous utilisons au maximum les ressources locales ; au mieux on mettra un membre de l'équipe à la diète.
Rapport bandes basses :
Le 10m a été merveilleux la nuit dernière. Tony s'est installé sur la bande

vers 0810 tet il a trouvé un fort pile-up en provenance de NA.
Après une pause à 0822 pour établir un QSO avec NA1SS (la station ISS),
sur 2m, il est revenu à 0832.
La nouvelle mini-beverage avait un bon rendement ce qui a permis à Toni d'
arriver à 240 QSO de rag.
Tomi est revenu à 1630 et a ajouté 100 stations supplémentaires, avec un pic
d'Européens vers 1950.
Pendant toute la période de trafic, le bruit a été très bas. Malheureusement
quelques stations participant au concpurs polonais ont démarré avec de
fortes puissances à côté de notre fréquence avec des clicks très importants,
obligeant Tomi à changer de fréquence et passer sur 1823.5,, ce qui nous a quand
même aidé un peu.
Emettre près de la fréquence est normal, mais la polluer par des clicks dus
à un émetteur ou un amplificateur mal réglé est inadmissible. Ce n'est
pourtant pas difficile de surveiller la qualité de ses émissions.
Si vous pensez nous avoir ratés VK9m sur la Top Band à cause de ces
claquements faites le savoir à DL8SQ.
Peut être a t il besoin simplement de refaire les réglages de ses
émetteurs/ampli.
2)
6 avril 0200 utc :
Un log en ligne est maintenant disponible à :
http://www.vk9gmw.com/logsearch.html (http://www.vk9gmw.com/logsearch.html) .

Nous sommes passés en SSB.
Deux à trois heures de trafic sur ce mode désormais chaque jour.
Report trafic 160m ;
La bande a été très bruyante cette nuit, mais les signaux en provenance de
NA ont malgré tout été « comestibles » jusqu'aux alentours de 0930 malgré
quelques difficultés de copie dues à l'instabilité des signaux et au QSB.
Vers 1015 UTC la bonne surprise, les signaux sont remontés très fort et 200
QSO supplémentaires dans la fenêtre NA ont été ajoutés au log. Nous avons
ensuite fait QSY sur 80m à 1200 utc dans des conditions relativement
exceptionnelles. Lamini beverage fonctionne bien. Nous sommes restés sur cette bande
jusqu'à 1740 heur à laquelle nous sommes retournés sur 160, mais là le bruit
du à la foudre dépassait s9 sur la Pennant, que nous avions réorientée sur l'
Europe la veille.
Le bruit étai encore plus fort sur l'antenne d'émission. Jamais les signaux
en provenance d'Europe n'ont été très forts et clairs; nous avons pu mettre
dans le carnet de trafic malgré ce bruit, une centaine e stations.
Les signaux EU sont soudainement montés vers 1830. Un pic de réception un
peu moins important a été également observé vers 1910.
Pendant les périodes d'augmentation des signaux, nous avions de meilleures
conditions d'écoute sur l'antenne d'émission plutôt que sur l'antenne de
réception.
Il nous est difficile à cause des bruits de foudre de prendre les indicatifs
au premier coup, d'où perte de temps avec ceux qui ne l'annonce qu'une ou
deux fois.
Envoyez votre indicatif trois fois , nous eb avons besoin.

3) 6 avril, 2300 utc.

Nous sommes opérationnels en SSB.
Malheureusement le RTTY n’est pas possible car le PC dédié est trop humide.
(Tomi était tombé à l’eau avec le PC dans les bras).
Si nous arrivons à le sécher suffisamment et à le faire repartir, nous ferons de nouvelles tentative dans les jours prochains. Nous vous tiendrons informés.
Nous l’avons posé sur le groupe électrogène pour le mettre au chaud (mais hélas il n’est pas à l’abri des vibrations à cet endroit).
Report trafic bandes basses :
Très mauvaises conditions cette nuit et ce matin. Nous étions sur 160 à 0945 UTC. Bande très bruyantes et craquements de foudre , S7 et plus, craquements longs et plusieurs simultanés.
Stations NA faibles jusqu’à 1100 utc puis signaux de plus en plus forts mais instables et QSB. Nous soupçonnons des stations arrivant par différentes directions. La bonne période dure quelques 30mn puis les signaux s’ affaiblissent de nouveau.
On peut dire que la bonne saison 160 est en train de changer complètement.
On a quitté la bande vers 1230 avec 110 QSO supplémentaires. Notre QSY sur 80 m nous a permis de constater de forts signaux en provenance de NA et JA puis plus tard en provenance d’Europe ; le 40m avec l’EU est faible sauf en fin de matinée entre 1730 et 1830.
Nous sommes retournés sur 130 pour y retrouver de pauvres conditions : bruit , bruit et encore du bruit. Quelques EU ont pu passer malgré tout, vers 1910 avec une ouverture restreinte. La plupart des stations étaient des stations allemandes . Nous n’avons pas été aidé les dernières nuits par l’arrivée de signaux en provenance d’une balise pour la pêche, sur 1825.0 , avec un signal supérieur à S6. Le plus drôle était l’indicatif de cette balise : 2AHAM!

Procédure pour aider les QSO:
Les stations à qui nous avons répoondu correctement (Indicatif + 59(9), répondent avec QSL, ou R, ou CFM , ensuite 59(9) suivi del’indicatif. Ne jamais répondre avec l’indicatif en premier, et ne pas le répéter.
Si l’indicatif est correct s’en tenir à celà, cela évite des pertes de temps et l’opérateur à MR ne se posera pas de question.
Si l’indicatif renvoyé est incorrcet simplement renvoyer l’indicatif et ne confirmer qu’après réception de MR , de votre indicatif rectifié.

Faisant ainsi, nous pensons que ce sera mieux que d’enoyer trois fois son indicatif comme nous lavions précédemment demandé.
Ce matin nous avons du tant de fois répéter un indicatif avec une station qui n’envoyait que leson ^réfixe que nous vons finalement renoncé à la rentrer dans le log.

3B8FQ’s trip to St. Brandon Is., as 3B7FQ

?

Rachid, 3B8FQ, reports on his recent February trip to St. Brandon Island, operating as 3B7FQ.? All contacts were CW only, due to loud generator noise.? Operation was concentrated on 10MHz and 18MHz, with limited operations on 40 & 20M.? By the 10th day, the battery was not recharging properly, which resulted in reduced power and sending by hand key.? Although propagation and conditions were poor, 1,500 QSOs were made operating just a few hours each day, in between maintenance on the meteorological equipment on the island.

?

Color QSLs have been printed and are being mailed this week.? QSL all of Rachid’s operations (3B7FQ, 3B6FQ, 3B8FQ, and his upcoming July trip to 3B9FQ) via K5XK.? Some QSL databases are not correct, since Ron moved to a new QTH last summer.? This address is correct, and it is also OK on QRZ.com :

8434. Heavy storm on Mellish

Heavy storm on Mellish (04-09-2009 from AA7JV)

Apr 9, 0000 UTC, Mellish Reef. We did recover the computer that went overboard. It is working and we are fully back in business. Still don't know about RTTY, however. We endured an intense storm last night with winds gusting over 80 km/h. Rain was occasionally very heavy. We had to stop operating several times to strengthen the tent. There seems to big demand for 20 m SSB, which we will do some of today.

Low Band Report: 160 meters was poor last night, and the weather worse. Occasionally we could hear that a lot of NA stations were calling, but it was impossible to pick out individual calls because of the rapid QSB. Again, many stations were sending their calls only once or twice, making them impossible to piece together. We QSY-d to 80 at 0930 where conditions were fluctuating; at times the band sounded like 160, other times it was reasonable. We returned to 160 around 2000, where conditions gotten even worse. Additionally, the storm was shaking the tent and causing the tarps to flap very loudly. It was impossible to hear the few weak signals that managed to get above the noise. We went back to 80 but were interrupted several times by the storm threatening to blow down the tent. We had to add some tie-downs, etc. Altogether, not a great night!

We believe there is a need to clarify the focus of this operation. As stated from the outset, our focus is low bands: 160, 80 and 40, in that order. We work the other bands during the day because the low bands are closed (and Tomi loves it!). There have been a lot of complaints about our low band (and CW) focus, including comments that "this is no way to run a DXpedition". The way we see it is that many large DXpeditions do a great job of working the high bands, SSB and digital modes. There is a very good chance that one will be on Mellish Reef soon. These operations, however, with a few exceptions, do not generate a lot of 160 m QSO-s. We specialize in low band operations. We bring 160 meter antennas, RX antennas, pre-amplifiers, etc. We come with a lot of patience and the willingness to endure pain. We put up with low QSO rates and seem to have a desire to spend hour listening to entropy. Stuff that most DXpeditions, and their operators, prefer not to do. We aim at giving out as many 160 m (and 80m) QSO-s as we can. Everything else is cream!

Announcing the 2009 dxpedition!

The Papua New Guinea IOTA dxpeditions for G3KHZ started in 2005 when Normanby Island in the D'Entrecasteaux group OC-116 was activated. This was a trip with my XYL Joyce when we lived with the locals for 10 days in Saidawai village in Sewa Bay (website (http://www.425dxn.org/dxped/p29ni/)).

Since then, each year, a group of us has visited other "rare" PNG IOTAs. In 2007 we activated two new ones, Taku'u Atoll OC-283 and Nukumanu Atoll OC-284 (website (http://www.425dxn.org/dxped/p29_2007/)). In total we have activated the following IOTAs:

OC-041 Ninigo group (Luf Island, Hermits)
OC-115 Trobriand group (Kiriwiana)
OC-116 D'Entrecasteaux group (Normanby)

OC-153 PNG Coastal Islands, South (Daru)
OC-181 Witu Islands (Witu)
[the locals call the group Garove]
OC-256 Kilinailau
OC-283 Taku'u
OC-284 Nukumanu

And this year (2009) we plan to go to:

==========

09/04/2009: Piotr/SP2JMR and Slavo/SP2JMB will be active as 3B8/homecalls from Mauritius Island (AF-049, WLOTA 0595) April 9-17th. They plan to operate SSB and CW on all bands. QSL via home calls. [425 DX News]

09/04/2009: Augusto HB9TZA/I2JJR obtained his visitor callsign 9H3JR for his next stay in Bugibba, St. Paul's Bay, Malta (EU-023, WLOTA 1113, WW Loc. JM75EW), from April 9-14th. It will only be a short stay there, and he will operate holday style having his XYL with him. Augusto will look for some more detail about lighthouses or what else may be able to activate from there. He will use IC7k, AH4, and FT817, with some wire, hardware, and a fishing rod; so he will be able to put up a long wire or dipole or vertical and operate HF to 6m. QSL via I2JJR, direct or Bureau. [I2JJR]

09/04/2009: Operators Steffi/ON3AEO, Filip/ON4AEO, Jose/ON4CJK, Kath/ON7BK, Adele/ZR6APT, Deon/ZS6ABR, Lucas/ZS6ACT, Sid/ZS6AYC and Gert/ZS6GC will be active from Mozambique using the callsign C91FC from April 9-13th. QRV 80-10 meters using SSB, RTTY, PSK and CW. QSL via ON4CJK, direct or Bureau. Further information can be found at: www.c91fc.be/ [NG3K]

09/04/2009: Anne, OH2YL will be active as OH0/OH2YL from the Aland Islands (EU-002) from April 9-14th. QRV all HF bands using CW and SSB. QSL via home call, direct (Anne Lähdes, Ullantorppa 11 A 15, Espoo, 02750, Finland) or Bureau. [NG3K]

09/04/2009: Ben, DO1BEN will be active from Lolland Island (EU-029, DIA SJ-015) as OZ/homecall from April 9-17th. QRV on all HF bands, using SSB and somtimes digital modes. Location is 5 meters from the Baltic Sea. QSL via home call, Bureau or direct. [rsgbiota.org]

09/04/2009: Retu, XU7MDY will be active from Shinanoukville, Cambodia, between April 9th and 21st. QRV 80-10m using CW, SSB and Digital modes. QSL via the information at QRZ.com. [NG3K]

10/04/2009: Operators Jorge/OA4BHY, Marco/CE6TBN, Zoli/HA1AG, Daniel/DL5YWM and Rene/DL2JRM will be active from La Leona Island, Peru, as 4T6I from April 10-13th. QRV all HF bands SSB/CW with 2 stations. QSL via DL2JRM, direct or Bureau. [rsgbiota.org]

11/04/2009: Bruno/ON7ZB and François/F5JNE will be active April 11th as F/ON7ZB/P from the Mill of Marsigny (DMF 89-040), in the city of Champs sur Yonne (CP 89290), Department Yonne/89 and Province Burgundy (DPF 05). QRV starting around 0600 UTC on 80m and 40m, CW/SSB. Folowwing this activation they try to reactivate the Bellombre Castle (DFCF 89-067), in the city of Escolives Sainte Camille (CP 89290). QSL these two activations via ON7ZB, direct or Bureau. [F5NQL]

11/04/2009: Karel/OK1TIR and Jirka/OK2SJI will be active from two castles for Czech Castles Award (CCA) on April 11th. Karel, OK1TIR/p QRV from Castle Vargac (CCA ST-294, WW Loc.

JN79CS), on 80, 40 and 20m SSB. Jirka, OK2SJI/p QRV from Castle Nové Hrady (CCA PA-046, WW Loc. JN89BU). QSL both stations via their home calls, direct or Bureau. [RN1CW]

11/04/2009: Operators RZ1CWC (COTA-RU-Team) and Oleg UA1CEI and Anton UA1CER will be active April 11th from Fort Krasnaya Gorka (WCA/COTA F-109, RDA LO-30) using the callsign UE1CDX. QSL via RN1CW, Bureau or direct. [RN1CW]

12/04/2009: Once again Zik, VE3ZIK will be active from Bilice (Croatian coast) as 9A/VE3ZIK from April 12-21st. Also one day activity to IOTA: Ugljan Island (ACIA 339, CIA-53, IOCA CI-134, MIA MC-441) as well as Pasman Island (EU-170, ACIA 348, CIA-34, IOCA CI-085, MIA MC-291), only 20 and 40m band, CW and SSB. QSL via DO7ZZ, Bureau 100%. LoTW and eQSL is also ok. He really prefers paper QSL cards :) [NG3K]

12/04/2009: Tony/E21IZC and Kamroon/HS7UCQ will activate Lipe Island (AS-126) as E21IZC/p from April 12-13th. QRV 40m and 20m using CW and SSB, around the usual island and IOTA frequencies. QSL via E21IZC (QRZ.com). [rsgbiota.org]

12/04/2009: An international team composed by Juanjo/EA1CJ, Agustin/EA1KY, Roberto/EA2RY, Gerard/EA3EXV, Antonio/EA5RM, Manuel/EA7AJR, Bernard/F9IE, Fabrizio/IN3ZNR, Valery/UT7CR and Dimitri/UY7CW will be on the air from Tifariti, Western Sahara, from April 12-17th using the callsign S04R. QRV 160-10m (include WARC bands) using CW, SSB and RTTY with at least 3 stations at the same time in different bands and modes. QSL via EA5RM, direct or Bureau. Further information can be found on their website at: www.dxfriends.com/s04r/ [F5NQL]

15/04/2009: Operators Siggi/DL3HBZ, Uli/DJ9IE, Helge/DF6LPC, Lothar/DL8HAL and Harry/DL5HAQ will be active as from Hooge Island (EU-042, N-22 for the German Islands Award) as DK0RZ from April 15-17th. QRV all bands and modes, propagation permitting. QSL via the DARC Bureau. [rsgbiota.org]

17/04/2009: Operators Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM plan to activate Isla San Jose, Murcielago Islands (NA-191), Guanacaste Province, Costa Rica, as TI7XXX from April 17-20th. Note: TI7XXX is not the real callsign, that will be announced later. They plan to operate around the clock on 160-10 meters, using SSB, CW, RTTY and PSK31. QSL via DK6AO, direct or Bureau. No eQSL!. Further information will be available at: www.ti7.info/ [rsgbiota.org]

LOOKING AHEAD -

18/04/2009: The Algarve STAR DX Team will activate Doca Olhao (Parsena Olhao) West Lighthouse (ARLHS POR-129, DFFA Fa-32 for the Algarve Lighthouse Award) on Amateur Radio Day, April 18th, between 0700 and 1300 UTC. Callsign will be announced later. All information will be online at: algarvedx.com/ [Algarve S.T.A.R. DX Team]

18/04/2009: The Adventure Radio Group of the Michiana Amateur Radio Club (W9AB) will activate Monkey Island (Not IOTA, USi IN-005R), located in the St. Joseph River in Mishawaka (St. Joseph County, WW Loc. EN61WQ), Indianna, on April 18th from 1400-1700z. Frequencies at/near 7.030, 7.225, 14.060, 14.225 MHz. QSL with SASE to W9AB, 3220 E Jefferson Blvd., South Bend, IN 46615-3028 U.S.A. [USi]

19/04/2009: The Amateur Radio Club UBA-LGE Liège, ON5VL will be active April 19th (0800-1200 UTC) as ON5VL/p from the Castle of Hollogne (BCA LG-67, for the Belgium Castles Award). QRV 80 and 40 meters, mainly SSB. QSL via the Bureau to ON5VL; via direct to ON5PO

(QRZ.com). [UBA HF News]

21/04/2009: JH1AWN (JT1AWN), JA7AGO (JT1AGO) JA7LU (JT1LU) and JA7ZP (JT1ZP) will be active from Ulaanbaatar, Mongolia, between April 21st and 28th. They will be active from two places - one is a radio room of JT1KAA and the other is the Amure Hotel. QRV 80-6m, possibly 160m (depending on their location), using CW, SSB, RTTY and PSK31. QSL via home calls, direct or Bureau. [JA1ELY]

24/04/2009: Kasimir, DL2SBY, will be active from Liechtenstein between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Equipment will be a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir will use two separate callsigns for this operation. For the HF bands, he will use HB0/DL2SBY and for the EME activity will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

24/04/2009: Jim, MM0BQI will be active as homecall/p from Lunga Island in the Treshnish Isles (EU-108, IOSA NH17, SCOTIA DI09) April 24-27th. Look for activity on or near the usual IOTA frequencies. QSL via home call, direct or Bureau. [rsgbiota.org]

25/04/2009: Bob, VK0BP will be active from Davis Base (WABA VK-03, WAP AUS-03, IOTA AN-016), Antarctica, using the special callsign AX0BP on April 25th to celebrate ANZAC Day. He is able to use this callsign from midnight 'til midnight local time (Davis is UTC +7). Bob will not be operating for the full 24 hours, but will do his very best to operate as long as possible that day. As an Australian operator they can use the AX prefix just 3 times per year, Australia Day which he has already done, ANZAC Day coming up in a couple of weeks, and then the last opportunity for Bob to use the AX0BP callsign whilst he is down there will be on World Telecommunications Day (17th May) - at this stage he hopes to use it again then too. QSL via VK2CA direct only - 2US and SAE preferred. [VK0BP]

25/04/2009: Saturday, April 25th marks the 135th anniversary of the birth of Marconi. To mark the occasion the Cornish Radio Amateur Club will be holding its 22nd annual International Marconi Day event and many stations with historic connections with Marconi will be active on that date. This is not a contest but several classes of awards are available for making QSOs with the special Award Stations. There are also SWL awards to be claimed. Ireland's Howth Martello Radio Group EI0MAR is an Award Station and will be QRV during the event from the vintage radio museum in Howth. This is a twenty-four hour event but EI0MAR will concentrate activities from 9am until 5pm local time, and visitors will be welcome during those hours. To coincide with the special event, the North Dublin Radio Club will hold its weekly meeting at the same QTH from 8pm the same evening. EI0MAR's web site is www.ei0mar.org/. For more information about the event including a listing of award stations visit www.gb4imd.org.uk/. [Southgate ARC]

29/04/2009: Look for special event station 8J6DON to be active from April 29th to May 5th to celebrate the Hakata "Dontaku" Port Festival, Fukuoka City, Fukuoka Prefecture, Kyushu (AS-077, JIIA AS-077-001), Japan. (The word Dontaku comes from the Dutch word Zontag, meaning holiday.) Expect activity on all bands/modes. QSL via the JARL Bureau. [JJ1WTL/AC6IM]

01/05/2009: Ray/G3KOJ with XYL Penny will be on holiday in Perth, Western Australia, for the entire month of May. Ray has applied and got the callsign VK6XRM. The XRM part of the call is Ex-Royal Marines as he retired from the Royal Marines Commando way back in 1975 after 22 years and 9 months service. Ray will be operating from the QTH of Alan VK6PG,

located in Noranda, and meeting all the RSARS boys out there in VK6 land for BBQ's. Penny and Ray will be travelling around WA with Colin and Carol VK6BQ who will take an HF rig and wire antenna so we may get on from some strange places. QSL via home call, direct or RNARS or RSARS or RSGB Bureaus. [G3KOJ]

02/05/2009: Within the framework of European 'Leader' project for the promotion of country, organizes the amateur radio enthusiasts of Zevergem, a municipality of the Pinte, on 2 and 3 May 2009 a special event in the rural core of Zevergem, with clear offer to activities: ON769MS QRV op HF/VHF in SSB, CW, digital modes, SSTV, ATV, DATV; a radio search for young and old; communication with satellites and the ISS space station; passing through demonstrations and information around radio amateurism; particular QSL card. CQ News: Update on Italian earthquake response;

CQ Public Service Editor Bob Josuweit, WA3PZO, relays the following update from Greg Mossop, G0DUB, the International Amateur Radio Union's Emergency Communications Coordinator for Region 1 (Europe and Africa):

The 7045 kHz frequency is in use linking local rescue and coordination centres with Protezione Civile in Rome. Cell phone capacity in the are is being increased and a second wave of volunteers and workers are being prepared to go to the area to take over from the first responders.

The request to keep 7045 clear remains active and now more important that a formal net seems to exist.

DARC (Germany's national amateur radio organization) has pointed me to the following YouTube link showing the local amateurs at work in the area:

http://www.youtube.com/watch?v=tq8JLqf5_Bo

There are now 7000 volunteers involved in the response and the reported frequencies for activity locally are:

* R4 CH-145.700 Prefettura di Pescara
* RU 8 CH- 430.800 " "
* R1 AQ -145.625 Coordinamento

* HF 7.045 Headquarter in Roma of Protezione Civile

Other frequencies are being used inside the groups of volunteers as you can see from the many VHF frequencies shown on the Youtube footage. [CQ Newsletter]

Heavy storm on Mellish (04-09-2009 from AA7JV)

Apr 9, 0000 UTC, Mellish Reef. We did recover the computer that went overboard. It is working and we are fully back in business. Still don't know about RTTY, however. We endured an intense storm last night with winds gusting over 80 km/h. Rain was occasionally very heavy. We had to stop operating several times to strengthen the tent. There seems to big demand for 20 m SSB, which we will do some of today.

Low Band Report: 160 meters was poor last night, and the weather worse. Occasionally we could hear that a lot of NA stations were calling, but it was impossible to pick out individual calls because of the rapid QSB. Again, many stations were sending their calls only once or twice, making them impossible to piece together. We QSY-d to 80 at 0930 where conditions were fluctuating; at times the band sounded like 160, other times it was reasonable. We returned to 160 around 2000, where conditions gotten even worse. Additionally, the storm was shaking the tent and causing the tarps to flap very loudly. It was impossible to hear the few weak signals that managed to get above the noise. We went back to 80 but were interrupted several times by the storm threatening to blow down the tent. We had to add some tie-downs, etc. Altogether, not a great night!

We believe there is a need to clarify the focus of this operation. As stated from the outset, our focus is low bands: 160, 80 and 40, in that order. We work the other bands during the day because the low bands are closed (and Tomi loves it!). There have been a lot of complaints about our low band (and CW) focus, including comments that "this is no way to run a DXpedition". The way we see it is that many large DXpeditions do a great job of working the high bands, SSB and digital modes. There is a very good chance that one will be on Mellish Reef soon. These operations, however, with a few exceptions, do not generate a lot of 160 m QSO-s. We specialize in low band operations. We bring 160 meter antennas, RX antennas, pre-amplifiers, etc. We come with a lot of patience and the willingness to endure pain. We put up with low QSO rates and seem to have a desire to spend hour listening to entropy. Stuff that most DXpeditions, and their operators, prefer not to do. We aim at giving out as many 160 m (and 80m) QSO-s as we can. Everything else is cream!

Tanga Island OC-102 P29VCX QSL via SM6CVX
Green Island OC-231 P29VLR QSL via SM6CVX
Woodlark Island OC-205 P29NI QSL via G3KHZ

The Papua New Guinea IOTA dxpeditions for G3KHZ started in 2005 when Normanby Island in the D'Entrecasteaux group OC-116 was activated. This was a trip with my XYL Joyce when we lived with the locals for 10 days in Saidawai village in Sewa Bay (website).

Since then, each year, a group of us has visited other "rare" PNG IOTAs. In 2007 we activated two new ones, Taku'u Atoll OC-283 and Nukumanu Atoll OC-284 (website). In total we have activated the following IOTAs:

OC-041 Ninigo group (Luf Island, Hermits)
OC-115 Trobriand group (Kiriwiana)
OC-116 D'Entrecasteaux group (Normanby)
OC-153 PNG Coastal Islands, South (Daru)
OC-181 Witu Islands (Witu)
[the locals call the group Garove]
OC-256 Kilinailau
OC-283 Taku□u
OC-284 Nukumanu

And this year (2009) we plan to go to:

OC-102 Tanga
OC-205 Woodlark
OC-231 Green

8437. NEW DATA FILES AND REPORTS UPLOADED TO WEB

Yahoo group: GOLIST (2007 — 2010)
Date: 2009-04-09 19:33:18 UTC
From: K1XN
Topic: 5889 Message: 8437

The APRIL 2009 Issue #904-B files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? I have
started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections
to me for the Rejected project in GoWin. This Rejected list is also
now in the weekly data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

8438. QRT Planned for Sunday (04-10-2009 from AA7JV

QRT Planned for Sunday (04-10-2009 from AA7JV)

Apr 10, 0000 UTC, Mellish Reef. The weather has improved some: we can now actually hear things in the tent. We have given up on RTTY, it is just too much for such a small team, and we are very busy with the pile-ups as is. Apologies to the RTTY ops. It appears that the weather-break for Tue-Thursday is holding. Therefore we are planning to tear-down the station on Monday, which means we will likely go QRT on Sunday, Apr 22 around 2000 UTC (just after we are done with 160).

Low Band Report: One can feel the change in the seasons. It could be said that 80 is now the new 160. TB was certainly difficult last night, both to NA, and later, to EU. Noise was high and signals were weak. We could hear many stations calling but they were mostly impossible to copy in rapid QSB: signals were just strong enough to keep us trying on 160 but not enough for QSO-s! 80 was better, like 160 on a good night. Tonight we intend to start on 80 at 2000 to give the East Coast a chance.

My friends
Received to day forwarded by Ottavio, IK1PML
It’s with a deep sadness we have to inform you of the passing of the two daughters of IK6SNR Lucio Antonini # 241-MS Controguerra (TE).
By the victims of this terrible cataclysm, we count Genny, 24yo and Giusy, 22yo, who have been found under the ruins on Apr 7th in the evening, after two days of exhausting searches .
Our deep sadness is that of all our section members. We would insure gianni and all the other victims of this disaster of all our solidarity.
The State funeral service for Genny and Giusi is celebrated at this moment, in All’Aquila, and also for 285 other victims, in the presence of the Italian Higher authorities Civilian , Military and Religious .
Three days of National bereavment have been decided by the Italian President and Prime Minister.

The Religious funeral services will be celebrated to morrow, on Easter eve.

Private funerals for Genny and Giusi Antonini will be celebrated in Controguerra.
Sympathy messages to Lucio and his family can by sent by telegram, snail mail or e-mail to :
Lucio Antonini
Le S. Biagio, 11
Controguerra 64010 (TE)

Mes amis
Reçu ce jour retransmis par Ottavio, IK1PML.
C’est avec une grande et profonde tristesse que nous informons tous nos membres
du malheur arrivé dans la famille de l'un de nos affiliés.

Le terrible tremblement de terre qui s'est produit dans les Abruzzes compte parmi ses victimes les deux filles d’IK6SNR Lucio Antonini # 241-MS Controguerra (TE).

Les corps de deux jeunes filles, Genny et Giusy , 24 ans et 22 ans ont été
extraits des décombres dans la soirée du mardi, 7 avril, après deux jours de recherches épuisantes.

Cette profonde douleur affecte l'ensemble de l'association, qui exprime ses condoléances à la famille de Lucio et sa solidarité avec toutes les victimes du tremblement de terre.

Les corps des deux sœurs reçoivent des funérailles d'État prévue à
All'Aquila en ce moment, vendredi 10 avril, avec 285 autres victimes.
Samedi, seront célébrées les obsèques religieuses.
L’inhumation privée des deux filles de Lucio, auront lieu à Controguerra .
Trois jours de deuil national ont été décrétés par la Présidence de la
République et du Conseil.
Tous ceux qui souhaitent exprimer leur sympathie et solidarité avec la
famille de Lucius, peuvent envoyer télégrammes, lettres ou e-mail à :
Lucio Antonini

A tutti i nostri amici
Ottavio IK1PLM , ha ritrasmesso il seguente messaggio
E' con grande e profondo dolore che informiamo tutti i nostri soci della
disgrazia occorsa nella famiglia di un nostro socio.

Il terribile sisma avvenuto in Abruzzo conta tra le sue vittime le due
figlie di Antonini Lucio IK6SNR #241-SM di Controguerra (TE).
I corpi delle due ragazze, Genny 24 anni e Giusy 22 anni sono stati
estratti dalle macerie nella serata di martedì 7 Aprile dopo due giorni di
ricerche estenuanti.
E' un dolore profondo che colpisce l'intera associazione che esprime il
cordoglio alla famiglia del caro Lucio e la solidarietà a tutte le vittime
del terremoto.
Le salme delle due sorelle riceveranno i funerali di Stato previsti
all'Aquila per venerdì 10 Aprile insieme alle altre 285 vittime, poi faranno
ritorno a Controguerra (3 giorni di lutto cittadino), dove sabato si terrà la
celebrazione della funzione religiosa.
Tutti coloro che volessero esprimere la propria vicinanza e solidarietà
alla famiglia di Lucio, possono inviare telegrammi e lettere al seguente
indirizzo:

Hi friends
CORSICA – TK by Italian hams – update –
Gabriele, IZ5FDD and Alessandro, IW5ELA will sign TK/HC between May 20 to 24.
They will stay in the city of Lumio (Lumiu), near Calvi,
They plan to be active from 40m to 10m in SSB and CW.
Unfortunately, the 6 meters scheduled activity is cancelled for the use of this band is strictly forbidden in Corsica main Island and other TK Iota's.
Corsican References for awards :

Submitter's e-mail: anquilan@...
Callsign(s): s21ugz
DXCC entity: Bangladesh
QSL route: du1ugz
Operators: S21UGZ

Notes: Ramon, DU1UGZ, will be operating as S21UGZ in Dhaka City, Bangladesh from 12 April to 20 June 2009 his work schedule permitting. He is using a low band dipole now so emphasis will be on 40/80 SSB and RTTY. From May until June he will be using a beam for 10, 12, 15, 17 and 20 meters. Hopefully a linear will be used starting May as well.
Tks Bill/NG3K

MOROCCO – MOGADOR Island:
After the terrible earthquake in Abruzzo - center Italy on 6th April, we decided that all surplus funds received will be assigned to the many people in that region who are suffering the effects of the eartquake. WeM will use official channels to send the money and we will publish on these pages a paper certifying the donation.
So we invite you, if you like and you can, to send any possible amount of

money, that will be assigned to the earthquake victims.

I.C.P.O. (Islands, Castles & Portable Operations)
UPDATE -
==========

11/04/2009: Bruno/ON7ZB and François/F5JNE will be active April 11th as F/ON7ZB/P from the Mill of Marsigny (DMF 89-040), in the city of Champs sur Yonne (CP 89290), Department Yonne/89 and Province Burgundy (DPF 05). QRV starting around 0600 UTC on 80m and 40m, CW/SSB. Folowwing this activation they try to reactivate the Bellombre Castle (DFCF 89-067), in the city of Escolives Sainte Camille (CP 89290). QSL these two activations via ON7ZB, direct or Bureau. [F5NQL]

11/04/2009: Karel/OK1TIR and Jirka/OK2SJI will be active from two castles for Czech Castles Award (CCA) on April 11th. Karel, OK1TIR/p QRV from Castle Vargac (CCA ST-294, WW Loc. JN79CS), on 80, 40 and 20m SSB. Jirka, OK2SJI/p QRV from Castle Nové Hrady (CCA PA-046, WW Loc. JN89BU). QSL both stations via their home calls, direct or Bureau. [RN1CW]

11/04/2009: Operators RZ1CWC (COTA-RU-Team) and Oleg UA1CEI and Anton UA1CER will be active April 11th from Fort Krasnaya Gorka (WCA/COTA F-109, RDA LO-30) using the callsign UE1CDX. QSL via RN1CW, Bureau or direct. [RN1CW]

12/04/2009: Ramon, DU1UGZ will be operating as S21UGZ in Dhaka City, Bangladesh, from April 12th to June 20th, his work schedule permitting. He is using a low band dipole now so emphasis will be on 40/80m SSB and RTTY. From May until June he will be using a beam for 10, 12, 15, 17 and 20 meters. Hopefully a linear will be used starting May as well. QSL direct to DU1UGZ. [NG3K]

COMMEMORATIVE T-SHIRT

In the next couple of days there will be a special commemorative Icom T-shirt with VK9LA and all ops listed on it available to bid on. Go to www.odxg.org/vk9la.htm follow the prompt to the shirt and place your bid.

Basically you will submit ur bid and I will update the high bid each day on the web site..... in saying all that the high bidder at a specified time will purchase the shirt providing the reserve price has been met. Once funds have been paid it will be sent to the postal address of the winner at no cost.

The money raised from this shirt will be used to repair equipment that failed whilst we were on the island..... yes we have some stuff to fix including a AL811H and some antennae.

regards to all
Bill Horner, VK4FW

Some antennas destroyed, Last day of operation (04-12-2009 from AA7JV)

Apr 12, 0200 UTC, Mellish Reef. Yet another storm: this one almost knocked down the tent last night. We had to cannibalize parts of the beverage to shore up the tent again. Strangely, this 95 meters long mini-beverage, which is now mostly on the ground, with its far end grounding gone, and parts of its counter-poise missing (birds), continues to function well. It is a decent RX antenna on 160, and a very good RX antenna to NA on the higher bands, especially on 30 and 20 meters. The pennant is long gone: mostly blown away by the winds, just some shreaded bamboo fragments and wires remaining on the ground.

This is our last day operating from Mellish Reef. We are trying to remove non-essential equipment from the island today, but frequent heavy rains are hampering us. We have also cleaned the bottom of the boat for the trip home. After three weeks in these warm tropical waters, the growth on the boat's bottom was impressive and would have slowed us down substantially. We intend to operate all day today and all night, until sunrise at around 2000 UTC (Apr 12). We will spend the day tomorrow tearing down the station, disassembling (more like cutting up) the tent and removing all equipment, materials and trash from the island. We intend to have all gear on board by the evening; ready to sail at first light.

Low Band Report: Conditions on 160 continue to be poor. Additionally, last night's storm also brought a lot of lightning that added to the noise. While 160 meters has been poor, 80 meters continues to perform well. As mentioned earlier, the now severely reduced mini-beverage continues to be our main RX antenna on 160 and 80 meters, as the noise and lightning crashes make the TX antenna almost useless for receiving. This must be compared to our second night here - the first night we were not on 160 - only two weeks ago, when we only had the TX antenna to listen on and still made 400 QSO-s in one night on 160. Conditions, and the demand, have certainly deteriorated. Still, we have almost 2000 QSO-s on TB and we are happy!

I have been trying unsuccessfully to get a QSL for my CW contact with T32BE. My information suggests that WC5P is the manager.

In August 2006 I sent a card with SASE (US postage stamps included) to WC5P and nothing. Early this month I emailed WC5P to see if he was still the manager and so far no reply.

Does anyone have an updated QSL route for T32BE (November 1995 QSO)??

Thanks,

Maybe you can try to get in contact with the other two operators.
Probably one of them can help.

T32 - EASTERN KIRIBATI Paul, T32BE (WC5P), Bob, T32BO (N5RG), and Lee, T32PO (N5PO), were announced to be on the air from Christmas Island (OC-024) in SSB/CW on 10-160m from Nov 24-29. During the WWDX CW Contest they will use the call T32PO. QSLs via homecalls.

With immediate effect, I have been appointed the QSL manager for GI5K and MI0LLL.? I will shortly be adding a log search page for each callsign to my web site www.g3swh.org.uk (http://www.g3swh.org.uk/)? I am also arranging for any unanswered, direct QSL requests to be forwarded to me by Chris and for the RSGB QSL bureau sub-manager to forward cards directly to me.

The APRIL 2009 Issue #904-C files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? I have
started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections
to me for the Rejected project in GoWin. This Rejected list is also
now in the weekly data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

SPECIAL EVENTS -

ORIGINAL 13 COLONIES INDEPENDENCE DAY SPECIAL EVENT
http://home.comcast.net/~dzabawa/ThirteenColonies.htm
July 1st-4th 2009
NY (K2A)-NJ (K2I)-RI (K2C)-GA (K2G)-PA (K2M)-NH (K2K)-SC (K2L)-VA (K2B)-CT (K2D)-DE (K2E)-MD (K2F)-MA (K2H)-NC (K2J) 1300 UTC July 1st to 0400 UTC July 5th 2009, all thirteen 1776 original colonies will be on the air. One S.E. station per Colony state. A full color certificate

printed on heavy card stock or parchment paper, with a map and the state flags of all the 1776 colony states will be available to to each station who works one or more or ALL of the Special Event stations. Each colony state worked will be marked by the shield of the United States by each state flag. Special event call signs will be used.
All bands will be in play except 60M and the WARC bands. The Colony stations will be operating on or near the "13" of each band (Eg.14.213, 14.313, 7.213, et.). 2 meter and 6 meter simplex is encouraged. For this event 2 meter repeater contacts WILL be allowed - WHY? because all of the SE stations are on the east coast and are very close to each other. It will be harder for these states to contact each other, also 40m-160m is encouraged because of this.

16/04/2009: Eleven special event stations will be active from Poland between April 16-19th to commemorate the World Amateur Radio Day (April 18th): 3Z0WARD, 3Z2009WARD, HF2009WARD, HF84WARD, HF9WARD, SN0WARD, SN2009WARD, SP0WARD, SP2009WARD, SQ0WARD and SQ2009WARD. eQSL cards will be available for printing, along with further information at: www.ward.pzk.pl/ . Paper QSL - via SP2FAP. [425 DX News]

17/04/2009: The Radio Club of Gardermoen will be active as LN2G for the Norsk Hammeeting 2009 (www.hammeeting.no/) that will take place at LETO-hallen in Eidsvoll, Norway, April 17-19th. Expect main activity on 20 and 40 meter SSB, RTTY and PSK31. QSL via LA2G, direct or Bureau. [425 DX News]

17/04/2009: The Lakehead Amateur Radio Club (VE3FW) is celebrating its 75th Anniversary on April 17, 2009. In honour of this event, the club is setting up special event station VC3FW, operating on or near 3.875, 7.275, 14.275 and 21.375 MHz. Look for digital modes lower in the band and on CQ100 on 14.275 kHz. QSL to LARC, 1100 Memorial Ave., Suite 184, Thunder Bay, ON Canada, P7B 4A3. For more info, please see: www.larclub.net/ [VE3XT]

18/04/2009: In celebration of World Amateur Radio Day (April 18th) members of the Emirates Amateur Radio Society (A62ER) will be active with special call A60WARD. QSL via IZ8CLM, direct or Bureau. [DX World of Ham Radio]

18/04/2009: GB2LRS will be on the air April 18th, run by Loughton Radio Society in Essex (WAB: TQ59, WW Loc. JO01CQ, IOTA EU-005, WLOTA 1841). QSL direct to G0TOC, or via the RSGB QSL bureau. [GB2RS]

19/04/2009: Celebrating the 141st anniversary of the birth of Paul P. Harris, the founder of Rotary International, Rotary Club "Siracusa Monti Climiti" (Sicily) will be active on 20, 15 and 40 meters as IO9ROTA between April 19th and May 19th. The operator will be Adriano, IT9CCB.

22/04/2009: Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will be active as TC57A once again from the Canakkale Gelibolu battegrounds to remember the 57th Regiment Martyrs between April 22-27th. Activity will be on the HF bands. For more info,

U.S. COUNTY HUNTING - USA-CA

K7DM - Don - 1* - April 16 to April 21 - CW Only
I'll be driving to Napa, CA from Grays Harbor County, WA beginning on
Thursday, April 16. Primarily CW (20, 40, and 17) with SSB on request. I
only run when my XYL is driving, so I won't be able to run all the
counties listed unless someone really needs it. I may be able to find
time to run Napa over the weekend.
Thursday, April 16 - Washington: Grays Harbor, Thurston, Lewis, Cowlitz,
Clark. Oregon: Multnomah, Clackamas, Marion, Linn, Lane, Douglas,
Josephine, Jackson. California: Siskiyou.
Friday, April 17 - California: Siskiyou, Shasta, Tehama, Glenn, Colusa,
Yolo, Solano, Napa.
Monday, April 20 - California: Napa, Sonoma, Mendocino, Humboldt, Del
Norte. Oregon: Curry.
Tuesday, April 21 - Oregon: Curry, Coos, Douglas, Lane, Lincoln,
Tillamook, Clatsop. Washington: Pacific, Grays Harbor. QSL via home
call. Send email requests to k7dm[at]q[dot]com [County Hunter Web]

K8MR - Jim - April 18, 2009 to April 18, 2009 - SSB and CW
I'll be headed to Michigan for the Michigan QSO Party on Saturday, April
18, 1600z to 0400z April 19. Planned counties in order: Lapeer, Sanilac,
Huron, Tuscola, Saginaw, Bay, Arenac, Ogemaw, Iosco, Alcona, Oscoda,
Montmorency, Alpena, Presque Isle, Cheboygan, Emmet, Charlevoix, Antrim,
Crawford, Roscommon, Missaukee. Depending on the time there may be a few
more as I head south from there. Full MiQP info is at www.miqp.org/.

RAC Ontario North/East Director Bill Unger VE3XT

New RAC representative on the ARRL Contest Advisory Committee.

April 14, 2009

After more than ten years as RAC's representative on the ARRL Contest Advisory Committee, David Shipman, VE7CFD, has asked to be replaced.

RAC has then chosen Sam Ferris, VE5SF, to replace David. The ARRL has already been advised of our choice and Sam is already starting his work.

Radio Amateurs of Canada wants to thank Dave, VE7CFD, for the many years he has served the Amateurs of Canada by being on this important committee. We also wish Sam, VE5SF, all the best in his work.

K4E - Special Event Emergency Communications Exercise in Summerville, SC, Dorchester County, Grid locater EM93, on April 21 and 22 2009.

When not passing event traffic, K4E will be available for QSOs on 80m thru 15m and 2m FM. QSL via W4NSC.

K4E will be manned from noon EDT (1600Z) on 21 April through 18:00 EDT (2200z) on 22 April.

This training exercise is to demonstrate the cooperation needed between the firemen, policemen, hospital workers, hams, and other public service personnel through out SC in time of an emergency.

South Carolina is prone to hurricanes and it has been determined that a major earthquake occurring in the greater Charleston, SC area would divide the area into 18 "islands" due to damage to infrastructure such as bridges and roads. Each of these "islands" is equipped with a structure containing various emergency supplies and Amateur radio equipment and antennas. Each POD has a generator and is environmentally controlled. This exercise is a test of one of those "islands.

Indicatif K4E :
Fréquences : 80m à 15m et 2m FM. QSL via W4NSC.

Trafic amateur en dehors du trafic d'urgence.
Entraînement destiné à tester la coopération nécessaire entre Pompiers,
Police, Services Hospitaliers, Radioamateurs et autres Services Publics à
travers la Caroline du Sud, en cas d'urgence.

La Caroline du Sud souffre de fréquents ouragans et les scientifiques ont
déterminé la zone du Grand Charlotte, comme celle la plus sujette à de
probables tremblements de terre d'importance. La zone a été divisée en 18 «
ilots » en raisons des dommages aux infrastructures susceptibles d'affecter
notamment ponts et routes. Chaque « îlot" s'est vu affecter des équipes d'
urgence dont des radioamateurs, avec leurs propres équipements et antennes.

Hi Friends
WESTERN SAHARA

Back to Elche, near Alicante, Spain, tired but very glad of the done job.
Five days in trafic, 21 hours a day only because of the AC supplying ,
playing that between local Supplying Services and our generator.
More than 37 000 QSO's logged in five days with an uncertain propagation,
signals beeing the strongest and the weakest in the same 5 seconds.
Our numéric QSO numbers reached 2389 in RTTY? We were able also to make
1333 QSO's on the top band.
The S04R team was componed of 8 super motivated very willfull , competent
and also unshaven operators.
Each run was going on for at least 3 hours ; some lasted more than 7.
We will not forget our meeting with our Ukrainian friend UT7CR, who came
directly from Siberia (minus 22°c) to this Very Hot part of the African
desert.
For us , the two French ops we discovered a fabulous desert came from the
ages of the ages, and the marvellous Sahara starry nights.
Our meetings with the locals showed us how these populations are kind,
hospitable, volontary and decided, even if the most part is living with their
families and the cattle in the middle of the desert.
We could visit also some Saharaoui refugee camps in Algeria; we were
geratly upset.
For Alain, F6ENO, it was a second great dxpedition which make him dreaming
of the future third one.
For Bernard/F9IE, a new great human aventure and also once more a visit to
another tortured country.
If we would be allowed to resume , we could say :

QSL MANAGING
Hi there

With immediate effect, I have been appointed the QSL manager for GI5K and
MI0LLL. I have already added a log search page and bureau card request
facility for each callsign to my web site www.g3swh.org.fa
<_http://www.g3swh.http://_ (http://www.g3swh.org.uk/) > I am also
arranging for any unanswered, direct

QSL requests to be forwarded to me by Chris and for the RSGB QSL bureau sub-manager to forward cards directly to me.

ISLE OF MAN:
Mini 'dxpedition' to Isle of Man EU-116 26th April - 1st May

Myself (Mark M0MJH), Kevan 2E0WMG, Matt 2E0XIS and James M0ZZO are travelling up to the Isle of Man (_http://en.wikipedia.org/wiki/Isle_of_Man_ (http://en.wikipedia.org/wiki/Isle_of_Man)) (EU-116 for IOTA) between 26th April and 1st May for a week of radio. Activation will be SSB on HF (mostly 80/40/20m but possibility of higher bands if conditions allow and 160m if space allows) from most locations across the island with the addition of VHF/UHF whilst on summits _Summits On The Air_ (http://database.sota.org.uk/summits.aspx) , of which Matt and James hope to do all 5 on the island.

Look out for us signing as MD0MJH, 2D0WMG, 2D0XIS and MD0ZZO respectively. Also look out for our club callsigns of GT3CO, for the Colchester Radio Amateurs (of which Kevan, Matt and James are members) and GT7SRA for the Sudbury and District Radio Amateurs (of which I am a member).

Updates should be on _My blog_ (http://m0mjh.blogspot.com/) with plans for the days activities and possibly further information on what has happened during the day.

Bonjour à tous,
Reçu de Bernard/F9IE et Alain/F6ENO membres de l'équipe S04R.

De retour à Elche, région d'Alicante, fatigués mais contents du travail accompli ...!
Cinq jours de trafic à raison de 21 heures par jour pour raison de fourniture électrique entre le réseau local et notre groupe de complément.
Ceci nous a permis de dépasser les 37000 qso avec des conditions de propagation difficiles et instables.
2389 qso en RTTY et 1333 sur 160m.
Le team S04R était composé de 8 opérateurs motivés, volontaires, compétents et mal rasés ...
Des RUN de 3 heures minimum jusqu'à plus de 7 heures !
Une belle rencontre avec un opérateur Ukrainien UT7CR arrivé tout droit de Sibérie avec ses moins 22ºC !!!
Pour les 2 Français, une découverte fabuleuse du désert venu du fond des temps, avec sa nuit en voûte étoilée à couper le souffle ...

Des Sahraouis accueillants, aimables, volontaires et déterminés. Les familles de nomades en plein désert, au milieu de nulle part, avec leurs troupeaux
Les camps de réfugiés en Algérie qui vous bouleversent.
Pour F6ENO une 2ème grande expédition, ce qui donne de plus en plus envie ...
Pour F9IE une nouvelle grande aventure humaine et surtout la découverte d'une contrée martyrisée.

S'il fallait résumer:
La seule frontière est l'horizon sans fin qui s'étend en face de vous, et l'homme le plus heureux n'est pas celui qui a le plus, mais celui qui a besoin de peu.

As you may know, many people have stockpiled IRC's that will expire at
the end of 2009.
Unlike the old style coupons, the current types all have an expiry date,
giving them a maximum life of 3 years.
If you purchase the current coupons today, they will still expire on
31st December 2009.
Due to a query on the DX-QSL list Ken ZL2HU has found the
information below.
So be careful that you are not left holding worthless coupons at the
year end.
from Pete's Desk

Forwarded in its entireity for your info.
Info from International Postal Union in Geneva -
"The current issue (Beijing 2) IRC may be exchanged up to 31 December
2009 (date printed on coupon). In principle, Beijing 2 coupons will no
longer be sold from 31 August 2009. The new international reply coupon (Nairobi model) is
due to go on sale from 1 July 2009, and will be valid for exchange until 31 December 2013."
So make sure you aren't holding any of the Beijing 2 coupons at the end
of this year.

TenTec Centurion Amplifier.? 160-10 meters including WARC bands. Two 3-500z tubes. Full QSK.? Rated at 1300 watts output with 100 watts drive (650 watts RTTY). I usually kept the drive down so I only had around 1000 watts out max (500 watts RTTY)?? Power supply is built-in.? The fan is very quiet.? This is the newer black model with the silver trim.? It is built like a tank.? The manual and box are included.?? $1900.? New ones are $3200

?
Tokyo Hy-Power HL-1.2Kfx solid state 160-10 meters including WARC bands.? Full QSK,? rated at 750 watts out with 75-90 watts of drive.? I found that it has a? pretty consistent output in the high 600 to low 700 watt range without pushing it.? It will run 400 watts on RTTY.? The fan is quiet and I've had no problem with the amp.? The box and manual are included.? It's configured for 240V but will run on 120V.? No tuning required,? just change the band switch and you are ready to go (if your antenna's SWR is less than 2:1).? It has protection circuitry that is amazing.? Only weighs 33 lbs.? Very small footprint.
$1700? New ones are $1999
?
I have a new toy in the Tokyo Hy-Power HL-1.5Kfx that does the auto band switching so I don't need the other two.

CY0 Simulation Test - WA4DAN, AA4VK, and N0TG will operate from "Core Banks" (IOTA NA-67), on the Outer Banks of North Carolina, on an island that is similar in environment (terrain, sand, sea, remoteness, etc.) to Sable Island, during the period 2300Z on April 30 through 1500Z on May 2.

The purpose of the operation will be a "test" of potential antennas for use at CY0. Testing of antenna layout will be conducted to assess inter-station interference and the ability to operate two stations on the same band. Seven (7) antennas will be included in the test. DX'ers from the US and other countries are welcome to call in and participate in the CY0 simulation "test". Test frequencies and modes of operation will be posted to this website, prior to the operation.

Beginning immediately, Buzz - NI5DX, is the QSL manager for Kahlid, A61BK.? Kahlid has send his log file already.? QSL cards will have to be ordered, so there will be a delay in replying to cards until the new cards arrive from the printer.

Phil, ex-9Q1TB, has just been issued the callsign A65BK.? To avoid confusion, those requesting cards for either station should make certain they send their request to the proper QSL manager.

The VK9GMW team reports some of their log information has been lost.
QSOs made between 4/9 2020 UTC and 4/10 0923 UTC are gone. They are
working with the WriteLog people to see if it can be recovered, but in
the meantime they ask that no QSLs be requested for that period.

Let's hope everyone here worked them outside that time frame.

I.C.P.O. Bulletin (April 23 - May 01, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

23/04/2009: Phil, F5LTB will soon be active from Dubai, United Arab Emirates, as A65BK. He has just received his license and is in the process of setting up his station. Length of stay was not mentioned. Phil will be mainly QRV using SSB. QSL Direct ONLY via SM5DJZ. eQSLs are welcome for eDX100, eWAS and eZ40. [F5NQL]

24/04/2009: Kasimir, DL2SBY, will be active from Liechtenstein between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Equipment will be a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir will use two separate callsigns for this operation. For the HF bands, he will use HB0/DL2SBY and for the EME activity will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

24/04/2009: Ezio/IT9OJW, Sebastiano/IT9ZIR, Dario/IT9ZZO, Vincenzo/IW9EJP, Filippo/IW9FRB, Giovanna/IW9GVP and Ferdinando/IW9HSK will be active April 24-26th as IG9/homecall from Linosa Island (AF-019, IIA AG-003, MIA MI-128, WLOTA 0820). They plan to operate SSB, PSK and RTTY on 10-80 meters. QSL via home calls. They have a web page at www.iw9frb.it/linosa.htm [425 DX News]

24/04/2009: Jim, MM0BQI will be active as homecall/p from Lunga Island in the Treshnish Isles (EU-108, IOSA NH17, SCOTIA DI09) April 24-27th. Look for activity on or near the usual IOTA frequencies. QSL via home call, direct or Bureau. [rsgbiota.org]

25/04/2009: Andy/IZ0EHO and Vincenzo/IZ0FKE will activate Vulcano Island (EU-017, IIA ME-018, MIA MI-122, WLOTA 1001) using the callsign ID9N from April 25-30th. QRV 160-6m, with a focus on the low bands, using CW, SSB and digital modes. QSL via the information at QRZ.com under ID9N. Further information can be found at www.id9n.com/ [rsgbiota.org]

25/04/2009: Railway stations award activity by the Radio Club Quilmes - LU4DQ, from the Gomez station DEF 134 D (35°4'4"S 58°10'0"W). In the 60th anniversary of the RC Quilmes, activity program, the RC (LU4DQ), will be aired on April 25th. This station is on the Gral Roca Railway company and formerly joined until the 80's, the cities La Plata and de Mar del Plata. Activity valid for the Railway stations award "Diploma Estaciones Ferroviarias". Reference: DEF 134 D. QRV HF bands, using SSB

and CW, and VHF through local repeaters and on 145.390 Mhz. QSL: SAE + $ 1, to Radio Club Quilmes, Casilla de Correo Nº 6, C.P. 1878, Quilmes, Pica. De Buenos Aires. [F5NQL]

25/04/2009: The Sosnovy Bor (RN1CW, UA1CBW, UA1CIO) and Kronshtadt (UA1AIR) ham team, RZ1CWC will be active April 25th from the Mys (Cape) Shepelevsky lighhouse (ARLHS ERU 007, RLHA RLE-007, Admiralty C 4004, RDA LO-30, WW Loc. KO49NX) as RK1A/P on 20/40 meters. QSL via RN1CW, direct or Bureau. Further information can be found at: www.rz1cwc.qrz.ru/ [RN1CW]

26/04/2009: Jirka, OK2SJI/p will be active April 26th from Castle Chrast (CCA PA-005, WW Loc.JN79XW). QRV on 80m and 40m. QSL via home call, direct or bureau. [RN1CW]

27/04/2009: Kevan/2E0WMG (ISWL G-21098), Matt/2E0XIS, James/M0ZZO and Mark/M0MJH will be active from the Isle of Man (EU-116, WLOTA 2008) from 27th April 2009. There will be 4 full days of operation on most bands from 160m to 2m. Activity will be from various locations each day. Matt and James are keen SOTA enthusiasts and will be activating all five IOM SOTA Summits over two days on the 27th and 28th. They may be accompanied by Mark or Kevan on some or all of these summits. Kevan and Mark will be taking the lead on HF operating from Point of Ayre, at the northern tip of the Island on the 29th where they plan to be active near the IOTA frequency of 14.160 MHz. When active on 80m they will normally be found around the ISWL net frequency of 3.685 MHz. Operation on 40m will be 'wherever we can find a space' so is a bit more hit and miss. Kevan hopes to call in to the ISWL net on the Tuesday 28th. Of particular interest to monitor point chasers will be a chance to work affiliated Club Colchester Radio Amateurs (G-1118) with GT3CO, they will switch to this call if requested by ISWL members as long as a full licensee is present. They also hope to be active on top band but can not say when at this point. League members are welcome to drop an email to Kevan to arrange a sked (email correct on QRZ.com). It should be noted however that as all operation will be out in the open the weather and various other factors may hamper their ability to keep to skeds but they will do their best. The team will be firming up operating arrangements on the ferry and Kevan will update his 2D0WMG QRZ.com page upon arrival at the hotel. [Pete's-DX-Newsdesk]

27/04/2009: Juergen, DL1IAI/p will be active from Borkum Island (EU-047, N-001 for the German Islands Award, WLOTA 1022) between April 27th and May 18th. He will also try to activate the club station DL0BRF on the lightvessel Borkumriff (ARLHS FED 002) in SSB and maybe also PSK31/RTTY on 80m-2m during this time. Please QSL ONLY via Bureau. Please check also: www.dl1iai.de/ [DX Newsletter]

27/04/2009: Helmut, DL7VOX will be active as DL7VOX/p from Usedom Island (EU-129, O-13 for the German Islands Award, WLOTA 1640) from April 27th to May 16th. He will operate holiday style mainly CW on 160-10 meters, with 100 watts and wire antennas. QSL via DL7VOX, direct

or Bureau. [425 DX News]

27/04/2009: Jean-Loup, F8DYR/p will spend a holiday week in IN77tt square, near the Eckmühl lighthouse (ARLHS FRA 256) in south Brittany, from April 27th to May 2nd. He plans to be active on 6 and 2 meters, with a low power portable station, between 0600 and 0800 UTC every morning and maybe more. Tropo contacts with north of Spain and south of England should be possible in case of good propagation conditions. [DL8EBW]

28/04/2009: Look for Orrin, TI6/K9KEJ (QSL via EB7DX) and Don, TI6/W9YOR to be active April 28th to May 1st on 40, 20 and 17 meter SSB from Costa Rica. [425 DX News]

29/04/2009: Cliff, SV1JG, will be active from the Maldive Islands (AS-013) as 8Q7SV between April 29th and May 5th. Activity will be mostly CW and digital modes on all bands. QSL via SV1JG, direct or by the Bureau. [OPDX Bulletin]

29/04/2009: Claudio, IZ0KRC will be active as IC8/IZ0KRC from Ischia Island (EU-031, IIA NA-001, MIA MI-042, WLOTA 0689) from April 29th to May 4th. He plans to operate SSB on 10, 15, 20 and 40 meters. QSL via home call, Bureau preferred. [425 DX News]

QSL INFORMATION -

From: "Bill, W6WRT"
The VK9GMW team reports some of their log information has been lost. QSOs made between 4/9 2020 UTC and 4/10 0923 UTC are gone. They are working with the WriteLog people to see if it can be recovered, but in the meantime they ask that no QSLs be requested for that period. Let's hope everyone here worked them outside that time frame.
73, Bill W6WRT [K1XN & the Golist]

Beginning immediately, Buzz - NI5DX, is the QSL manager for Kahlid, A61BK. Kahlid has send his log file already. QSL cards will have to be ordered, so there will be a delay in replying to cards until the new cards arrive from the printer.
Phil, ex-9Q1TB, has just been issued the callsign A65BK. To avoid confusion, those requesting cards for either station should make certain they send their request to the proper QSL manager. [K1XN & the Golist]

IOTA VALIDATION and QSL status:
G3KMA has confirmed the validity of the 2008 9L0W DXpedition to AF-037 for the IOTA award. Karl,DK2WV, has already started sending out the QSLs. Roland,DJ4LK, writes that all QSOs until Nov 2 were made from the mainland of Sierra Leone. The team was QRV from Banana Island (AF-037) from Nov 3-10, 2008. Two different QSLs are used for confirmation. [F5NQL]

Info from International Postal Union in Geneva -
"The current issue (Beijing 2) IRC may be exchanged up to 31 December 2009 (date printed on coupon). In principle, Beijing 2 coupons will no longer be sold from 31 August 2009.

The new international reply coupon (Nairobi model) is due to go on sale from 1 July 2009, and will be valid for exchange until 31 December 2013."
So make sure you aren't holding any of the Beijing 2 coupons at the end of this year.

8489. NEW DATA FILES AND REPORTS UPLOADED TO WEB

From: K1XN

The APRIL 2009 Issue #904-D files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? I have
started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections
to me for the Rejected project in GoWin. This Rejected list is also
now in the weekly data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

The VK9GMW team reports some of their log information has been lost.

QSOs made between 4/9 2020 UTC and 4/10 0923 UTC are gone. They are working
with the WriteLog people to see if it can be recovered, but in the
meantime they
ask that no QSLs be requested for that period.

Let's hope everyone here worked them outside that time frame.

8499. A New Project - Eqsl users

Topic: 8499 Message: 8499

Hi folks.
??? I am trying to start a new project. I want to list the
stations that are uploading to eQSL.cc for CQ magazine
awards in the Golist data base.?
??? I sent an email to N5UP to see if there was a way to
get the user list of eQSL so I could post them to the database.
So far I have not heard back from N5UP with a Yes or No.
??? I have had many responses to the listing of the LOTW users
and the DXCC Approved Operations listings. I just thought it would
be nice to also give you the users of EQSL service. At this point
it does not seem like it will be done.
??? If you are a user of eQSL.cc and wish to be listed as such in the
Golist database, just send me a note with you call sign.? This is true
for LOTW also.
??? Just looking for more ways to make the Golist useful to you.

Hi folks,
??? I heard from Dave, N5UP and also Jim, AD1C, and now have
the Eqsl files needed to get the project going. I will clean up the
records so that they are compatible with my database.? Hopefully
they can be included in this weeks data file update.

OGASAWARA:
Hi Bill,

This might be a bit early but figured I'd better get it in the
mill. JF3MYU, K8AQM, KG8CO and NF8J (possible others joining) will
be operating from ChichiJima in the Ogassawara Island March 25
through April 5, 2010. Operation will be 160m-10m cw, ssb and
rtty. More on the QSL info and calls as they are issued.
Also for the V63TR operation in 2008 the QSL route is no longer
K5ZM, QSL V63TR only to K8AQM. V63TR will soon be up on LoTW.

Thanks,

Ted K8AQM

Folks,
??? RAC is asking for my Summer 2009 order. I will be invoicing the
pre orders I have starting this weekend.
??? If you have not ordered your copy and feel that you will want one,
now is the time to make your order. Golisters pay $37.50 and
non Golisters pay $40.50.? Free shipping to USA and International
shipping is $5.00.? I will have only a few copies left for inventory after
making the order.
??? Place you order at? http://golist.net/tord.cfm

Thanks

??? I merged the Eqsl file with the Golist database file
this morning. It did not bomb out so I hope it all took.
The few tests I made so far this morning indicate all is well.
??? The raw Eqsl file requires a lot of work to make it ready
for merging.? I hope that I can remember all that must be done
to prevent the programming from locking up.? The next test
will be Thursday prior to producing the weekly data files for you.
If I can get all the steps to work this next go round, then I think
all will be well in the future.
??? Just an update.

8506. Call Sign Problems Found

Yahoo group: GOLIST (2007 — 2010)
Date: 2009-04-28 20:13:45 UTC
From: K1XN
Topic: 8506 Message: 8506

??? While cleaning up the list of Eqsl users, I found many
call sign errors that will probably keep those users from having
any confirmations. It is really amazing to me as to how many
ways people can mutilate their call signs.
Probably the #1 offender is the use of slash letter O instead
of the accepted slash number 0. Most databases and other
programs will not accept a slash letter O. That usually causes
the program to fail or ignor that record. Then there are the ones
that like to put spaces in their callsigns. That does not work either.
The the ones that use the underscore line in their call.
Adding /kenwood or some other? unique name, letters, phrases.
It is amazing that some even remember what they are using.
??? It is also amazing to me that these variant call signs were in the
authenticated list from eQSL.
??? I think I have the 200 plus bad call signs addressed and I think
all will work for the data files this weekend. I do plan to add those
records to the data base.
John

The MAY 2009 Issue #905 files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

Bob, N2OO has a fantastic offer for you....
He has a VERY large number of those IRCs and he is now offering them in blocks of 20 for only $30.00. That makes them only $1.50 apiece.
You can't beat that price anywhere.

The only thing to consider is that these IRCs will have to be redeemed no later than December 31, 2009.

If you are interested in this offer, contact Bob by email at:

Landing on Rockall impossible
The skipper of the "Elinca" did not allow a landing on Rockall.
The waves are too high; even launching a Zodiac is impossible.
A very sad Theo, ON4ATW told us at 09.00 UT they will have to come back to Scotland. "The weather is worsening by the hour and the weather forecast for the coming days does not give any hope" he told us by satphone. For tomorrow 5 Bft winds are forecasted with gusts up to 80 km/h.
We are all very disappointed that after all these preparations a landing was not possible. However we learned a lot about all the aspects of putting up a DXpedition. One way or another this knowledge will be used.

U.S. COUNTY HUNTING - USA-CA

AJ9C - May1 to May 2 - SSB and CW
I will be mobile for the Indiana Qso Party. I plan to start at Lawrence County then Orange, Crawford, Dubois, Perry, Spencer, Warrick, Pike, Daviess, Martin, Greene, Clay, Sullivan. All are in Indiana. There may be some additions depending on time or possible back tracking depending on time and need. [County Hunter Web]

KO1U - Mark - 1* - 2 May to 3 May - SSB and CW
NEQP Saturday North and Sunday up for grabs...3540-3550, 7044 and lower as RTTY/EU will be a problem. 14040-50, 21040-50, 28040-50...Near 3850, (7280, 14280, 21380 and lower) 28380 and higher. Mainly CW however if you need SSB just ask. Send email requests to ko1usn *at* verizon.net

[County Hunter Web]

WE7G - Wayne - May 2, 2009 to May 2, 2009 - CW Only
One day trip in 7th Land QSO Party starting 1300Z Saturday only. Davis, Weber, Morgan, Summit and hopefully Rich. Can't get to Rich easily this trip as the road over the mountain remains closed. Might have to go to Uintah WY to get into Rich. Will try to get over to run Wasatch after Summit, we'll see. Will return in afternoon from Rich, Morgan, Weber and Davis. Will probably stay on 20 as it seems to be in the best shape recently. Listen for me amongst all the other State QSO parties. I'll try to hang around the top end of 20 at 14.050 or so. We'll see. The wx is supposed to be poor, but the roads should still be clear [no snow at least]. Send email requests to we7g *at* arrl.net

Helsinki
April 29, 2009
For Immediate Release:
YOUNG BRIT CAME OUT AS WINNER OF RADIO ARCALA ESSAY CONTEST

It was in February 2009 when the team at Radio Arcala, OH8X launched
an essay contest to get some fresh ideas from today's youth and
their elders to boost recruitment to the ranks of Amateur Radio. Great
participation was ensured, and determining the winners took some effort
from a multinational jury representing six nations.

A 19-year old Briton, Mark Dumpleton, 2E0NCG came out as winner by a
fair margin while two U.S. hams, John Scott Anderson, KC9OQO and Brian
Wood, W0DZ , finished in second and third place respectively.
Argentinian Diego Salom, LU8DX was recognized for his submission of the
best Spanish language piece.

You can read Mark's piece and his interview at www.radioarcala.com
under the "Young People Terms" button and get your personal inspiration
to do your share for Amateur Radio.

Folks.,
??? All the RAC orders for the Summer 2009 edition and been invoiced
and you should have a "paid" copy of the invoice in your email InBox.
If you do not, email me immediately so I can find and fix the problem.
??? I expect these copies to arrive at my QTH sometime after the middle
of the month.? I am labeling the mailing envelopes today and will be ready
to mail your cd the day after it arrives to me.? I will post when the RAC
has been mailed.
??? Thanks to all of you who ordered this Summer 2009 edition.? I will have
only 4 or 5 of this edition left in inventory for sale.

The MAY 2009 Issue #905-A files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

I.C.P.O. Bulletin (May 07 - 15, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

07/05/2009: Dave, G4LAB/m will be making a run from Hastings to Dover on May 7th, calling at Dungeness (New) (BARLS A0876, ARLHS ENG-085, WLOTA 1841) and Dungeness (Old) (BARLS A0876X, ARLHS ENG-038, WLOTA 1841) lighthouses. Can't be exact with times. Stay tuned to 80m! QSL via home call, direct or Bureau. [G4LAB]

08/05/2009: Henry, KT1J will be visiting the United Nations Headquarters station 4U1UN, in New York City, May 5th and 6th. Activity will be mainly on the HF bands, but he will also try some 6 meters (Grid FN30). QSL via HB9BOU. [KT1J]

08/05/2009: A team of 7 members of IOCA Group (Sven/DF9MV, Daki/9A2WJ, Franjo/9A2MF, Boki/9A3KB, Matt/DL5MFL and Dado/9A3TA), with Emir/9A6AA as team-leader, will be active as 9A0CI from Vela Palagruza Island (EU-090, ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284) and Lighthouse (CLH-100, ARLHS CRO 012, TWLHD WLH 9A-046, WLOTA 0057, Admiralty E 3586) from May 8-16th. Operation will be SSB, CW and Digital modes, from 80 through 10 meters. They also propose to operate SSB as 9A/homecall and homecall/p from Mala Palagruza Island (EU-090, ACIA IC-900, IOCA CI-461, MIA MC-285) and, for the first time, from rock of Kamik od Tramuntane (ACIA IC-899, IOCA CI-960, Not IOTA) as 9A0CI/p (QSL via 9A6AA). 08/05/2009: Members of the Bittern DX Group are participating in the National Mills on the Air weekend by putting a station on air from Weybourne Mill in Weybourne, North Norfolk. Using the callsign of GB1WM, this is a first time activation of one probably one the most photographed landmarks on the North Norfolk coast. The Mill was extensively renovated in 2008 with new sails and fantail fitted, being a private residence it is NOT open to the public. For this reason the station will be on-air from a field adjacent to the mill from 8th - 10th May. Look for Bittern DX'er members to be active on all HF bands and VHF, including some data modes. [Pete's-DX-Newsdesk]

08/05/2009: An Eure et loir area Hams, namely F1LLS, F4BCG, F4FCS, F5RAB, F6AXN, F6DPD, and F6HEQ will be active as TM5EL from the Penfret Island (EU-094, DIFM AT-059, WLOTA 0321, DPLF PB-038, WW Loc. IN87AR) from May 8-10th. The crew will be active on the open HF bands plus 6m, VHF, UHF and SHF using SSB, CW and digital modes. QSL via F6KHI through French REF Bureau or direct (with SASE). [F5NQL]

08/05/2009: Bill, WD2E/4 and Sofia, AI4KQ will be active from the Dry Tortugas Islands (NA-079) as WD2E/4 from May 8-14th. Look for activity on HF bands, on or near the usual island and IOTA frequencies. QSL via WD2E, direct or Bureau. Logs will be uploaded to LoTW. [rsgbiota.org]

09/05/2009: Ed, N1UR will be operating as B1Z from the Beijing DX Club Contesting Station on May 9th and 10th, which will include the CQ-M contest. QRV all bands, CW and SSB. QSL info TBD. [NG3K]

09/05/2009: Look for Guy, F1CNT/p (VHF) and Bernard, F1UFX/p (HF) to be active May 9th from the Castle of Broyes (DFCF 60-062, WW Loc. JN19FP), city of Broyes (CP 60120), Department Oise/60 and Province Picardie (DPF 18). QRV 80 and 40 meters HF; also 6m-70cm. QSL via home calls, direct or Bureau. [F1UFX]

09/05/2009: Ian, G6TGO will be QRV in IO70EV South West Coast of England (EU-005, WLOTA 1841) from May 9-16th on 6 meter SSB/CW using only 10 Watts. QSL via home call. [MMMonVHF]

09/05/2009: Ronny, OT4R (aka ON4ARV) will be QRV between May 9 - 30th from Punta Cana, La Altagracia Province, Dominican Republic (NA-096, WLOTA 2974) as HI7/OT4R. Activity will be on 10, 15 and 20m SSB. He may appear on 14.300 MHz whilst on 20m. QSL via OT4R to the bureau. [UBA HF News]

11/05/2009: Manu, F4FLQ will operate holiday style as TK/F4FLQ from Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between May 11th and 29th. Plans are to concentrate on the digital modes and 30, 17 and 12 meters. QSL via home call. [425 DX News]

11/05/2009: Sho/JA7HMZ as V63DX and Masa/JH7IOS as V63CW will be active May 11-16th from Pohnpei Island (OC-010). QRV 40m-6m, all mmodes. QSL via home calls, direct or Bureau. [NG3K]

15/05/2009: Alex, PY2WAS will be active May 15-17th from Macapá, Amapá State, Amazonic Region, Brazil, using the special callsign PQ8W, including an entry in the Manchester Mineira All América CW Contest (May 16-17th). Outside the contest look for activity on 160-10m SSB and CW from this rare Brazilian State. Planned equipment will be G5RV antenna and 700W linear. QSL via PY2WAS, direct or Bureau. [PY4WAS]
==========
LOOKING AHEAD -

SPECIAL EVENTS -

07/05/2009: Special Event Station celebrates 100 years of the Fleet Air Arm. On 7th May 1909 the Admiralty began a process that was to lead to the formation of the Fleet Air Arm. As 2009 is the Centenary Year of Naval Aviation, there are a number of events and publications throughout the year to celebrate and commemorate this event.
RNARS will be operational with the SES GB100FAA from the 7 May to the 15 May 09 from HMS Collingwood and from 19 May to 21 May 09 from RNAS Yeovilton.
The RNARS Chairman Mick Puttick says: "This is a chance for us to assist in publicising this historic occasion. Contacts with the special event stations and with RNARS members will also count towards the awards issued by the Society."
Operation will be on SSB and CW on the usual RNARS frequencies, band conditions permitting, and, +/- QRM: SSB - 3740, 7055, 14294/14335, 18150, 21360, 28940 kHz; CW - 3520, 7020, 10118, 14052, 18087, 21052, 24897, 28052 kHz. It is expected that a 2 metre FM station will also be operational. More information about the Society and the awards can be found at: www.rnars.org.uk. [Southgate ARC/Pete's-DX-Newsdesk]

08/05/2009: Celebrating the 60th anniversary of the Council of Europe, the local amateur radio club (ewwa.free.fr) will operate SSB, CW, RTTY and PSK as TP60CE, May 8-10th. QSL via F5LGF. An online log search will be available at: ewwa.free.fr/ [425 DX News]

09/05/2009: Special event station will be aired May 9-10th to honor the two Saints Cyril, and Methodius (Apostles of the Slavs). QRV all bands/modes. QSL via SV2GWY, direct or Bureau.

09/05/2009: Look for special event station 8J4BARA to be active on all bands/modes from May 9-17th to celebrate the Fukuyama(-city) Bara (or Rose) Festival, Hiroshima prefecture, Honshu (AS-007, JIIA AS-007-001, WLOTA 2376), Japan. QSL via the JARL Bureau. [JJ1WTL/AC6IM]

09/05/2009: For the second year running, Cray Valley Radio Society will be activating GB6MW from Meopham Windmill, Meopham, Kent DA13 0QA, as part of National Mills weekend on 9 and 10 May. The mill is set in an idyllic location next to the village green with its cricket, pubs and restaurants making it a prime location to showcase amateur radio to the visiting public. GB6MW will be active on HF and VHF and is hoping to better the 404 QSOs made in 2008 while still ensuring plenty of members are on hand to explain amateur radio to visitors as they pass by the station to view the spectacular interior of the mill and its exhibits. QSL via G4DFI, direct or Bureau.
Other stations taking part in National Mills on the Air weekend are GB0ETM from Eling Tide Mill in Totton, Hampsire (QSL via G4JYN) and GB2WBM from West Blatchington Mill (QSL via RSGB Bureau). In Essex, look out for GB2RWM at Rayleigh Windmill (QSL via RSGB Bureau) and GB5SM from

Stock Mill near Ingatestone (QSL via G0IYZ). East Susses sees G0WMH (QSL via QRZ.com) on the air from Windmill Hill in Hailsham and GB2GG will be on the air from George Green in Sneiton (QSL via 2E0DWB). All contacts count for IOTA EU-005 and WLOTA LH-1841. [GB2RS]

10/05/2009: Special event station 8J7AIZ will be aired from May 10th to July 20th to celebrate the 110th anniversary of Aizuwakamatsu-city, Aizu region, Fukushima prefecture, Honshu (AS-007, JIIA AS-007-001, WLOTA 2376), Japan. QSL via JARL bureau. [JJ1WTL/AC6IM]

10/05/2009: Look for special event station W1AW/8 to be on the air during the Dayton HamVention (May 15-17th). They are currently looking for volunteers to operate the station for 4 hour shifts. Volunteers will receive an on-grounds parking pass, an admission ticket and a hat. Sign up in advance is STRONGLY recommended -- first come first served on requested shifts. This WILL fill up quickly. Contact via E-mail Jerry Bodey, N8OWV at: jerrybodey@... [OPDX Bulletin]

10/05/2009: The Isle of Man Amateur Radio Society (EU-116, WLOTA 0449) has been asked to operate an amateur radio station during five RNLI Lifeboat Open days. The first event, from Douglas, will take place on Sunday 10 May. GB5LB will be on the air on 80m (centred around 3.7MHz). A special QSL card is available to those contacting the station. Any amateur station contacting all five RNLI Isle of Man stations is eligible to receive a special RNLI Certificate confirming the achievement. Other activity days are: June 4th from Peel; July 4th from Ramsey; July 12th from Port Erin; and July 26th from Port St Mary. All QSL cards must be sent to: Port St Mary Lifeboat, The Boat House, Lime Street, Port St Mary, Isle of Man IM9 5EF. Full details at: www.iomars.blogspot.com/. [GB2RS]

15/05/2009: Look for special event station 8N5I to be active on all bands and modes from May 15th to June 15th for the 2009 Shikoku(-district) Information Telecommunication Month, Shikoku island (AS-076, JIIA AS-076-001). QSL via the JARL Bureau. [JJ1WTL/AC6IM]

Super Check Partial Database -- New e-mail address for submitting logs
I'm taking over the administration of the Super Check Partial database from Randy, K5ZD. Thank you, Randy, for providing the contesting community with top notch support of the SCP database over the last few years.
Randy recently established a dedicated web site for SCP (www.supercheckpartial.com/). As part of this transition, we've now set up a new email address for receiving logs, logs@....
As always, the easiest thing is to cc logs@... when you submit your Cabrillo formatted log to the sponsor's robot, but you can send them at any time you wish.
Randy's usage policies remain in effect. All files become property of WA1Z and will only be used for the purpose of creating the master call files. Blocked call requests can be submitted to the new email address as well. I have the existing blocked calls list, so only new requests are necessary.
For additional details, please refer to the web site:
http://www.supercheckpartial.com/
You Can expect the next SCP update to be announced sometime near September. If anyone has any questions, feel free to email me.
73, Bob Raymond, WA1Z

"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

07/05/2009: Dave, G4LAB/m will be making a run from Hastings to Dover on May 7th, calling at Dungeness (New) (BARLS A0876, ARLHS ENG-085, WLOTA 1841) and Dungeness (Old) (BARLS A0876X, ARLHS ENG-038, WLOTA 1841) lighthouses. Can't be exact with times. Stay tuned to 80m! QSL via home call, direct or Bureau. [G4LAB]

08/05/2009: Henry, KT1J will be visiting the United Nations Headquarters station 4U1UN, in New York City, May 5th and 6th. Activity will be mainly on the HF bands, but he will also try some 6 meters (Grid FN30). QSL via HB9BOU. [KT1J]

08/05/2009: A team of 7 members of IOCA Group (Sven/DF9MV, Daki/9A2WJ, Franjo/9A2MF, Boki/9A3KB, Matt/DL5MFL and Dado/9A3TA), with Emir/9A6AA as team-leader, will be active as 9A0CI from Vela Palagruza Island (EU-090, ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284) and Lighthouse (CLH-100, ARLHS CRO 012, TWLHD WLH 9A-046, WLOTA 0057, Admiralty E 3586) from May 8-16th. Operation will be SSB, CW and Digital modes, from 80 through 10 meters. They also propose to operate SSB as 9A/homecall and homecall/p from Mala Palagruza Island (EU-090, ACIA IC-900, IOCA CI-461, MIA MC-285) and, for the first time, from rock of Kamik od Tramuntane (ACIA IC-899, IOCA CI-960, Not IOTA) as 9A0CI/p (QSL via 9A6AA). QSL via DE0MST (only for 9A0CI, CI-084), via the DARC Bureau or direct to: Manfred Stippschild, Sylvensteinstr. 9, D-83661, Lenggries, Germany.. More detail at www.inet.hr/9a6aa/iocaplan.htm [9A6AA]

08/05/2009: Members of the Bittern DX Group are participating in the National Mills on the Air weekend by putting a station on air from Weybourne Mill in Weybourne, North Norfolk. Using the callsign of GB1WM, this is a first time activation of one probably one the most photographed landmarks on the North Norfolk coast. The Mill was extensively renovated in 2008 with new sails and fantail fitted, being a private residence it is NOT open to the public. For this reason the station will be on-air from a field adjacent to the mill from 8th - 10th May. Look for Bittern DX'er members to be active on all HF bands and VHF, including some data modes. [Pete's-DX-Newsdesk]

08/05/2009: An Eure et loir area Hams, namely F1LLS, F4BCG, F4FCS, F5RAB, F6AXN, F6DPD, and F6HEQ will be active as TM5EL from the Penfret Island (EU-094, DIFM AT-059, WLOTA 0321, DPLF PB-038, WW Loc. IN87AR) from May 8-10th. The crew will be active on the open HF bands plus 6m, VHF, UHF and SHF using SSB, CW and digital modes. QSL via F6KHI through French REF Bureau or direct (with SASE). [F5NQL]

08/05/2009: Bill, WD2E/4 and Sofia, AI4KQ will be active from the Dry Tortugas Islands (NA-079) as WD2E/4 from May 8-14th. Look for activity on HF bands, on or near the usual island and IOTA frequencies. QSL via WD2E, direct or Bureau. Logs will be uploaded to LoTW. [rsgbiota.org]

09/05/2009: Ed, N1UR will be operating as B1Z from the Beijing DX Club Contesting Station on May 9th and 10th, which will include the CQ-M contest. QRV all bands, CW and SSB. QSL info TBD. [NG3K]

09/05/2009: Look for Guy, F1CNT/p (VHF) and Bernard, F1UFX/p (HF) to be active May 9th from the Castle of Broyes (DFCF 60-062, WW Loc. JN19FP), city of Broyes (CP 60120), Department Oise/60 and Province Picardie (DPF 18). QRV 80 and 40 meters HF; also 6m-70cm. QSL via home calls, direct or Bureau. [F1UFX]

09/05/2009: Ian, G6TGO will be QRV in IO70EV South West Coast of England (EU-005, WLOTA 1841) from May 9-16th on 6 meter SSB/CW using only 10 Watts. QSL via home call. [MMMonVHF]

09/05/2009: Ronny, OT4R (aka ON4ARV) will be QRV between May 9 - 30th from Punta Cana, La Altagracia Province, Dominican Republic (NA-096, WLOTA 2974) as HI7/OT4R. Activity will be on 10, 15 and 20m SSB. He may appear on 14.300 MHz whilst on 20m. QSL via OT4R to the bureau. [UBA HF News]

SPECIAL EVENTS -

07/05/2009: Special Event Station celebrates 100 years of the Fleet Air Arm. On 7th May 1909 the Admiralty began a process that was to lead to the formation of the Fleet Air Arm. As 2009 is the Centenary Year of Naval Aviation, there are a number of events and publications throughout the year to celebrate and commemorate this event.
RNARS will be operational with the SES GB100FAA from the 7 May to the 15 May 09 from HMS Collingwood and from 19 May to 21 May 09 from RNAS Yeovilton.
The RNARS Chairman Mick Puttick says: "This is a chance for us to assist in publicising this historic occasion. Contacts with the special event stations and with RNARS members will also count towards the awards issued by the Society."
Operation will be on SSB and CW on the usual RNARS frequencies, band conditions permitting, and, +/- QRM: SSB - 3740, 7055, 14294/14335, 18150, 21360, 28940 kHz; CW - 3520, 7020, 10118, 14052, 18087, 21052, 24897, 28052 kHz. It is expected that a 2 metre FM station will also be operational. More information about the Society and the awards can be found at: www.rnars.org.uk. [Southgate ARC/Pete's-DX-Newsdesk]

08/05/2009: Celebrating the 60th anniversary of the Council of Europe, the local amateur radio club (ewwa.free.fr) will operate SSB, CW, RTTY and PSK as TP60CE, May 8-10th. QSL via F5LGF. An online log search will be available at: ewwa.free.fr/ [425 DX News]

09/05/2009: Special event station will be aired May 9-10th to honor the two Saints Cyril, and Methodius (Apostles of the Slavs). QRV all bands/modes. QSL via SV2GWY, direct or Bureau.

09/05/2009: Look for special event station 8J4BARA to be active on all bands/modes from May 9-17th to celebrate the Fukuyama(-city) Bara (or Rose) Festival, Hiroshima prefecture, Honshu (AS-007, JIIA AS-007-001, WLOTA 2376), Japan. QSL via the JARL Bureau. [JJ1WTL/AC6IM]

09/05/2009: For the second year running, Cray Valley Radio Society will be activating GB6MW from Meopham Windmill, Meopham, Kent DA13 0QA, as part of National Mills weekend on 9 and 10 May. The mill is set in an idyllic location next to the village green with its cricket, pubs and restaurants making it a prime location to showcase amateur radio to the visiting public. GB6MW will be active on HF and VHF and is hoping to better the 404 QSOs made in 2008 while still ensuring plenty of members are on hand to explain amateur radio to visitors as they pass by the station to view the spectacular interior of the mill and its exhibits. QSL via G4DFI, direct or Bureau.
Other stations taking part in National Mills on the Air weekend are GB0ETM from Eling Tide Mill in Totton, Hampsire (QSL via G4JYN) and GB2WBM from West Blatchington Mill (QSL via RSGB Bureau). In Essex, look out for GB2RWM at Rayleigh Windmill (QSL via RSGB Bureau) and GB5SM from

Stock Mill near Ingatestone (QSL via G0IYZ). East Susses sees G0WMH (QSL via QRZ.com) on the air from Windmill Hill in Hailsham and GB2GG will be on the air from George Green in Sneiton (QSL via 2E0DWB). All contacts count for IOTA EU-005 and WLOTA LH-1841. [GB2RS]

10/05/2009: Special event station 8J7AIZ will be aired from May 10th to July 20th to celebrate the 110th anniversary of Aizuwakamatsu-city, Aizu region, Fukushima prefecture, Honshu (AS-007, JIIA AS-007-001, WLOTA 2376), Japan. QSL via JARL bureau. [JJ1WTL/AC6IM]

10/05/2009: Look for special event station W1AW/8 to be on the air during the Dayton HamVention (May 15-17th). They are currently looking for volunteers to operate the station for 4 hour shifts. Volunteers will receive an on-grounds parking pass, an admission ticket and a hat. Sign up in advance is STRONGLY recommended -- first come first served on requested shifts. This WILL fill up quickly. Contact via E-mail Jerry Bodey, N8OWV at: jerrybodey@... [OPDX Bulletin]

10/05/2009: The Isle of Man Amateur Radio Society (EU-116, WLOTA 0449) has been asked to operate an amateur radio station during five RNLI Lifeboat Open days. The first event, from Douglas, will take place on Sunday 10 May. GB5LB will be on the air on 80m (centred around 3.7MHz). A special QSL card is available to those contacting the station. Any amateur station contacting all five RNLI Isle of Man stations is eligible to receive a special RNLI Certificate confirming the achievement. Other activity days are: June 4th from Peel; July 4th from Ramsey; July 12th from Port Erin; and July 26th from Port St Mary. All QSL cards must be sent to: Port St Mary Lifeboat, The Boat House, Lime Street, Port St Mary, Isle of Man IM9 5EF. Full details at: www.iomars.blogspot.com/. [GB2RS]

15/05/2009: Look for special event station 8N5I to be active on all bands and modes from May 15th to June 15th for the 2009 Shikoku(-district) Information Telecommunication Month, Shikoku island (AS-076, JIIA AS-076-001). QSL via the JARL Bureau. [JJ1WTL/AC6IM]

Super Check Partial Database -- New e-mail address for submitting logs

I'm taking over the administration of the Super Check Partial database from Randy, K5ZD. Thank you, Randy, for providing the contesting community with top notch support of the SCP database over the last few years.

Randy recently established a dedicated web site for SCP (www.supercheckpartial.com/). As part of this transition, we've now set up a new email address for receiving logs, logs@....

As always, the easiest thing is to cc logs@... when you submit your Cabrillo formatted log to the sponsor's robot, but you can send them at any time you wish.

Randy's usage policies remain in effect. All files become property of WA1Z and will only be used for the purpose of creating the master call files. Blocked call requests can be submitted to the new email address as well. I have the existing blocked calls list, so only new requests are necessary.

For additional details, please refer to the web site:
http://www.supercheckpartial.com/

You Can expect the next SCP update to be announced sometime near September. If anyone has any questions, feel free to email me.

73, Bob Raymond, WA1Z

From the SEDXC reflector

I have a number of tubes for sale. These tubes are pulls from medical imaging equipment and packaged in the original EIMAC boxes. These tubes were fully operational when removed from service and have been tested for shorts and filament continuity. I offer a 5 day no questions asked return policy. $225 per tube + any shipping and insurance.

Some DX informztion compiled by “Matt”, OZ6OM for the CQ SIX - 50 MHz DX
Information.
Greece, SV. Laci, HA0HW will be active as J48HW and SV8/HA0HW from Thassos
Island, Greece (WW Loc. KN20HS) from 28 May to 6 June. He will operate
mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on
40, 30, 20 and 17 meters) and on 6 meters. He will take place in The CQ WPX
CW contest as J48HW. His rig are a FT-840 with a MOS-FET amplifier and an
IC-706 (for 6 m only) with monoband Gps and dipoles on fishing poles. QSL
via home call, direct or via HA-bureau. (MMMonVHF Newsletter 2009-05-08) 10

Hi Friends

Hello Guys, I (OZ6OM) will be QRV in the Nordic Activity Contest Tuesday evening (14 th. May) between 17 and 21 UT. If weather and my generator permits, I intend to go "hill topping", from JO55CE. 128 masl. (one of the highest points within 100 Km), using a 5 element antenna and 100 w.
The reason I´m trying this is, my attempt at setting up reasonable antennas at my QTH have so far ended in a law suit. - so the antenna at my QTH is very
modest at this time. (Ok for Es, but nothing more) I intend to keep activity round 50.173 MHz (SSB/CW) and 50.230 MHz / 50.236 (JT6m).
Hope to see You down the log ... vy 73 de Matt OZ6OM

Hi friends
Nigel G3TXF, Bob MD0CCE and I will be operating as YS1G next week. We arrive in El Salvador late on Saturday and you should find us on air on Sunday 17th. Main bands 160m to 30m, plus the higher bands as possible. We leave on 23 May.

We are taking quite a bit of LF equipment, including RX antennas and linears, so that will be an interesting opportunity despite the dates being a little late for the best conditions. We will of course have our sights set on the UK at the appropriate times!

The MAY 2009 Issue #905-B files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

Hi friends
After several years and a lot of attempts, the GLORIOSOS 2009 DXpedition - IOTA _AF-011_ (http://www.rsgbiota.org/info/groupinfo.php?refno=AF-011) - DIFO _FR-004_ (http://f5nod.chez-alice.fr/difo.html)
is on the go :
This is the first Official press release sent to day by Didier, F5OGL, team leader.
PRESS RELEASE Number 1:
A team of French Forces Ham operators (3 or 4) along with two SIRPA journalists (French Forces Public Relations and Informations services) are going to Gloriosos Islands between July 9-29.
Some documentaries are to be filmed while they will stay on the Islands;
The common thread of these documentaries will be the DXpédition itself.
The crew will be active from 160 to 6 meters using numerous modes as CW, SSB, RTTY, PSK and as many other digital modes as possible.
The callsign (an original one is claimed) will be indicated only when the crew will land the main Island.
Crew : F5PRU, F5IRO, F5TLN . For F4EGS or F5RQQ , the participation is pending.
3 stations with traffic as longer as possible are scheduled.
Thanks to the Provins ARC, F6KOP and F4AJQ for lending the most part of the gear which will be used.
The team leader and QSL manager is Didier F5OGL .
Contributions by any way, gear lending or donations or other means are welcome. Contact :_ F5OGL_ (mailto:f5ogl@...) (address on web page)
Thanks to Rafik, F5CQ, webmaster, the team has a web page at :
http://glorieuses2008.free.fr (http://glorieuses2008.free.fr/)
On this page the logs will be updated each day.
More information to be published in time.
See you soon down our logs.

9V1YC QSL Status
James' QSL manager, Joe, N5ID has been suffering from an extended illness and has been in the hospital or rehabilitation for several months, unable to respond to QSL requests. As a result I am temporarily taking over answering Joe's backlog of requests. The priority will be direct requests and I will get to bureau requests as time allows. I have all of James' logs and received an initial large batch of unopened direct requests from Joe's QTH and have blanks for 9V1YC so processing of those will begin this week. I will also be answering N1YC/VK9X and 9V9HQ requests once I have the blank cards. I will be receiving more from Joe over the next few weeks, so please continue to be patient. Please note that at this time this is a TEMPORARY change. PLEASE DO NOT update any QSL manager databases or routes as a result of this note. In the interim please feel free to direct any email queries about your 9V1YC status directly to me. Also, I will be updating status from time to time on my web page at http://w5ue.net .
James and Joe both apologize for any inconvenience this has caused and appreciate your understanding. Please continue to keep Joe in your thoughts and prayers.

Midway Island 2009
Press Release Number 3 May 13, 2009
Arrangements and plans are moving along without difficulty for the scheduled operation date of October 9 - 19, 2009.
We would like to announce the addition of three new members, Carlos EA1IR, Craig K9CT and Oscar EA1DR to the team. Carlos, Craig and Oscar come to us with DXpedition experience and we look forward to having them as members of the team.
Numerous equipment suppliers and manufacturers are on line with their support. When you deal with these companies or individuals please take a moment and thank them for providing support to not only this DXpedition but to all DXpeditions. Currently Acom, Heil, Rig Expert, The Battle Creek Group, WX0B, Cable Experts, ELLI Print, QRZ-DX, The Daily DX, IZ2KTZ, W8AEF, and W6SZN are providing equipment or support of some type.
The team would like to thank NCDXF, The Colvin Award, Southwest Ohio DX Association, The German DX Foundation, INDEXA, The Southeastern DX Club, The Lone Star DX Association, The Danish DX Group and others for their generous donations. You may also contribute and we will appreciate your support. Contributions can be forwarded several ways, via the www.midway2009.com web site using Pay Pal, credit card or U.S. Mail. All contributions are noted on the web site and depending on the level of support will be noted on the DXpedition QSL.
Many of the team members will be at Dayton and look forward to seeing you. Please say hello when you see a member sporting the Blue NCDXF T shirt with the K4M call walking around.
Two additional official web site features announced last month - The Midway Memorabilia Store and the DX poll are being well received. Take a look at the poll and see where your needs stand in regard to the rest of the DX world.
This month we are highlighting three more team members. You can read all their history at

Hi friends

Press release :

Tubuai OC-152 and - Nuku Hiva OC-027.

I am glad to inform you that the Polish group of four ham radio amateurs together with their guest Michael FO5QB will be working between 28.09.2009 and 12.10.2009 from Austral Archipelago (TX5SPA) as well as between 16.10.2009 and 22.10.2009 from Marquesas Archipelago (TX5SPM) (that's the call signs we applied for).

Our aim is to make as many qso as possible mainly with Europe on lower frequency bands. Both countries take 21th and 19th place respectively in terms of being the places in the greatest demand. It does not mean that we intend to ignore the stations from other continents. If possible (propagation) we will be working on all higher bands. We are planning to be active on CW,SSB,RTTY (maybe PSK31).

We would like to emphasise that all the costs of the expeditions are covered entirely by its participants. We do not accept any sponsors, we are going there for our own pleasure for our own money.
We would feel humble and grateful to receive any feedback from more experienced operators than ourselves, however we will be ignoring those whose only intention is to criticise others.
If you take pleasure in working with us - we are very glad. If not, you have to choices - one (an easy one) to switch of your radio or change your frequency and the other to join the expedition and show what you can do.
The QSL manager of the expedition is going to be Wojciech SP9PT.

Bonjour à tous:

Communiqué de presse :

Tubuai OC-152 and - Nuku Hiva OC-027.

Je suis heureux de vous annoncer qu'un groupe de quatre opérateurs polonais avec leur invité Michael FO5QB seront actifs du 28.09.2009 au 12.10.2009 depuis les îles Australes françaises(TX5SPA) puis depuis les Marquises (TX5SPM - indicatif demandé -), du 16 au 22 octobre 2009.

le but est de faire un maximum de contacts avec l'Europe sur les bandes basses.
classés 21ème et 19ème dans la liste des contrées les plus recherchées.

Ceci ne veux bien sur pas dire que nous ignorerons les autres stations.
L'activité sur les bandes hautes sera surtout fonction des conditions de propagation.

Activité prévue en CW,SSB,RTTY (et peut être en PSK31).

Nous signalons que tous les frais d'expédition sont couverts par les participants. Nous ne demandons et n'acceptons aucun parrainage. Nous y allons pour notre propre plaisir.
Nous acceptons cependant avec humilité et gratitude, toutes informations de précédents expéditionnaires en ces lieux, plus expérimentés que nous.
Nous ignorerons les critiques non constructives.
Nous serons heureux de vous contacter si vous y prenez plaisir . Sinon il vous restera à chpoisir:
1 soit fermer votre radio ou changer de fréquence
2 Vous joindre à l'expédition et faire voir ce dont vous êtes capable.

le QSL manager est : Wojciech SP9PT.

Page Web disponible à : _http://fo2009sp.pl/_ (http://fo2009sp.pl/)

Vous nous entendrez bientôt depuis la merveileuse polynésie Française.

Hi friends

65th anniversary of the Landing in Normandy
June 6th 1944 – June 6th 2009
For the 65th anniversary of the landing in Normandy, individual or ARC initiatives will remember us this event.
First information came at F5NQL's (Thanks, Michel,F6IPS, ARRL, Jean-Michel, F6AJA and Jean-Yves, F8LDX):
SAINTE MERE EGLISE :
As each year, Michel, F6IPS, will be active as TM6SME, from Edemonville, a close village of Sainte Mère l'Eglise.
HF, and maybe 144MHz, CW & SSB – Locator IN99HK –
Dates : from June 5 to 14.
Most activity will happen from June 5 to 7, with two opérators - F5MSB will join Michel. –
Contacts with TM6SME on two bands or two modes is worth a special award to be claimed to Michel F6IPS (CBA) , with a large SAE and postage envelope.
The cost of the award is as your choice in IRC, but not least than 2.

Hi folks,
??? Recently I added the records of Authenticated EQSL users to the data base which also contains known users of LOTW and the DXCC approved operations ?as released by ARRL.? I also have those known DX call signs that are not valid for DXCC award. Most of this data is very easy to make usable for the Golist database, some are not easy at all.
??? The questions for you Golist data users are:
Do you find this information useful? Do you use it? Do you use some of it and not the others?? Should I continue to put this information in the database for you?? Do you wish to not have some of the records in the db?
??? I would really like to have your opinions on this from as many of you as possible.? I want to make the database as useful as I can but need to know what you wish to have in it.
??? I think any response would be good to goto the reflector as discussion about this could produce a better Golist database for you. All comments are welcome direct to me as well.
??? Thanks guys and gals for any input.

I like all your efforts John to improve the data and quality of the data.

I like the data that tells me that the ARRL has NOT approved the particular entity for DXCC.

I heavily use the LOTW indication (it is cheaper and faster (hopefully) than sending a direct QSL or using the bureau).

I do not use the eQSL info as I presently do not participate in any of the awards associated with eQSL (that is another story as I feel that the data can be easily mis-used depending on the accuracy of the data and the accuracy of the 'responding' individual who can easily 'check' all records as 'valid' without comparing to one's log.). But for those who use it, I am sure the indication would is very helpful.

I find the LoTW, eQSL, and "not valid" data useful.

I use DXLab as a logger and Dave (AA6YQ, the author) includes databases of eQSL AG users and those that have been known to use LoTW (two separate databases). I find that the LoTW indication is interesting but I have several thousand QSOs from known LoTW users that have not been confirmed via LoTW. There can be several reasons, of course, from date/time mismatches to just simply the logs have not been uploaded. Same thing is true for eQSL. I am running just slightly under 15% confirmed under either scheme.

I had asked the DXCC folks one time about a list of operations that were not approved to minimize the possibility of sending in QSLs that would not be accepted but at the time the DXCC folks were not interested in making such a list available.

Larry,
??? The ARRL still does not maintain a list of approved stations, at least, not for the public consumption. I am on Bill Moores mailing list and have dug out all the other information I could find.? The not valid stations are much harder. I have to rely on users for that info and the Not Valid status sometimes changes without any public announcement.
??? My LOTW information comes from my daily emails with Qsl Managers and DX stations and from interested users.? Some of the records will have station listed that are not yet uploaded to LOTW, but it was indicated to me they would be uploaded.
??? Hope this helps in some small way.

DXCC credit is a dynamic thing. As such, I can see why the DXCC Desk would not want to publish a "list" of good or bad operations. One African (visitor) station comes and goes occasionally and sometimes he doesn't send in his paper work. This means most of his operations count, but are date dependent. If he gets nagged enough, he'll send in the paperwork for the dates that are bouncing. Some operations initially count and are later found not to have been where they claimed (guess who might have done that!), and others are not allowed for various other reasons, and then correct the situation and become counters.

Trying to maintain an official list of "non counters" would be a nightmare for the DXCC Desk. They have to evaluate each QSL when it is processed, and what might court today may not next month, or vice versa. The best anyone can do is what John is attempting -- make an unofficial list of operations we tell him bounced. Even this can't be 100% reliable, because something we had bounced a year ago for lack of documentation might count now if the operator(s) sent in the required paperwork.

John, I have followed the LoTW and eQSL data as long as you have provided it. Personally, I upload my logs to both LoTW and eQSL. Out of 16595 QSOs with stations listed as being on LoTW I have 6810 QSOs that have not been confirmed on LoTW. eQSL is a bit different in that only AG stations are checked but there are 9844 possible QSOs with 3368 QSOs are not confirmed. There are a number of non-AG stations for which I have confirmations. There are many possible reasons for these missed confirmations: not uploaded (too new, too old, no electronic form of log exists, or ?), wrong date/time (I have had contest QSOs come with dates that are on Tuesday etc, times off by as much as 8 hours, one QSO off by a year), NIL, wrong callsign, and the list goes on. Some of the 6810 QSOs not confirmed would be for some of the reasons mentioned but it is a rather high percentage of the possible QSOs (similar reasoning behind the eQSL numbers). But I take what I can get and hope that more logs will show up over time. (The 15% I mentioned in my first note was of all QSOs).

Your DXCC explanation was essentially what I got from Bill several years ago. I had hoped to find a list of disapproved operations with the assumption that all other operations not on the disapproved list were probably good leaving card problems as most likely reason for not counting a QSL. Bill had mentioned that status changes could occur so that it was best to just send in QSLs and they would sort out the "bad" ones.

I do appreciate your efforts for all of this. I do use the info for QSL planning.

Lots of people who enter the WPX contest would love to receive a certificate for their efforts. Unfortunately, it is too expensive to mail one to everyone, so we have had to limit providing certificates just to those who won their region and category. I am pleased to announce that all participants of the WPX Contest SSB/CW for 2007-2008 can now download electronic versions of their certificates in Adobe Acrobat (pdf) format.

The new electronic certificates enable you to print out your certificate on your own color printer. Simply go to the on-line searchable score database (<http://www.cqwpx.com/score_db.htm> http://www.cqwpx.com/score_db.htm) and search for your score. Then click
on the [cert] link to generate the pdf file. Your browser may pop-up a security warning, which you will need to accept, before the file will download to your computer.

All electronic certificates include the operator list, category, score, and country ranking. An additional ranking is included for scores in the world top 50 for the entrant's category.

Special thanks to Tom Morrison, K5TM, for his assistance in the programming to enable the new certificates. With so many variations of calls and categories, please let me know if you find anything that doesn't look right.

Worked May 2006, QSL with $2 sent on May 12th '06, card rec'd July 20th '06. I'd suggest sending nesting European-sized envelopes since his card is 6" x 4". I sent a smaller envelope with cash/card tucked inside, but he sent his own (larger) envelope back to me, at his own expense instead of folding the QSL in half.

I have noticed an increase in eQSL activity after CQ announced they would accept AG QSOs for WAZ and WPX at least. The CQ equivalent of DXCC is not covered. I just completed the WAZ process and it was painless.

GEOPARKS WEEKEND:
We have almost reached the Geoparks Communication Weekend 23/24 May, so I thought that I would send out some information.

Geopark stations will operate as close to 3.680 Mhz, 7.080Mhz, 14.180Mhz, 21.180Mhz, and 28.480Mhz. I have advertised these frequencies, as ones we would try to use if possible.

People chasing the Geopark diploma will find it easier to obtain if they stick to these frequencies, plus or minus the QRM.

GB6GEO will also be monitoring, and using MB7ITB our local Echolink gateway node 257017.

European Geopark stations will try a sked at 1300 GMT, Saturday, May 23rd on 7080Mhz, and all Geopark stations try at 1500GMT on 14.180Mhz.

The following information about the UK Geopark certificate -
To qualify now for the Geopark certificate, GB6GEO will be an instant qualifier, or ANY two other Geopark stations (not including GB6GEO).
Certificates will cost UK £2.20 each, Europe 3 euro and Rest of the world USD5. Awards Manager, Martin Foster G3VOF (qth www.qrz.com).

GB6GEO will be rigging on Friday 22nd May, and hope to be on the air around 1500 GMT, then non stop for 48hrs.

Geopark stations on the air include: CS8GEO (Portugal), DK0GEO, DD0D (Germany), EI2GEO (S.Ireland), GB1GEO (Scotland), GB2MAC (N.Ireland), GB5GEO (Wales), GB6GEO (England), YP2GEO (Romania) and possibly 9M2MRC Malaysia. (QSL manager for YP2GEO = YO2KAR).

Romania will be offering this Geopark award -
The CS Silver Fox issued an award for all who make 100 points working with GEO station (each 20 points) + any station from HD county who give GEO after report (YO2ARV 579/GEO) They give 10 points. Period May 23 - December 30, 2009.
Deadline: January 30, 2010.
Asking form signed by two hams and the QSL for station you worked must send to: CS Silver Fox, P.O.Box 119, RO-330012 Deva 1, HD, ROMANIA.
Fee: From EU = 2 euro or 3 IRC; DX = 4 dolars or 4 IRC.

The MAY 2009 Issue #905-C files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

2 days ago I approved the design and print of the cards so
I expect to possibly have them here in 10 days or so.

Meantime anyone looking at the oqrs service will find it is not
working properly along with other parts of the web site.

This is due to hackers getting into www.odxg.org (http://www.odxg.org)

?

We hope to have the site back up asap.

Buzz, NI5DX, is now the QSL manager for Juma, A71BU.?
Juma has had his new call for only a week.? He has already
sent Buzz his up-to-date log.? QSL cards will need to be designed
and ordered.? Please allow approximately 6-8 weeks before the
first A71BU cards are sent out.?

A71EM and A92GT card requests still go to EA7FTR.

WORK ALL RADIO ARCALA NETWORK STATIONS AT ONCE

You now have an opportunity to contact all Radio Arcala network stations at once:

OH8X, Finland; CU2X, Azores and TC4X, Turkey.

During the May 30-31, 2009 WPX CW Contest, Pasi, OH6UM will command OH8X while CU2X will be piloted by Toni, OH2UA and TC4X by Pertti, OH2PM. All as single operators.

You may also hear Martti, OH2BH active as CU2KG from his new residence in Ribeira Grande, Northern Azores May 25 through June 1.

Also, new Portuguese regulations will become effective on June 1 and this is the last run for the CU2X callsign. Resident operators can keep their original CU2 callsigns but special events, such as contests, will be issued with callsigns from the new CR1, CR2 and CQ8 series. All new licenses and/or expired residential licenses in the Azores will be issued the CT8 (1), CS8 (2) and CR8 (3), depending their license category.

QSL CU2X and TC4X via OH2BH, OH8X via OH2UA.

PORTUGAL and CEPT rules:
The approval was given by ICP-ANACOM to the procedures governing the amateur and amateur satellite services, as set out by Decree Law n.º 53/2009, March the 2nd, relative to Regulations for Amateur Radiocommunications in Portugal (ruling from June the 1st, 2009 on).
While establishing a communication, the amateur must observe the following procedures:
a) Identifying the station's call sign (CS) in the beginning and also at the end of any call (transmission);
b) When using a transceiver from a non-proprietary station, the amateur must identify the signal according to a), using the operated station's call sign, followed by his own station's call sign;
c) If the station in use is a mobile one, the amateur must identify the transmission with the station's call sign, followed by the word "mobile", right after, and point the present location of the station under operation.
In alternative to the word "mobile" the symbols "/M" can be used in addition to the station's call sign.
d) If the station is a portable one, the amateur must identify the transmission with the station's call sign, followed by the word "portable", right after, and point the present location of the station under operation.
In alternative to the word "portable" the symbols "/P" can be used in addition to the station's call sign.
Anytime a foreign amateur establish communications within the Portuguese territory under a "CEPT" license, the original station's call sign must be preceded by the prefix:
a) "CT7" if the operated station is located anywhere inside mainland PORTUGAL borders;
b) "CT8" if the operated station is located in one of the AZORES archipelago Islands;
c) "CT9" if the operated station is located in one of the MADEIRA archipelago Islands.
Anytime a foreign amateur establish communications within the Portuguese territory under a "CEPT novice" license, the original station's call sign must be preceded by the prefix:
a) "CS7" if the operated station is located anywhere inside mainland PORTUGAL borders;
b) "CS8" if the operated station is located in one of the AZORES archipelago Islands;
c) "CS9" if the operated station is located in one of the MADEIRA archipelago Islands.

Bonjour à tous

Education et publicité:
Sur la page web de Russ, on peut voir une vidéo de 23 minutes sur l'
histoire des Télécommunications. Bien qu'en Russe, les images sont semble-t-il
suffisamment parlantes pour en comprendre l'intérêt.

Du langage Sémaphore aux satellites. Une grande partie de cette video traite de l'Histoire , compris le crash de l'Italia de l'Ingr Nobile, avec des images d'origine ou reconstituées. L'histoire des radioamateurs est abordée largement avec des reportages notamment sur les activités du groupe R150ASP, tant en expédition qu'en enseignement. Quelques images d e l'ancien R3UA à sa station apparaissent également dans le film.

The MAY 2009 Issue #905-D files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.
http://golist.net/dlauth.cfm

?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin
if your subscription is about to expire.

Folks,
??? I just received some information about K7UGA. There
may have been a Qsl Manager change since I re-confirmed
the Qsl Manager this past Monday. I received confirmation from
KC7V that indicated he was still the manager for K7UGA.
?? I received some info just now that says the manager is NOW

SIX METERS & UP -

The ARRL Programs and Services Committee approved the following VUAC's recommendations to the ARRL VHF Contest program:

1) Limited Rover: Limited Rovers will now be able to enter only on the four lowest bands for any given ARRL VHF contest. For January, June and September, this means 6 Meters, 2 Meters, 220 MHz and 432 MHz. For the August UHF Contest, this means 220 MHz, 432 MHz, 902 MHz and 1.2 GHz.

2) Club Competition is now permitted in the August UHF Contest.

These changes take effect immediately, and have been noted on the ARRL web site. Stations planning to enter as limited Rover in the 2009 ARRL June VHF QSO Party should take note.

The 800 years old church tower of the "Oude of St Jeroenskerk"? -in English: Church of St George"- Noordwijk, the Netherlands, has been opened for public for the first time after renovation.

Because of this event, PA6JEROEN will be active between June 4th and June 14th on HF and VHF.

WW-Loc. JO22ff

On the Fridays June 5th and 12th the station will be active from the churchtower.

Pictures of this tower can be watched on:

QSL-cards please only via bureau to PA7DA

?

Jeroen (St George) was a Monk from Scotland and arrived at the Noordwijk (Nortgho) in 847

In 857 he build a Chapel on the place of this Church and did bring Christianity to the people in the Western part of Holland and West Friesland.

Later he?has been killed by the Normans!

Hi folks,
??? As part of my daily Golist work activities, I send out
Verification emails to Qsl Manager to update/correct
the records that I have listed from them.? This serves
two main purposes, One is confirming the information
I have is correct and Two, corrects any record that is
erroneous or contains wrongs dates etc.
??? I try to send this verification email yearly to each Qsl
Manager, but of course I do not reach that goal, but I
try.
??? The response this year has been very good probably
because of the low sun spots the managers are not having
to work as hard as usual. However some of these emails go
unanswered. I have concerns about some of these as these
managers have a large number of DX call signs they confirm
contacts for. By these Verification emails going unanswered
by the Qsl Manager, this makes me wonder if they are responding
to your Qsl requests by sending the reconfirmation Qsl Cards.
??? Please take a look at the list of Qsl Managers that have not
answered my Verification emails as of this writing. Please let me
know if you are receiving Qsl cards confirming contacts with their
stations. I would like to make sure they are active as Qsl Managers.
??? Thank you

8608. Various traffic and other information

Yahoo group: GOLIST (2007 — 2010)
Date: 2009-06-01 08:39:22 UTC
From: F5nql@aol.com
Topic: 8608 Message: 8608

Hi friends
France :
65th anniversary of the landing in Normandy.
For this year (we are hoping it will be the only one), the Manche area hams will not be able to traffic from their usual QTH of Utah Beach, for security reasons, in touch with the Presidents Obama and Sarkosy's visit to the beaches , museums and other war cemeteries .
The Manche Prefecture has refused to allow the crew to go to his Historical QTH in the Utah Beach museum.
Instead of these bothers, the special callsign TM6JUN, will be on the air as years by F1FSU , F4FFH , F5MSC , F5NKX , F5RJM , F8NHC , F9CH.
All HF and VHF bands as possible, with seven stations untill June 10th.
Modes : CW, SSB, digitals included TVA.
QSL as operator's indications.
Tks Benoît, F8PDR

F/ON6JUN/P, as it is for 15 years, from Ranville – Pegasus Bridge and Horsa glider – 3 to 8 of June.
Operators : ON4LBV in CW on 40and 20m. Other ops : ON4LBV, ON4ALY, ON6UF, ON4AAA , ON4MGY and ON5SD. all major bands HF on CW, SSB, RTTY , PSK 31 even higher to PSK125 .
QSL via ON5SD , pse see our web site at http//users.skynet.be/on6jun/fon6junp.htm.
Tks Jos ON5SD
Other Remainings : (Thanks, Michel,F6IPS, ARRL, Jean-Michel, F6AJA and Jean-Yves, F8LDX):
SAINTE MERE EGLISE :
As each year, Michel, F6IPS, will be active as TM6SME, from Edemonville, a close village of Sainte Mère l'Eglise.
HF, and maybe 144MHz, CW & SSB – Locator IN99HK –
Dates : from June 5 to 14.
Most activity will happen from June 5 to 7, with two opérators - F5MSB will join Michel. –
Contacts with TM6SME on two bands or two modes is worth a special award to be claimed to Michel F6IPS (CBA) , with a large SAE and postage envelope.
The cost of the award is as your choice in IRC, but not least than 2.
Mail: _f6ips@..._ (mailto:f6ips@...)

JUNO BEACH (Courseulles sur Mer) :
Between June 5 to 8, look for F/PA65DDAY on 80, 40, 20m by Henk PAØHFT and Hans PAØWYS. HF/SSB. QSL via HOMECALL PAØHFT, or Dutch VERON bureau.
Please nothing via the French bureau.
Castle of CREULLY (Calvados)
Between June 4th to 12th, 2009, look for TM5BBC to be active from the

square tower of the Castle of Creully.
After the landing , starting on June 7t h, 1944, the BBC services used
this building and from it, covered and broadcasted the information about
the Battle of Normandy.
By special permission of the French Conseil Superieur de l'Audiovisuel
(CSA, the French Authority), on June 4 & 5 , between 1200-1300 (1000-1100
utc) and on June 6& 7, between 1330-1430 (1130- 1230 utc) Broadcasting on
the original frequency of 1602 kHz , in AM, using rebuilt original gear.
No more information given, but QRZ.com, indicates QSL via F2UW.

Other Foreign commemorations

Bonjour à tous
FRANCE – 65ème anniversaire du Débarquepent e Normandie.
Pour cette année (et nous espérons que ce sera la première et dernière fois), les OM de la Manche ne ourront activer TM6JUN, depuis leur site historique d'UTAH BEACH. Pour des raisons de scutité relatives à la visite des Présidents Obama et Sarkosy, sur les sites , musées et autres cimetières du Débarquement, la Préfecture de la Manche a refusé d'autoriser les OM à accéder et installer leur matériel au Musée.
En conséquence TM6JUN sera actif jusqu'au 10 juin, avec sept stations depuis le domiciles des opérateurs, savoir : F1FSU , F4FFH , F5MSC , F5NKX , F5RJM , F8NHC , F9CH.
Bandes HF et VHF selon possibilités, CW, SSB et modes numériques, y compris TVA .
QSL selon indications de l'opérateur.

This is NOT directed at Bob, K2RET or anyone else who sells IRCs. The asking price is always a lot less that the Post Office, so if you want IRCs, buying from managers, etc, is the best deal.

My question is; Why would anyone want to use IRCs to begin with? They always are expiring "soon." Many countries won't honor them. Most DX stations and managers ask for two of them. Why not put in 1 or 2 USD bills and be done with it? I realise that historically IRCs were used as Ham "currency" -- that's the only way I ever used them . . . some guy sends me an IRC for a card and I put it in the next outgoing QSL request to some manager for a card I want so I can get rid if it. I've never cashed them in at our local post office. I hear lots of stories about postal workers not even knowing what they are.

I can't get my head around why IRCs are better. Yes, if a postal worker in Bora Bora sees an envelope addressed to a known Ham, he might tear it open looking fro green stamps, but he won't know what it contains until he opens it. If it has an IRC instead of a GS, and assuming he doesn't want the IRC, he is not going to carefully seal it back up. It's going in the garbage. I can't imagine IRCs are safer than USD bills. A few countries claim their citizens are not allowed to have US currency. I've always sent it anyhow and gotten cards back.

OK, I'm done ranting! Someone tell me why IRCs are better than US $1s.

CORSICA – TK :
Summer holidays are coming. A lot of you may have scheduled a trip to Corsica which is a touristic goal for numerous.
The French know , but to all of you let us inform about the local radio regulation.
For 6 meters :
The 6 meters band use is strictly forbidden in Corsica.
The concerned zones are the main island and the other islands in the neighbourhood, depending of the two South Corsica (Ajaccio) and North Corsica (Bastia) departments.
By them are the Sanguinaires, Lavezzi , Girolata and so on.
For 40m, the extension from 7100 to 7200 is not yet granted.
So have fun on other bands and on our sunny beaches.

Castles in Corsica and Metropolitan France :

Hi,

we'd like to let you know that we're going to activate Helgoland's (EU-127) smaller neighbour island, "the Dune", German Island Award # N-15, from 11 to 17 June 2009.

It's something between a vacation-style and a "serious" DXpedition. We'll be active mainly in CW, and may occasionally switch to SSB or PSK. Power will be 100 Watts maximum, and we'll experiment with simple wire antennas: A triple leg for 30 m and up, a 40/80 m double dipole for Europe, and a 40 m (and maybe 80 m) vertical for DX.

Hi friends:
, OZ. Special Event Station ! EDR (IARU), 5 th. division, Fyn and surrounding islands, are having the annual Summer Rally at _Egeskov Slot_ (http://egeskov.dk/en/node/378) (Castle) June 7 th. from approximated 8.00 UT until at least 14.00 UT.
Callsign in use will be OZ5FYN, the locator is JO55FE, the island no is 172. There is no Danish CASOTA series yet so we may just call it 001 ? (for the first Castle activation). The station will be manned by shifting local radio amateurs.
Activity starts with participation an 80 meters inter OZ contest, until 10.00 UT. Then the 80 meter station will stand by for callers at 3.750 MHz, hereafter it is expected IOTA friendly operators will seek activation of various HF bands.
A dedicated 50 MHz station will be active in the same time frame and have special attention at the ongoing UKSMG Summer contest. So our operation will start Sunday morning, there will not be a UKSMG no., thus several of the operator are individual members. It is expected the Rig will be an IC-706 with 100 watt output into either a HB9CV or a 5 element Yagi (depend on the winds)
A special QSL card for contacts this day have been created by OZ6MU John, whom also have taken the initiative to these rallies. QSL will be sent for all QSO´s via the EDR bureau.
Tks Matt, OZ6OM

GERMANY,
Hi,

we'd like to let you know that we're going to activate Helgoland's (EU-127)
smaller neighbour island, "the Dune", German Island Award # N-15, from 11
to
17 June 2009.

It's something between a vacation-style and a "serious" DXpedition. We'll
be
active mainly in CW, and may occasionally switch to SSB or PSK. Power will
be 100 Watts maximum, and we'll experiment with simple wire antennas: A
triple leg for 30 m and up, a 40/80 m double dipole for Europe, and a 40 m
(and maybe 80 m) vertical for DX.

QSLs via home calls (bureau or direct, no e-QSL)

The JUNE 2009 Issue #906 files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.? http://golist.net/dlauth.cfm
?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

04/06/2009: To celebrate the reopening of a 800 year old church tower (after its renovation) in Noordwijk, look for PA6JEROEN to be active between June 4-14th on HF and VHF. The old church is called "Oude of St Jeroenskerk" (in English: Church of St. George). Actual operations from the church tower will take place on two Fridays, June 5th and 12th. QSL only via the Bureau to PA7DA. [OPDX Bulletin]

05/06/2009: Operators Henk/PA0HFT and Hans/PA0WYS will activate special event station F/PA65DDAY from a campervan from Juno Beach (Courseulles-sur-Mer), QTH locator IN99SH, to commemorate the 65th anniversary of D-Day. QRV June 5th to 9th on 80, 40 and 20 meter SSB. QSL via PA0HFT, direct or by the Dutch VERON Bureau (see QRZ.com). [PA0HFT]

05/06/2009: Michel/F6IPS and Philippe/F5MSB will be active as TM6SME, from Edemonville, a close village of Sainte Mère l'Eglise (WW Loc. IN99HK) to commemorate the 65th anniversary of D-Day. Most of the activity will happen from June 5-7th on HF, and maybe 2m, CW and SSB. Contacts with TM6SME on two bands or two modes is worth a special award to be claimed via Michel F6IPS (CBA), with a large SAE. The cost of the award is at your choice in IRC, but not less than 2. [F5NQL]

05/06/2009: The Wyke Regis Radio and Training Club, Weymouth, England (EU-005, WLOTA 1841), will air the special callsign GB65FRW from 0000z June 5th to 2359z June 7th to commemorate the 65th Anniversary of D-Day. Activity will be mainly 20 and 15 meters for North America; and 80 and 40 meters for Europe. QSL via M3DPQ (Bob Palmer, 34 Ditmas Ave, Kempston Bedford, Bedfordshire MK42 7DP, ENGLAND). Website: wykerradio.org/ [F5NQL]

06/06/2009: Under the management of the Minister of Youth and Sports of the state of Djelfa, the Algerian Association of Amateur Radio (ARA) and

the Radio Club of Djelfa (7X2VFK) are pleased to announce an International Amateur Radio Meeting and Special Activity in the period of June 6th until July 6th from Djelfa city. A multi-national group of operators will be taking part and will show activity with a number of stations from 160-10 meter CW/SSB and some sporadic RTTY, SSTV and BPSK too, all to be on the air from Djelfa within the mentioned time frame. Issued callsign for this special event will be 7U2ISM (suffix for International Sahara Meeting). QSL *DIRECT ONLY* via 7X2DD. [NG3K]

06/06/2009: Italian stations participating in the Museum Ships Weekend (June 6-7th) include II3JD (QSL via IW3IE) from the submarine "Dandolo" at the Italian Navy Museum in Venice, and IY1SP (QSL via I1SAF) from the Italian Navy Museum in La Spezia. Also look for II2IGTO (submarine "Toti", QSL via IQ2MI) to be active for the IARU Region 1 Field Day over the same weekend. [425 DX News]

06/06/2009: Museum Ships Weekend is sponsored by the Battleship New Jersey Amateur Radio Station (NJ2BB). This year's Museum Ships Weekend will be held from 0000 UTC on June 6th until 2359 UTC on the 7th. Information on the event, including the relevant certificate and the listing of participating ships, can be found at www.nj2bb.org/museum/index.html [425 DX News]

07/06/2009: Special Event Station ! EDR (IARU), 5th. division, Fyn and surrounding islands, are having the annual Summer Rally at Egeskov Slot (Castle) June 7th from approximated 08.00 UTC until at least 14.00 UTC. Callsign in use will be OZ5FYN, from Fyn Island (EU-172, DIA FY-001, WW Loc. JO55FE). There is no Danish CASHOTA series yet so we may just call it 001 ? (for the first Castle activation). The station will be manned by shifting local radio amateurs. Activity starts with participation an 80 meters inter OZ contest, until 10.00 UTC. Then the 80 meter station will stand by for callers at 3.750 MHz, hereafter it is expected IOTA friendly operators will seek activation of various HF bands. A dedicated 50 MHz station will be active in the same time frame and have special attention for the ongoing UKSMG Summer contest. Operation will start Sunday morning, there will not be a UKSMG no., thus several of the operator are individual members. It is expected the Rig will be an IC-706 with 100 watt output into either a HB9CV or a 5 element Yagi (depend on the winds). A special QSL card for contacts this day have been created by John, OZ6MU who also has taken the initiative to these rallies. QSL will be sent for all QSO´s via the EDR Bureau. [F5NQL]

2009 Alabama QSO Party
Please look for myself Gary-K4EXT/m as well as my son Justin-KG4VBK/m in
the 2009 Alabama QSO Party on the following planned route: Geneva,
Coffee, Covington, Crenshaw, Butler, Montgomery, Bullock, Pike, Barbour,
and Dale counties. 11:00AM CDT to 11:00PM CDT, Saturday June 6th. Mostly
CW although I may dabble with that silly microphone thingie on SSB.
[County Hunter Web]

K7DM - Don - 1* - June 8 - CW Only
I'll be in Okanogan County, WA for a five-day fishing trip. I don't run
while I'm driving, so all the counties listed may not be run. All
counties listed are in WA. I should be able to run Okanogan a few times
while I'm there, probably around 1430Z.

70 MHz band assigned to amateur radio in Slovakia:
Roman ,OM3EI president of the Slovakian Amateur rRadio Association SARA, reports that radio amateurs in Slovakia gained access to the 70 MHz band on May 1, 2009. Amateur radio operation is allowed from 70.250-70.350 MHz with 10 watts EIRP for Extra Class only. Each station must apply for a special permission to operate on 70 MHz. [DX Newsletter]

CORSICA - TK:
Summer holidays are coming. A lot of you may have scheduled a trip to Corsica which is a touristic goal for numerous.
The French know, but to all of you let us inform about the local radio regulation.
For 6 meters:
The 6 meters band use is strictly forbidden in Corsica.
The concerned zones are the main island and the other islands in the neighbourhood, depending of the two South Corsica (Ajaccio) and North Corsica (Bastia) departments.
By them are the Sanguinaires, Lavezzi, Girolata and so on.
For 40m, the extension from 7100 to 7200 is not yet granted.
So have fun on other bands and on our sunny beaches.

PORTUGAL:
New regulations will become effective in Portugal on 1 June 2009. While existing licence categories (A, B, and C) are maintained, there will be three new licence classes (1, 2 and 3) for those who get licensed after 1 June. Current "ordinary" callsigns will be kept as they are, but special events (including contests) will be issued with callsigns from the new series. The new prefix allocations are as follows:
INDIVIDUAL STATIONS
Portugal CT7, CS7, CR7 (depending on licence class)
Azores CT8, CS8, CR8 (depending on licence class)
Madeira CT9, CS9, CR9 (depending on licence class)
NON-PROPRIETARY STATIONS
Portugal CQ0, CS5; CR0 (civil defence)
Azores CQ1, CS4; CR0 (civil defence)

Madeira CQ2, CS3; CR0 (civil defence)
SPECIAL EVENTS
Portugal CQ7, CR5, CR6, CS2
Azores CQ8, CR1, CR2
Madeira CQ3, CQ9, CR3
Foreign amateurs who go and operate under a CEPT licence will have to use CT7/homecall from Portugal, CT8/homecall from the Azores and CT9/homecall from Madeira. CEPT "novice" licencees will have to use CS7/hc, CS8/hc and CS9/hc as appropriate. The new legislation can be found at http://www.icp.pt/render.jsp?contentId=931324

Hi friends
FRANCE - – GLORIEUSES.
As indicated several weeks ago, no civilian will be included in the crew which os going to Gloriosos, next month. It had been confirmed that it will be first a Military mission.
Nothing was possible to do to make changes in this Forces Authorities decision.
Finally the crew is composed of :
F5PRU - Yves Michel
F5RQQ - Jean Marc
F5IRO - Freddy
F4EGS - Philippe
F5TLN – Sylvain
Thanks to the Provins ARC, F6KOP loans, three stations will be active ; a fourth will be set up and could be used with no particular mode or bands affectation.
Mission permitting, the crew wil appear in the two major July contests, the IARU HF and the RSGB IOTA.
Know that the crew , instead of maintenance jobs, has an other assistance mission by the Armies Information and Public Relation group which will go to Glorieuses along. This group is composed of an Officer, a director and a cameraman.
The callsign asked is not known yet , but it is expected in the next days.

Andorra, C3. Correction in Call. I´ll be on Andorra as_ C37NL _ (http://www.6metersonline.com/c37nl.html) from the 8th to till the 14th of June operating on 6m. Hilltop + long yagi. Almost clear shot to EU and NA. Jose, EA7KW 19 May, 2009 (UKSMG ann.) 20 May 2009 - 14 Jun. 2009
Addendum. QSL information, Unio de Radioaficionats Andorrans, P.O. Box 1150, Andorra La Vella AD552, Andorra (Jose EA7KW) 4 Jun. 2009 - 14 Jun. 2009
San Andres, HK0. Correction in Call. A QSP from Andy N8OFS says; K7BV Caribbean 2009 . 5JØBV DXpedition San Andres, June 18 (1700Z) - 29 (1600Z), 2009 EK92DM _http://qth.com/k7bv/caribe2009/_ (http://qth.com/k7bv/caribe2009/) 4 Jun. 2009 - 5 Jul. 2009
Kyrgystan, EX. A QSP from Lance W7GJ says; Mark your calendars and get ready for JT65A mode now! Operators EX7MW (UN8GC) and EX8MLT will use a kw amp and 6M8GJ yagi beaming out over the lake on both moonrise and moonset from August 16 to 22. Of particular interest is the fact that horizon-only NA stations will get a chance to work this well-equipped station on both their moonrises and moonsets. 4 Jun. 2009 - 22 Aug. 2009
Maldives, 8Q. A QSP from Lance W7GJ says; Experienced DXpeditioner and

EME'er Pierre HB9QQ, will be operating as 8Q7QQ in MJ64JH June 29 to July 10, with a 6 element yagi and 500w overlooking the ocean on his moonsets. The windows look especially good during the last few days of June for horizon-only stations in the eastern half of the USA, since they will also have moonrises during Pierre's moonsets and cndx for EME will be very favorable then. Of course, EU stations with elevation will also be able to contact him during those times. 4 Jun. 2009 - 10 Jul. 2009
Japan, JA. JJ2JQF/0, JH9UYZ/0 plan to be active from Awa Island Niigata prefecture from June 26-30 They will be on 1.9~430MHz CW, SSB, FM. AM(RTTY) + (SAT)(1200MHz) QSL via their home call. You can go direct or via the bureau. Distributed by Yuki JI6KVR (Maurice F5NQL) 4 Jun. 2009 - 30 Jun. 2009

Bonjour à Tous
FRANCE – GLORIEUSES.
Comme préalablement indiqué, il n'y aura pas de civils dans 'équipe qui se rend au Glorieuses. Il s'ait avant tout d'une opération militaire Les opérateurs n'ont pu en aucun cas influer sur cette décision.
L'équipe définitive est composée de :
F5PRU - Yves Michel
F5RQQ - Jean Marc
F5IRO - Freddy
F4EGS - Philippe
F5TLN – Sylvain
Grâce aux prêts de matériel du RC de Provins, F6KOP, nous aurons trois stations opérationnelles plus une non affectée, en secours .
Les participations à l'IARU HGF et au RSGB IOTA , sont quasiment acquises/.
Sachez que l'équipe a entre autres missions d'assurer une participation aux travaux de l'équipe du SIRPA, qui sera sur l'île sous la direction d'un officier, d'un réalisateur et d'un caméraman.

L’indicatif n’est toujours pas attribué, nous l’attendons sous quelques jours.

65ème anniversaire du Débarquement
Michel, F6IPS signale que certains bulletins ont publié un indicatif erroné concernant son activité autour du 65ème anniversaire du Débarquement de Normandie :
Il convient de lire :
A partir d’aujourd’hui 5 juin et jusqu’au 14, il est actif avec l’ indicatif TM6SME (et non TM5 comme certains l’ont publié par erreur).
Michel est le QSL manager pour les QSL et le Diplôme attaché (pour deux contacts 2 bandes ou 2 modes) .
Merci Michel, F6IPS.

K5D QSL STATUS ---> Bob Schenck,? N2OO? and? his? team? have? finished? OQRS
requests received through about 4 May. OQRS QSL processing will? be? resumed
shortly, and the system continues to be available for QSL requests.
The team is now focusing on the direct mail in the same order? as? the? mail
was received. Bob continues to do the log processing after? which? the? QSLs
will be mailed gradually by members of his QSL? processing? team.? As? of? 2
June they have confirmed 26,353 QSOs, and "it will surely be? a? few? months
before we can become current".
The first large batch on CONFIRMED? QSOs? ONLY? will? be? uploaded? to? LoTW
within the next week: "by only uploading confirmed QSOs (in? batches)",? Bob
says, "we think that this is? a? fair? compromise? that? is? a? win/win? for
everyone involved". The balance of the full log will be? uploaded? in? early
2010.
For the time being, please do not contact the QSL manager about QSL? issues,
but visit www.k5d.us (http://www.k5d.us) for current QSL status. Bob will be? happy? to?

My name is Marie and my father is Larry Duncan (K4WLS). I am writing to let you know that my dad is in grave condition and we are expecting him to pass soon. His radios and ham shack were one of the few things we always knew would be part of anywhere we lived and an enormous part of his life, especially these last 10 years. I know he was offline a lot the past few years but I think he would want you all to know his status.

Thank you all for being part of his life and a community he always enjoyed and supported. I will post another announcement once he has passed and we have details about the service and his last requests. Please feel free to contact me with any questions.

Peace,

Marie

The very last ANARTS Contest takes place this coming weekend.

ANARTS have been promoting RTTY for many years and have given many of us a lot of fun with their annual DX RTTY contest. Please help make this the biggest and best ANARTS contest ever as a tribute to all our friends past and present in the group down there.

BARTG are running the contest and you can find the rules at
http://www.bartg.org.uk/documents/ANARTS%20rules%202009.pdf

All logs should be sent to anarts@... and you can address any questions to the same address.

All,

Dad passed at 6:38 a.m. (EST) this morning. He wasn't alone and he wasn't in the hospital and he looked much more peaceful when I saw him this morning. We don't have details on the chapel service yet but are hoping it will be either tomorrow, June 10th, or the morning of June 11th. He will also have military ceremony at the veteran's cemetery in Salisbury, NC, but that will take a few days to arrange. The family is doing fairly well, we were all able to say our goodbyes and were happy he had good end-of-life care.

Thank all of you from the bottom of our hearts for your love, support, thoughts, and prayers. You made a very difficult situation easier and we are eternally grateful. I will send details on the services as we know them. You can contact me (704-277-4642) or my mom, Mary, (704-830-6620) if necessary.

Peace,

Marie

Hi friends

Press Release :
The Glorieuses 2009 team gathered at Frank’s F4AJQ the last week end , June 6 and 7 , with some KOP Team members.
During these two days , all the time was spent to tune the antennas , to teach the dxpeditionners about their setting, and to cordinate all of the packages.
Finally, 4 complete stations, with each at least a 800 watts PA will be settled on Glorioso main island, to be active as closer as possible of 24h a day.
The antenna farm will consist of 2 Spiderbeam 10-15-20 – an other for 12-17.30 – An Inverted L, for 160m, one V10, one V80 andone HF2V 80-40.
Some other vertical elements are packed too; so is also a K9AY array receiving system.
A 6 meters station will monitor the Magic band, but only into a G5RV.
The complete crew (we hope it will not happen new changes) consists of :
F5IRO Freddy – F5PRU Yves – F5RQQ Jean-Marc – F5TLN Sylvain - F4EGS Philippe and three SIRPA agents : Florence (YL) journalist, Yann director and cameraman and Didier cameraman and sound engeneer
We thanks a lot _Jeff F6AOJ_ (javascript:emailclick(email4())) , _Floyd N5FG_ (javascript:emailclick(email5())) , _Toshi JA1ELY_ (javascript:emailclick(email7())) , _Mike UAØM_ (javascript:emailclick(email8())) E, _Lee ZL2AL_ (javascript:emailclick(email6())) , who will be our pilot stations.
Floyd, N5FG, Jeff F6AOJ., were more than ever making big efforts in the back office, thanks again..
About the callsign :
For the First time, Gloriosos will be active under the new French Antarctic and Australes Territories (TAAF) regulation so the callsign claimed is :
FT5GA. For which the confirmation is pending.
From the year 2005, the “Iles Eparses “ , - Gloriosos, Tromelin, Juan da Nova and Europa - are now put under the TAAF authority.
The future callsigns will be issued as follow:
FR/G becomes FTxG Gloriosos
FR/E becomes FtxE, Europa
FR/T becomes FTxT, Tromelin
FR/J becomes FTxJ, Juan da Nova
No change for FTxW (Crozet), FTxY (Terre Adélie), FTxX (Kerguelen) et FTxZ (Amsterdam)

Bonsoir à tous
Communiqué de Presse
L'équipe Glorieuses 2009 s'est réunie chez Franck, F4AJQ avec le « KOP
Team » les 6 et 7 juin. Les deux journées ont été consacrées à la mise au
point des antennes et la coordination du matériel.
4 stations seront emportées au lieu de trois et seront QRV 24/24 :
2 Antennes Spiderbeam 10-15-20 – 1 antenne Spiderbeam 12-17.30 – 1
antenne 160 en L – 1 V40 – 1V80 – 1 HF2V 80-40 plus un certains nombres d'
éléments afin d'améliorer le rendement des bandes basses ainsi qu'une K9AY.
Les quatre stations seront équipées d'amplificateurs linéaires d'un
minimum de 800 W HF – 1 station 6 mètres sera en écoute permanente avec une
G5RV.
Cinq opérateurs seront finalement présents au lieu de 4. Il s'agit donc de
F5IRO Freddy – F5PRU Yves – F5RQQ Jean-marc – F5TLN Sylvain - F4EGS
Philippe plus trois journalistes du SIRPA : Florence (YL) journaliste, Yann
réalisateur caméraman et Didier caméraman et preneur de son.
Les stations pilotes que nous remercions sont : _Jeff F6AOJ_
(javascript:emailclick(email4())) , _Floyd N5FG_ (javascript:emailclick(email5())) ,
Toshi JA1ELY (javascript:emailclick(email7())) , _Mike UAØM_
(javascript:emailclick(email8())) E, _Lee ZL2AL_ (javascript:emailclick(email6())) .
Nous remercions plus particulièrement pour toute leur action Floyd, N5FG,
Jeff F6AOJ.
L'indicatif sera probablement FT5GA. Nous en attendons la confirmation.
En effet, depuis 2005 et le passage des îles éparses sous l'administration
des Terres Australes et Antarctiques Françaises, les indicatifs seront
désormais donnés comme suit :
FR/G devient FTxG
FR/E devient FTxE
FR/T devient FTxT
FR/J devient FTxJ
FTxW (Crozet), FTxY (Terre Adélie), FTxX (Kerguelen) et FTxZ (Amsterdam)
ne changent pas.

The JUNE 2009 Issue #906-A files have been uploaded to the Golist web site.
Due to internet outages for me today there is a problem with the normal download.
Please download as usual, but you will have to rename the? go906-a.new file
back to go906-a.exe and then proceed as usual.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.? http://golist.net/dlauth.cfm
?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

Folks,
??? Due to the internet connection problems from my ISP,
the files I uploaded ARE NOT WORKING.
??? When my internet is restored I will delete the current files
and upload all the files again.
??? I will resend the upload message when the good files have
been uploaded.
??? Sorry for the problems I have caused.

I.C.P.O. Bulletin (June 11 - 19, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

11/06/2009: Gerd/DK8NT and Horst/DL8NBM will be active June 11-17th as homecall/p from Helgoland's (EU-127) smaller neighbour island "the Dune" (N-15 for the German Islands Award, WLOTA 2130). It will be something between a vacation-style and a "serious" DXpedition. They will be active mainly in CW, and may occasionally switch to SSB or PSK. Power will be 100 Watts maximum, and they will experiment with simple wire antennas: a triple leg for 30m and up, a 40/80m double dipole for Europe, and a 40m (and maybe 80m) vertical for DX. QSLs via home calls (Bureau or direct, no e-QSL). [DK8NT]

11/06/2009: The APRE - Sao Paulo association of Radioamadores will be active from Ilha da Moela (SA-071, DIB SP-06, DFB SP-07, ARLHS BRA-043, TWLHD WLH PY-031, WLOTA 1335, WW Loc. GG65UW) as PR2R from June 11-14th. The Expedition is part of a project of more complex dimensions, that consist of placing on air all blockhouses, islands and lighthouses of the State of Sao Paulo. Team members incude Irineu/PY2IA, Marcelo/PY2OMT, Thiago/PY2TLB, Claudio/PY3NZ, Felipe/PU2OVA, Filipe/PU2TEA and Thiago/PU2TJQ. QRV 80-2 meters, CW/SSB and 2m FM. QSL via PY2OP, direct or Bureau. U.S. COUNTY HUNTING - USA-CA

KI4GKA/KG4NNK - Rick and Shelia - 6/14/2009 to 6/14/2009 - SSB Only
We are back on the road in our quest to run all of the counties of
Kentucky in 2009. Sorry to have taken May off but it was unavoidable. We
plan to get an early start since it will be slow going on the
mountainous roads of Eastern Kentucky. If anyone is desperate for a
specific county, please let us know to be listening for you. Reception
in the mountains is not always good. Our planned route will be Madison,
Estill, Jackson, Owsley, Lee, Breathitt, Knott, Floyd, Pike, Magoffin,
Morgan, Wolfe, Powell, Clark. Some of these counties may be run more
than once since the roads crisscross the county lines. [County Hunter

MAJOR PACIFIC DXPEDITIONS (Update). After his recent trip from the Pacific, Team leader, Hrane/YT1AD confirms that an international team of 14 individuals are organizing DXpeditions for amateur radio activity from Tokelau (ZK3), Canton Island (T31 - Central Kiribati) and Wallis Island (FW) over 22 days next year (in 2010). The tentative schedule is as follows:
September 25-29th - Traveling by boat from Fiji (3D2) to Samoa (KH8)
September 29th - Loading in Apia; departing Apia to Fakaofo Atoll in the Republic of Tokelau Island group
September 30th - Arriving Fakaofo Atoll
October 1-3rd - Activity on the air from Tokelau
October 3rd - Afternoon departure from Fakaofo Atoll to the Island of Canton (Central Kiribati)
October 4th - Traveling to Canton Island
October 5th - Arriving at Canton Island
October 6-10th - Activity on the air from Canton Island
October 10th - Afternoon activity/departure from Canton Island
October 12th - Arriving at Wallis Island (FW)
October 14th - Departure from Wallis Island
October 16th - Arriving at Fiji Islands
More information will be forthcoming. [OPDX Bulletin]

PACIFIC TOUR. Karl, DL2FAG, is going on another "holiday-DXpedition", this time to the Pacific and plans to operate from three locations later in the year. His tentative schedule and callsigns are as follows:
Niue - He will operate as ZK2DL from Namukulu, Niue Island (OC-040), between October 19th and November 7th. Activity will be holiday style on 80-10 meters, mainly on RTTY, PSK and SSB.
New Zealand - He will operate sporadically from the South Island of New Zealand (OC-134, WLOTA 0342), as ZL4/DL2FAG between November 8-18th. Activity will be on 40-10 meters, mainly on RTTY, PSK and SSB.
Samoa Islands - Karl will end his trip as 5W0KH from Apia, Upolu Island (OC-097, WLOTA 1944) between November 18-30th. Again, activity will be on 80-10 meters, mainly on RTTY, PSK and SSB.
QSL for all callsigns is via DL2FAG, direct or Bureau.
Karl will be operating from all locations on the usual DX frequencies. Watch Karl's Web page for possible updates, and he will have a log search on the site (not sure if it will be active during his operations). His Web page is at: www.qsl.net/dl2fag/

Gerard F2JD is back to Philippines for 5 months, at least. He hopes to renew his previous licence as DU1/G0SHN. He will visit some islands during his stay. QSL via F6AJA. [F6AJA]

Press Release n° 2

As indicated several weeks ago, no civilian will be included in the crew which os going to Gloriosos, next month. It had been confirmed that it will be first a Military mission.

Nothing was possible to do to make changes in this Forces Authorities decision.

Finally the crew is composed of :

F5PRU - Yves Michel
F5RQQ - Jean Marc
F5IRO - Freddy
F4EGS - Philippe
F5TLN ??" Sylvain

Thanks to the Provins ARC, F6KOP loans, three stations will be active ; a fourth will be set up and could be used with no particular mode or bands affectation.

Mission permitting, the crew wil appear in the two major July contests, the IARU HF and the RSGB IOTA.

Know that the crew , instead of maintenance jobs, has an other assistance mission by the Armies Information and Public Relation group which will go to Glorieuses along. This group is composed of an Officer, a director and a cameraman.

The callsign asked is not known yet , but it is expected in the next days.

GUANTANAMO Bay:

Scott, KG4DCS, is active using call sign KG4WM as time permits from
Guantanamo Bay for approximately one week (thru June 18). He began
operations on Thursday June 11 and will operate as his work schedule
allows.

He will try to be up each day on SSB at approx. 2300z on or near 14.260 as
conditions allow. He will also use other bands and modes including RTTY as
soon as we get him configured.

From: Keith Martin G0GFQ keith@...

Subject: GB2OH "Oxburgh Hall"

Oxburgh Hall, Norfolk was built in 1482 by the Bedingfield family, who still live in parts of the house but the property now maintained by the National Trust. Sir Edmund Bedingfeld was granted a license of castellation by Edward IV, he built this medieval, moated manor house as a glorious status symbol, romantically adorned in the nature of a castle.

Bittern DX Group members will be operating with callsign of GB2OH on the 19th - 21st June as a C.A.S.H.O.T.A. award activation from the beautiful grounds. Their reference number for the property is G-154 and they will be active on all bands, but mostly SSB. A special QSL card has been printed for the event which is available via the Bureau or Direct from Dave Edwards M?CNP (QTHR).

The SES coincides with Father's Day and a "Boys and their Toys" weekend, where local clubs will be exhibiting their hobbies. Everything from remote controlled helicopters, planes with flying displays and boats to scale model traction engines and train layouts, a great day out for all the family.

Hi friends

FAROE:

OY/SP6IXF and OY/SP7VC will be operating from the Faeroe Islands
in IP61 grid square between 10 and 16 August

We plan to be active on 160m-6m SSB and 2m (Random 144355.0 MHz)
Meteorscatter FSK441
in Perseids. For VHF is 2M5WL Yagi and 6el.Yagi for 6m.
Our HF antenna system will consist of Spiderbeam, R-7 and INV-L for
80-160m + beverages.
Each band will be with PA (GS-35 for 2m and GU-43 for HF+6m).
Maybe it will be possible for SP7VC/MM to be active across the "marine
grid square"
on 2 and 6m on the way from Denmark via Shetlands to the Faeroes
(IC-706 + 4EL. Yagi 2m + vertical 6m) JO37,27,17,18,19,09 and IP 80,81,71

This month we are highlighting three more team members. You can read all their history at _www.midway2009.com/meettheops3.html_ (http://www.midway2009.com/meettheops3.html) .

Many of the team members were at Dayton and took advantage of being together by conducting their first meeting as a group. They also enjoyed meeting the DXers that are always in attendance.

We are still accepting contributions and all donations received are greatly appreciated. Remember, contributing is easy and fast and can be forwarded several ways. You can visit the _www.midway2009.com_ (http://www.midway2009.com/) web
site and use Pay Pal or a credit card or by the U.S. Mail. All contributions are noted on the web site and depending on the level of support will be noted on the DXpedition QSL. And the Midway Store is always open and available for your purchase of Midway souvenirs.

Our web site also now shows take offs to numerous areas around the world. Take a look at these and see your direction.

US COUNTIES AWARD

This coming weekend I plan to work portable from Lake Whitney (in Hill County), Texas.

Most operating should be CW, but a little SSB possibly thrown into the mix. SO
if there are those who need Hill County or my FISTS number for anything I should likely be on the air to hand out my number.

Catch you on the air soon!

Four letter suffixes in Australia

It is still only little known that there are also callsigns issued with a four letter suffix in "down under". These callsigns have been issued to Foundation Lincence holders since 2005. All Foundation class suffixes begin with an "F" plus three more letters. Raj,VK4FRAJ, the son of Eddie,VK4AN, is probably the only OP with such a call operating also in CW. It is not very easy to describe this callsign in CW. Raj is allowed to work with a maximum of 10 watts in CW and SSB on 80m/40m/15m/10m.

AUSTRALIE:
Suffixes d'indicatif à 4 lettres.

Peu d’entre nous ont sans doute remarqué la présence sur l’air d’
indicatifs australiens comportant un suffixe à 4 lettres.
Ces indicatifs ont été distribués dans le cadre de la Foundation Licence,
licence novice destinée à amener les jeunes au radio amateurisme, depuis 2005.
Tous les suffixes à 4 lettres commencent par la lettre F (Foundation),
suivie de trois autres lettres.
Raj,VK4FRAJ, le fils d’ Eddie,VK4AN, est actuellement probablement le seul
a trafiquer àla fois en CW et SSB. Il est autorisé avec 10 watts en CW/SSB
sur 80m/40m/15m/10m.
On peut le féliciter car son indicatif n’est pas forcément très aisé à
transmettre en CW.
Merci DXNL.

The JUNE 2009 Issue #906-B files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.? http://golist.net/dlauth.cfm
?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

19/06/2009: GB0ZLB will be on the air June 19-21st for the Zetland Life Boat at Redcar, Yorkshire, England (IOTA EU-005, WLOTA 1841, WAB: NZ

62). Just a quick reminder, Redcar Lifeboat Day is on Saturday 20 June 2009! The Zetland is the 'Oldest Lifeboat in the World' built in 1802 and still on display at the Zetland Lifeboat Museum, in Redcar. Over 200 years ago Zetland was built by a Yorkshireman, Henry Greathead, from Richmond who set up as a boat builder and made the first lifeboat Original. The 11th lifeboat operated by the Teesbay Lifeboat and Shipwreck Society, she was christened Zetland in honour of the Lord of the Manor from Shetland. The Zetland remained in service until 1880 saving over 500 lives. In 1864 the RNLI took over the when a new boat Crossley was launched at Redcar. Zetland was hauled to the beach and ordered destroyed. However the townfolk so strongly resented this and it was hurriedly arranged that Redcar could keep the boat as long as she did not compete with the Crossley. For many years the work continued culminating in the rescue of the brig LUNA in 1880 when three lifeboats were required for the rescue. The station will be active on the HF and VHF bands. QSL via the RSGB Bureau. [GB2RS]

K8MR - Jim - June 20, 2009 to June 21, 2009 - SSB and CW
I'll be mobile in the West Virginia QSO Party on Saturday, June 20. Although the contest starts at 1600z, I'll be at another event in MD earlier in the day and don't expect to get to WV until 1900-2000z. Once there, I'll cover: Jefferson, Berkeley, Hampshire, Mineral, Grant, Tucker, Randolph, Barbour, Upshur, Lewis, Harrison, Marion, Monongalia, Ohio, Brooke, and Hancock. There will be detours through VA and PA during the non-contiguous counties. I'll have 80-40-20-15 available, both modes. Contest frequencies are up 40 KHz on CW; 3800, 7200, 14250 on SSB. Note that there are some old web links for the WVQP that show it being on Sunday. It is NOT on Sunday! Correct times are 1600z Saturday to 0200z Sunday. [County Hunter Web]

WA4PGM - Kyle - 1* - 6/20/09 to 6/20/09 - SSB and CW - ECC accepted
W8V/mobile (wa4pgm) will run the following counties in West Virginia: Monroe, Greenbrier, Summers, Raleigh, Mercer, Fayette, Nicholas, Webster, Braxton, Gilmer, Clay, Calhoun, Roane, Lewis, Upshur, Barbour, Harrison, Taylor, Marion, Monongalia, Preston.
CW-3540, 7040, 14040, 21040, 28040 kHz
SSB-3800, 7200, 14250, 21300, 28400 kHz
Will try CH freqs if not already busy otherwise please tune +/- the above listed. Several mobiles will be out during the West Virginia QSO Party. Join in the fun! [County Hunter Web]

Midway Island 2009 - Press Release Number 4
By N4XP, Tom Harrell, and WB4JTT, Dave Johnson

Planning and arrangements have now become happenings. Equipment and loaner gear is being shipped or staged for shipment later.

We have added three new operators to the team, James 9V1YC, Arnie N6HC and Tom ND2T. With these three additions come years of experience and only add to the overall team experience now in place. The makeup of the team is as follows: KH7U, W8GEX, W8CAA, W6OSP, N4XP, ND2T, N6HC, and 9V1YC.

This month we are highlighting three more team members. You can read all their history at www.midway2009.com/meettheops3.html

Many of the team members were at Dayton and took advantage of being together by conducting their first meeting as a group. They also enjoyed meeting the DXers that are always in attendance.

We are still accepting contributions and all donations received are greatly appreciated. Remember, contributing is easy and fast and can be forwarded several ways. You can visit the www.midway2009.com web site and use Pay Pal or a credit card or by the U.S. Mail. All contributions are noted on the web site and depending on the level of ort will be noted on the DXpedition QSL. And the Midway Store is always open and available for your purchase of Midway souvenirs. Our web site also now shows take offs to numerous areas around the world. Take a look at these and see your direction.

Pictures from CT7/CU8AT are online now.
Activity from Armona Island and also from SW Natural Park.

RAC Bulletin 2009-021E - RAC members at CITEL Ottawa meeting.
2009-06-15

From June 2nd to 5th, there was a CITEL PCC.II meeting held in Ottawa. Well over 100 delegates from countries of the Americas gathered for a

meeting preparatory to the next World Radio Conference that is to be held in Geneva late in 2011. Almost every item on the WRC Agenda were discussed with a goal to find common ground that would be supported by the CITEL countries. Amateurs were represented by Daniel Lamoureux, VE2KA, and Dario Jurado, HP1DJ for the IARU Region 2. Jon Siverling, WB3ERA was on the USA delegation and Ken Pulfer, VE3PU, Bryan Rawlings, VE3QN and Jim Dean, VE3IQ were on the Canadian delegation.

Some subjects of interest to Amateur Radio were discussed. On BPL, a drafting group was formed, headed by Canada and tasked to present BPL standards for adoption at the next PCC.II meeting in November at Washington, USA. Canada and the USA presented Preliminary Views on Agenda Item 1.23. A common paper was produced and adopted by the plenary that most probably will be the basis of a joint Region 2 proposal at an upcoming meeting. Also, we kept an eye on Agenda Items 1.14, 1.15 and 1.22 that, although not of direct interest to Amateur Radio, could affect us depending on the positions adopted.

SWEDEN :
Large dish 23 cm EME activity - SK6OSO - Onsala Space Observatory

The West Coast Microwave Group of Sweden will make use of the 25.6m
antenna at the Onsala Space Observatory just south of Gothenburg (JO57XJ) for
23cm EME on July 18/19. The call will be SK6OSO and we plan activity for two
complete moon passes. The antenna is polar mounted and can track down to the
horizon. Further information to be announced on www.sk6yh.org as we get
closer to operation. We would very much like to work a lot of well equipped
terrestrial 23 cm stations. As the at horizon time for a particular location
is time limited, we strongly urge also small first time EME stations to set
up for being able to make use of elevation in order to track the moon. We
will use circular polarization and therefore recommend marginal stations to
use circular polarization in order to optimize the link budget. We will
use both CW and SSB, but no digital modes will be used. We do hope to be able
to work all the well established 23 cm EME stations during this weekend as
well. For the West Coast Microwave Group

A challenge for us is to keep the weight allowance
under control. The charter aircraft limits us to
1400 pounds total weight. That includes body weight
for the team (3), personal items, equipment, antennas,
computers, food, EVERYTHING. The weight creeps upward
pretty fast and must be watched carefully.

It looks like the low bands will still be very productive
ones as Cycle 24 lingers. I personally am pleased and
excited to have the Battle Creek Special going with us.
There seems to be lots of interest on 160 by the EU's
and others as well.

One thing that we are "not" is experience RTTY operators.
However, the recent few weeks we have equipped our
stations with the necessary computer interface, software,
etc. and becoming a bit more enlighten on RTTY operation.
We've made a number of contacts and pleased to have this
set up and ready. NCDXF in particular encouraged us to
include RTTY.

Web traffic continues to increase from world-wide QTH's.
Certainly, we know CY0 not one of the most rare spots..
but it does look like many are looking for it to fill in
a mode/band combo and hopefully it'll be an interesting
event and promote activity for our wonderful hobby.
Thanks..we appreciate the support; we can't express that
enough!! We look forward to working you.

Hi friends
Because of Ham Messe in Friedrichshafen, please send your last information to be published by next Tuesday , 1000 utc. Back on the job on Monday June 29th afternoon.
Thanks, F5NQL.,

SK:
Pascal, F5JSD has received a mail from Jack (ex R1FJT), with the information of his QSL manager, Vic, UA4RC's passing on Jun 2009, 16th.
Jack wrote from the _ua4rc@..._ (mailto:ua4rc@...) , address.

Tks Pascal, F5JSD.

SABLE ISLAND:
A challenge for us is to keep the weight allowance under control. The charter aircraft limits us to 1400 pounds total weight. That includes body weight for the team (3), personal items, equipment, antennas, computers, food, EVERYTHING. The weight creeps upward pretty fast and must be watched carefully.

It looks like the low bands will still be very productive ones as Cycle 24 lingers. I personally am pleased and excited to have the Battle Creek Special going with us.
There seems to be lots of interest on 160 by the EU's and others as well.
One thing that we are "not" is experience RTTY operators. However, the recent few weeks we have equipped our stations with the necessary computer interface, software, etc. and becoming a bit more enlighten on RTTY operation. We've made a number of contacts and pleased to have this set up and ready. NCDXF in particular encouraged us to include RTTY.
Web traffic continues to increase from world-wide QTH's. Certainly, we know CY0 not
one of the most rare spots.. but it does look like many are looking for it to fill in a mode/band combo and hopefully it'll be an interesting event and promote activity for our wonderful
hobby.
Thanks..we appreciate the support; we can't express that enough!! We look forward to working you.

Pascal, F5JSD a reçu Jack (ex R1FJT), l'avis de décès de son QSL manager Vic, UA4RC, sk le 15 juin 2009.
Jack a semble t il accès à l'adresse : ua4rc@...
Merci Pascal, F5JSD.

SABLE : CY0
Notre challenge permanent consiste à contrôler le poids du matériel emmené afin qu'il reste en deçà du seuil autorisé.
Nous sommes limités à environ 650 kg (1400 livres) par le commandant du Charter .
Ceci inclus le poids des trois opérateurs, leurs effets personnels l' équipement, les antennes , les transceivers et PC, les accessoires de station et la nourriture.,
Bef 650 kg en tout !!!
Le poids grimpe très vite, aussi nous devons être très attentifs.
Il semble que les bandes basses sont toujours très intéressantes tant que le Cycle 24 persiste. Je suis personnellement très heureux et impatient de voir ce que donnera la Battle Creek Special que nous emmenons.
Il semble que le 160m représente un intérêt certain pour les Européens (pour les autres aussi bien sûr).
Notre regret est notre manque d'expérience en RTTY. Cependant les quelques semaines dernières nous avons équipé nos PC en interfaces , logiciels etc… et sommes devenus un peu moins ignares dans ce mode. Nous vons fait beaucoup de contacts , nous permettant de décider d'inclure ce mode dans le plan de trafic, nous y sommes prêts
Le NCDXF ous a particulièrement incité à faire du RTTY et nous les avons écoutés.

Le trafic WEB est de plus en plus intense , en provenance du monde entier.

Nous savons que CY0, n'est sans doute pas l'un des most wanted, mais il semble que nombre d'OM le recherchent pour compléter leur mode/bande et nous espérons que cette présence sur les bandes aidera à la promotion de notre passe-temps sur les bandes.
Nous vous remercions et apprécions votre aide , soyez en assurés et nous sommes impatients de vous contacter.

GRAHAM TAYLOR

Could you please include the following in your DX news sheet at some time in the near future.

GW/IOTA EU-124 - The Strumblehead DX and Contest group have now sealed the final permission to activate Ramsey Island (EU-124), off the West Wales coast, from the Royal Society for the Protection of Birds who own the island. They will be active from 18:00 24th July through to 14:00 27th July taking in the IOTA contest. They will be active using the club call MC0SHL for the whole duration of the operation, and using MW9W in the contest. They will be on all bands from 80M through to 10M SSB. There is also some 30M RTTY planned by G1VDP if the other guys allow him, with participation in the last 80M Club Championships DATA section. They will be operational using generators as power. Radios used will consist of 2 K3's and a Yaesu FT1000MP MkV and amplifiers. Antennas will consist of a Hexbeam, a windom and dipoles. Most of the activation is for the WAB award scheme as the square is semi rare and has not been activated for some time. The team will be on from the farm for a few days before and after using the GB0WFF for the World Flora and Fauna award see http://www.wff44.com for award details, and using the MC0SHL club call and erecting a tower for Rob MW0RLJ. The island will not only count for the WAB award but will also count for the WFF award. A special QSL card printed for both club calls, full details are on the groups website http://www.mc0shl.com . QSL via the groups manager M0URX.

The JUNE 2009-C Issue #906 files have been uploaded to the Golist web site.
??? The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
??? Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.? http://golist.net/dlauth.cfm
?? It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
?? Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

01/07/2009: Original 13 Colonies Independence Day Special Event - July 1st-4th 2009
http://home.comcast.net/~dzabawa/ThirteenColonies.htm
NY (K2A)-NJ (K2I)-RI (K2C)-GA (K2G)-PA (K2M)-NH (K2K)-SC (K2L)-VA (K2B)-CT (K2D)-DE (K2E)-MD (K2F)-MA (K2H)-NC (K2J) 1300 UTC July 1st to 0400 UTC July 5th 2009, all thirteen 1776 original colonies will be on the air. One S.E. station per Colony state. A full color certificate printed on heavy card stock or parchment paper, with a map and the state flags of all the 1776 colony states will be available to to each station who works one or more or ALL of the Special Event stations. Each colony state worked will be marked by the shield of the United States by each state flag. Special event all signs will be used.
All bands will be in play except 60M and the WARC bands. The Colony stations will be operating on or near the "13" of each band (Eg.14.213, 14.313, 7.213, et.). 2 meter and 6 meter simplex is encouraged. For this event 2 meter repeater contacts WILL be allowed - WHY? because all of the SE stations are on the east coast and are very close to each other. It will be harder for these states to contact each other, also 40m-160m is encouraged because of this.

03/07/2009: Special callsign EV6ZK is used annually by radiohams of the cities of Orsha and Baran' to celebrate the Day of independence of Byelorussia on July 3rd. Expect activity on all bands and modes. QSL via UA3FDX. [QRZ.com]

03/07/2009: The Radio Club of a boarding school of city of Gomel EW8ZZ, uses the special callsign EV8DP annually to celebrate the Day of independence of Byelorussia on July 3rd. Activity will be on all bands and modes. QSL via UA3FDX. [QRZ.com]

03/07/2009: Over the weekend of 3 to 5 July, Birmingham Scout County will be holding their 'Live the Magic Camp' at Blackwell Court near Bromsgrove Worcestershire, England (EU-005, WLOTA 1841). The camp will be attended by around 3000 Beavers, Cubs, Scouts and Leaders from the Birmingham area. Apart from the usual scouting activities, special event station GB4LTM will be active over the weekend, giving all present a chance to experience amateur radio. GB4TLM plans to run HF, 2m and 70cm as well as Echolink and will offer Radio Orienteering as an activity. QSL via the RSGB Bureau. [GB2RS]

SILENT KEYS -

Jim Tabor, KU5S passed away at his home in Greenwood, Arkansas on May 27; he was 54. A longtime ARRL member, Tabor was head of Kangaroo Tabor Software (www.taborsoft.com/), which published various programs for radio amateurs, such as the WinCAP propagation prediction software, GeoAlert-Extreme Wizard, Beacon-Time Wizard and ID Wizard.

Ray Maude, VE3WT (VE3LWJ, VE3UDX) lost his battle against his illness Saturday, June 13, 2009. Ray was one of the original members of NFIDXA, which of course eventually teamed up with Contest Club Ontario (CCO). Although not too active recently, he was a big DX chaser over the years, and acheived a lot.

Victor V. Gorokhov, UA4RC has been reported Silent Key June 16, 2009.

Steven Gibbs, GU3MBS became a Silent Key over the weekend (June 20-21, 2009).

Joe Phillips, K8QOE, who served as ARRL Ohio Section Manager since 1998, passed away suddenly at his home on Saturday, June 20. He was 68.

The museum is located in an underground emergency wartime command and control bunker, and houses a collection of aviation artefacts. Displays cover the history of Wellesbourne Mountford airfield, together with various aircraft components and memorabilia. There is a small aircraft park, including the nose of Vulcan XA903. This aircraft was used to test the Olympus engines of Concorde in the 1960s, and a small dedicated group of enthusiasts is trying to restore some of the additional test equipment used in this aircraft. Elsewhere on the airfield, Vulcan XM655 undertakes taxi runs on occasions. They will be active on the HF and VHF bands, using mainly CW. QSL via the RSGB Bureau. [GB2RS]

27/06/2009: In 1939 the radio equipment of all radio amateurs was ordered to be confiscated for the duration of the war, but many amateurs became Voluntary Interceptors in their own homes. These VIs assisted the Allies in their task of intercepting encrypted Enigma messages transmitted in Morse code, which were then passed to the code breakers at Bletchley Park. The Scarborough Special Events group will be on the air as GB70VI during the weekend 27 to 28 June to mark the commencement of the amateur radio Voluntary Interceptors scheme. This event will coincide with Armed Forces Day on 27 June when Scarborough, England

(EU-005, WLOTA 1841) will be hosting the largest event planned for the region. It will be an opportunity for everyone to pay tribute to our Armed Forces, past, present and future. Activity will be on HF SSB and CW. The QSL will feature a photograph of a Navy four-rotor Enigma machine and the QSL route is via the Bureau or direct to club call G0OOO. [GB2RS]

01/07/2009: Original 13 Colonies Independence Day Special Event - July 1st-4th 2009
http://home.comcast.net/~dzabawa/ThirteenColonies.htm
NY (K2A)-NJ (K2I)-RI (K2C)-GA (K2G)-PA (K2M)-NH (K2K)-SC (K2L)-VA (K2B)-CT (K2D)-DE (K2E)-MD (K2F)-MA (K2H)-NC (K2J) 1300 UTC July 1st to 0400 UTC July 5th 2009, all thirteen 1776 original colonies will be on the air. One S.E. station per Colony state. A full color certificate printed on heavy card stock or parchment paper, with a map and the state flags of all the 1776 colony states will be available to to each station who works one or more or ALL of the Special Event stations. Each colony state worked will be marked by the shield of the United States by each state flag. Special event all signs will be used.
All bands will be in play except 60M and the WARC bands. The Colony stations will be operating on or near the "13" of each band (Eg.14.213, 14.313, 7.213, et.). 2 meter and 6 meter simplex is encouraged. For this event 2 meter repeater contacts WILL be allowed - WHY? because all of the SE stations are on the east coast and are very close to each other. It will be harder for these states to contact each other, also 40m-160m is encouraged because of this.

SILENT KEYS -

Jim Tabor, KU5S passed away at his home in Greenwood, Arkansas on May 27; he was 54. A longtime ARRL member, Tabor was head of Kangaroo Tabor Software (www.taborsoft.com/), which published various programs for radio amateurs, such as the WinCAP propagation prediction software, GeoAlert-Extreme Wizard, Beacon-Time Wizard and ID Wizard.

Ray Maude, VE3WT (VE3LWJ, VE3UDX) lost his battle against his illness Saturday, June 13, 2009. Ray was one of the original members of NFIDXA, which of course eventually teamed up with Contest Club Ontario (CCO). Although not too active recently, he was a big DX chaser over the years, and acheived a lot.

Victor V. Gorokhov, UA4RC has been reported Silent Key June 16, 2009.

Steven Gibbs, GU3MBS became a Silent Key over the weekend (June 20-21, 2009).

Joe Phillips, K8QOE, who served as ARRL Ohio Section Manager since 1998, passed away suddenly at his home on Saturday, June 20. He was 68.

UPDATE -
==========
NCDXF PRESS RELEASE 26 June 2009

From: NCDXF

Subject: WØYK, Ed Muns, appointed to NCDXF Advisory Board

The Northern California DX Foundation Board of Directors is pleased to announce the appointment of Ed Muns, WØYK, as an Advisor to the NCDXF Board of Directors. Ed's primary duty, along with Doug Bender, WW6D, will be working with the NCDXF website: http://www.ncdxf.org

Ed became interested in ham radio in high school, working 40 meter CW into Asia in the early morning hours before school. During college, his license expired and he rejoined DXing ten years later in the early part of his 32-year career at Hewlett-Packard. Ed's interest in DXing quickly morphed into contesting where a lot of DX participates. All of his ham radio time today is spent contesting, chasing DX and joining DXpeditions occasionally. Favoring CW, Ed can sometimes be found on SSB as well.

Thanks to his contest club's (NCCC) campaign to win the club competition gavel in the 2004 ARRL RTTY Round-Up, Ed got started in that mode. He holds the SOHP world record in the contest, operating with his P49X call sign, having broken the world record in 2006, 2007 and 2009. In CQ WPX RTTY, Ed also holds the SOHP world record, having broken it in 2007, 2008 and 2009. In 2008, he operated the CQWW RTTY contest, winning SOHP.

Ed was on the YK0A team in 1994 and has operated as 6Y0A and 6Y4A as well as holding the 7J1ACJ call sign. From Aruba, where he holds a permanent visitor license as P49X, he has operated nearly a dozen times, primarily CW and RTTY contests. He has operated from the HC8N mega-station in a M2 operation in the CQWW RTTY, winning the world. He recently joined the Radio Expeditions team, of VP6DX fame, on the management team with specific focus on funding.

Ed has taught the RTTY curriculum at Contest University at Dayton in 2008 and 2009 as well as at Contest Academy at Visalia in 2009. He is the contest manager and log checker for the NCJ NA RTTY Sprint and both CQ RTTY contests: CQWW and CQ WPX. He serves on the CQ Contest Advisory Board. For the NCCC, Ed manages the NCCC, CQP and NCCC Sprint web sites as well as the club's various email reflectors. He has published several articles in the NCJ.

We think Ed will have a lot of insight for what will be needed to keep the NCDXF website a dynamic and useful website for DXers.

The NCDXF Board of Directors wants to thank the many individuals who have contributed support to NCDXF. We realize that these financial times have put a strain on many of us, but think about the thrill of working a "new one" or band counter and its impact on your country totals - priceless, right? If you are currently not a member, please consider contributing to support future DXpeditions.

Since May 2008, NCDXF has provided financial help to the following DXpeditions:

4W6R Timor Lorosa'e
VK9XWW Christmas Island
VK9CJW Cocos-Keeling
OJ0B Market Reef
VK9DWX Willis Island
A5100A Bhutan
E44M Palestine (Bethlehem)
FW5RE Wallis & Fortuna
K5D Desecheo Island
VK9LA Lord Howe Island
S04R Western Sahara

Hopefully you worked one or more of these DXpeditions!

Contributions can now easily be made on-line using our SSL secured web server: https://www.ncdxf.org/donate

VK9LA qsling update

After much haggling with the Australian Customs Department and
negotiating with a customs clearance broker we have finally received the
qsl cards from Czech Republic. Originally I envisaged having all direct
qsling done by the end of June however this is not possible now.
On July 2nd I will be away from home for 2 months on a family caravaning
holiday.
Prior to going I am doing as many as is possible and doing daily
postings. As such many of you will receive your cards within a few days
but there will be also many that will not.
Please be patient and do not flood me with email questions. Everytime I
have to answer an email means less qsling done before departure.
If you are one of the lucky ones that receive your qsl card in the next
few days and find missing qsos be advised it is because they were not in
the log.

My radio activity has been limited for several years, but I just went through my log book and was amazed at how few of you I had worked.
I would have thought I would have worked many more of you considering that I do try to work some in most contests and am always on the DX cluster watching spots.
In the future, I will try to find more of you on the air. I certainly would like

GLORIOSOS –
A lot of chatting heard in Ham Radio about the FT5GA next op, seems to be wrong, even published further in some Ham Bulletins.
Some hams have not yet understand that it’s not first a ham dxpedition.
Ham radio is allowed only to keep busy the servicemen operator’s sparetime.
Didier, F5OGL, will send a Press release soon.

VK9LA qsling update

After much haggling with the Australian Customs Department and negotiating with a customs clearance broker we have finally received the qsl cards from Czech Republic. Originally I envisaged having all direct qsling done by the end of June however this is not possible now.
On July 2nd I will be away from home for 2 months on a family caravaning holiday.
Prior to going I am doing as many as is possible and doing daily postings. As such many of you will receive your cards within a few days but there will be also many that will not.
Please be patient and do not flood me with email questions. Everytime I have to answer an email means less qsling done before departure.
If you are one of the lucky ones that receive your qsl card in the next few days and find missing qsos be advised it is because they were not in the log.

3B7FQ in August '09

Rachid, 3B8FQ, has received approval and will activate St. Brandon Island as 3B7FQ again in August. Rachid believes this may be the last trip to St. Brandon for the next five years. As in his previous travels to 3B6FQ & 3B7FQ, this will be a working trip with time shared for maintenance on the island's meteorological equipment. Travel to 3B7 will be by boat, departing Mauritius on 10 August and returning from St. Brandon on 30 August '09. Operation will be SSB & CW on 40-10M. Another trip to Agalega Is. as 3B6FQ is possible in Nov '09. QSL 3B7FQ and Rachid's other calls via K5XK, per info on QRZ.com.

GLORIOSOS 2009
OFFICIAL PRESS RELEASE
The Gloriosos 2009 is a new time postponed because of flight problems.
We think, however, the dxpedition could be begin at the end of August.
The runway on Grande Glorieuse suffers heavy problems of stability which have to be solved very quickly, in next July, to allow again the jumbo planes landing with full security .
This postponing will allow us to include new operators, David, F8CRS, and Bernard, F5LPY .
Seven operators will go to FT5G.
Three stations will be active 24h a day and the 3rd dedicated to monitor the 6 meter . This last station will be used back on HF if propagation opens the lower bands.
The length of the stay is always scheduled for three weeks if no other change will happen.
We must once again remain all of you, that the landing on these islands is very difficult and the Go signal is given only when all the security measures are in place, known and applied.
We have to thank a lot for their help, the French Australes and Antarctic Territories Administration, The South Indian Ocean Zone Forces Headquarter, and the Commandment of the French Foreign Legion detachment in Mayotte.

Official comments by Didier, F5OGL, team leader
A part we can say, even if the first event which made the July 2009 Gloriosos, postponed haven’t happen, the today’s aircrash of the Yemenia A310 at sea, after 2 hours of flight, is a new event which might have made the DXpedition postponed in any case. The plane which will have
been used to come from La Reunion to Glorieuses, is now on the zone and participates to the researches of survivings for an unknown lenght of time...

These events and to reinforce the runway have been considered by the French Authorities.
For the most security, please wait again with us some more weeks.

GLORIEUSES 2009:
COMMUNIQUE OFFICIEL.
L’opération Glorieuses 2009 va être reportée de quelques semaines en raison de problèmes de transport. Elle devrait voir son début vers la fin du mois d’août. Ce report va nous permettre d’intégrer un opérateur de plus,

F8CRS David et Bernard, F5LPY, ce qui portera l’équipe radio à 7 opérateurs.
Ce report inattendu est du à un problème de stabilité de la piste de la Grande Glorieuses qui va être résolu au début du mois de juillet.
L’opération est toujours prévue pour une durée de trois semaines environ et aucun autre changement ne devrait avoir lieu. 3 stations HF et une station 6 mètres seront opérationnelles 24 heures sur 24.
Je rappelle que l’accès par avion à ces îles est extrêmement difficile et cette opération ne peut avoir lieu que si toutes les conditions de sécurité sont réunies.
J’en profite pour remercier pour toute l’aide qu’ils nous ont déjà apportées l’administration des Terres Australes et Antarctiques Françaises , l’ Etat Major des Forces Armées de la Zone Sud de l’Océan Indien ,et le détachement de Légion Etrangère de Mayotte.
A très bientôt pour des nouvelles plus précises
Gloriosos 2009 crew
Commentaire officiel par F5OGL, Chef d'Expédition :
En dehors de ce qui précède, je puis affirmer que même si les événements qui avaient amené les autorités à repousser l'éxpédition ne s'étaient pas produits, le crash la nuit dernière de l'A310 de Yemenia au large de Moroni, aurait suffit a tout repousser.
Aujourd'hui toutes la flotte aérienne française disponible et deux autres navires de la Marine Nationale sont sur zone et participent aux rrecherches de survivants, corps, boites noires, morceaux d'épave etc ..
La durée de cette astreinte est pour le moment inconnue.
Ce crash et le renforcement de la piste d'atterrissage sur Grande Glorieuse ont été pris en compte par l'Administration.
Pour un maximum de sécurité, merci de patienter avec nous encore quelques semaines.
Merci et 73

DX SUMMIT SOON READY FOR 2-WAY COMMUNICATION WITH OVER 110.000 MONTHLY USERS

www.dxsummit.fi/dxspots.aspx

The Radio Arcala DX Summit portal is celebrating the milestone of ?one million monthly hits over a course of several months and more than 110.000 people spending an average of 35 minutes on the site daily. The top five nations using the service are as follows:
USA (28.5%) followed by Germany, United Kingdom, Italy and Japan. In total, users from 170 DXCC countries have entered the service portal.
With new visits approaching 19% during the month of May, an increase of users is quite evident. In the process of making the DX Summit service more focused on younger user segments and non-amateur radio population, two features have been added recently. Each spotting and spotted callsign is automatically linked to QRZ.COM, providing a more human link to the personal profiles of people and to their pictures. Just click the callsigns and you will automatically enter the relevant QRZ.COM page.
Additionally, each line carries the name of the DXCC country spotted. In a few months time, custom selected filters will be provided to the public allowing users to receive personalized spots that they would like to receive. While initially the selected spots will be sent to your personal email address, the ultimate aim is to offer an SMS (short message service) option to DX Summit users.
This service is a non-profit exercise for Radio Arcala, OH8X but we are pleased to recognize Yasme Foundation and Nokia Corporation for their support of further development and defrayment of operating expenses of the portal. As the servers are in the hands of a professional service provider in the United States, some interruptions are recorded and changing the service provider is in process.
Also, a Help Desk for regular users and for S/W developers is being set up. Here it is suggested that DX Summit open a channel for accepting voluntary donations to keep the Help Desk operational. On a trial basis, through PayPal, DX Summit accepts donations and, additionally, following a donation of 10 USD or 10 EUR, Radio Arcala will send you a full-color Radio Arcala wall calendar postpaid. This option is valid only for the months of July and August.
www.dxsummit.fi/donate.aspx
We thank you for your support of and interest in Radio Arcala DX Summit.

The *JULY 2009 Issue #907* files have been uploaded to the Golist web site.
The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file.? Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.? http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

Michigan Ham Killed in Tower Collapse

Larry Prelog, KE4PM, of Niles, Michigan, has died as the result of a tower collapse at his club's Field Day site. According to the local "Herald-Palladium" newspaper, Prelog was helping to set up antennas for the Blossomland Amateur Radio Club's Field Day operation last Saturday when the tower he was climbing on buckled and collapsed. The newspaper report says Prelog, 57, was a professional installer of radio systems and was using all proper safety equipment and procedures. A club spokesman quoted in the article said "the tower failed at the base" and fell over sideways. Prelog was at the top. There are conflicting reports about the tower's height. The club says it was 30 feet tall; an initial police report had said 60 feet. KE4PM is survived by his wife, Tammy, four children and two grandchildren. [CQ Newsroom]

Whitney Ricky "Richard" Payne, AB2RJ, of Tijeras, New Mexico, passed away on Sunday, June 21, 2009 in Albuquerque, New Mexico. He was 57.

Members of the NA-128 Contest Group will activate the special callsign CG2ØØI (Charly Golf Two Hundred India) from Ile Verte (IOTA NA-128, C.IS.A QC-015, Grid FN58, ARLHS CAN-224, WLOTA 1404) between July 23-26, 2009 during the IOTA Contest to commemorate the 200th anniversary of the lighthouse.
Operators will be: VA2RC, VA2ZO, VE2EDA, VE2EBK, VE2FSK, VE2TKH, VE2MTK and VE2QRA.
The group will operate many stations from the lighthouse keeper’s quarters on all bands (6 to 160 meters) and all major modes (AO-51, SSB, CW and RTTY/PSK31). During the IOTA Contest, a station will be dedicated to the contest exclusively on SBB or CW. The QSL is via VE2CQ (bureau or direct).
Built in 1809, the Ile Verte lighthouse is celebrating its 200th anniversary and many special activities will take place all summer long. This lighthouse is the oldest in the St-Laurence River and the third oldest in Canada. It was declared an historical monument in 1976 by The Historic Sites and Monuments Board of Canada. A special stamp showing the lighthouse was released by Canada Post in 1984. The lighthouse is 54 feet high and is the main attraction on the island. It is open to the public and there is also an inn where you can stay overnight.
Any money received through our qsl manager will be given to the Corporation des maisons du phare de l'Île Verte in order to help them with the restauration of the lighthouse. If you would like to make a donation, you can do

so by visiting the Corporation’s Web site at:

CANADA :
Québec le 6 avril 2009,
Dans le cadre du 200e anniversaire du phare de l'Île Verte (1809-2009), le « Groupe de contest NA-128 » activera la station CG200I (charly-golf deux cents india) (IOTA NA-128, C.I.S.A QC-015, Grid FN58, ARLHS CAN-224, WLOTA 1404) du 23 au 26 juillet pour l'IOTA Contest 2009. Les opérateurs seront: VA2RC, VA2ZO, VE2EDA, VE2EBK, VE2FSK, VE2TKH, VE2MTK et VE2QRA.
Le « QSL manager » sera VE2CQ (bureau ou direct).
Le site d'opération sera situé dans la maison du gardien du phare. Les stations seront actives sur les bandes du 6 au 160 mètres (AO-51, CW, SSB, RTTY, PSK31) et une station sera en permanence sur la bande des 6 mètres. Durant le concours, la station sera active soit en CW ou en SSB. D'autres stations seront actives avant et après le concours. Les opérateurs sont reçus par la Corporation des maisons du phare de l'Île Verte et le groupe tient à

remercier les responsables de la Corporation pour leur hospitalité et leur entière coopération à cette activité.
Construit en 1809, le phare de l'Île Verte célèbre son 200e anniversaire. Il est le plus ancien phare du Saint-Laurent et le troisième en âge au Canada. Il a été désigné comme monument historique en 1976 par la Commission des lieux et monuments historiques du Canada. Un timbre souvenir a d' ailleurs été émis par Poste Canada en 1984 à l'effigie du phare. D'une hauteur de dix sept mètres, le phare constitue la principale attraction touristique de l'île. Il est accessible au public et il est possible d'y séjourner.
Des activités spéciales sont organisées pour la saison estivale 2009 afin de commémorer l'événement et permettre de financer la restauration du phare et de ses bâtiments. Ainsi, les contributions reçues avec les cartes QSL seront remises à la Corporation des maisons du phare de l'Île Verte. Ceux qui aimeraient collaborer directement au financement peuvent se rendre sur le site de la Corporation.

Bonjour à tous
France :
"TM0HQ" les bleus comptent sur vous !
Pour l'édition 2009 qui aura lieu les 11 et 12 juillet, le team TM0HQ
REF-Union poursuit son renforcement en vue de remporter l'épreuve.
Les stations HQ sont les stations représentant dans chaque pays
l'association nationale des radioamateurs, elles ont la particularité d'être
autorisées par le règlement de ce contest à émettre simultanément sur les 6 bandes
(160-80-40-20-15-10 mètres) et dans les deux modes (SSB et CW).
Chaque contact compte! C'est pourquoi l'équipe TM0HQ encourage les
radioamateurs français à établir le maximum de contacts avec elle, soit
potentiellement 12 contacts! TM0HQ passera RST + REF, les autres stations RST + Zone
ITU.
Une récompense sera attribuée par commission des concours aux aux stations
ayant contacté TM0HQ le plus grand nombre de fois.
Tout le monde peut contribuer au succès de l'IARU HF World Championship en
France,
- soit individuellement,
- soit collectivement en participant ou renforçant l'équipe TM0HQ avec:
- des stations RUN avec des opérateurs RUN et multi TM0HQ,
- des stations qui cherchent les multi pour TM0HQ et les spottent sur le
"tunnel" tout en faisant des QSO avec leur call, en particulier avec TM0HQ,
- des opérateurs dans les stations TM0HQ, en quantité suffisante mais pas
plus car il faut aussi garder beaucoup de stations pour donner des points à
TM0HQ !
Pour constituer une station RUN, il faut de très bonnes antennes, aux bons
endroits en France, par exemple à l'extrême Est pour les bandes basses, et
des opérateurs confirmés et habitués aux contests internationaux.

Le manager de l'équipe TMHQ 2009 est F5FLN

Hi friends

GB100SS Wab TR15 loc; jo 01 kj IOTA EU120 ISLE OF SHEPPEY BY THE MEDWAY REYNET GROUP AND CHRIS M0DOL, MORRIS M0MAO, AND GARY M0NNH .
ON ALL BANDS FROM 25TH TILL 27TH INCLUDING THE IOTA CONTEST
100 years ago, in 1909, Sheppey became a leading centre in this country in the race to fly machines that were powered and capable of being controlled, not at the discretion of the wind, but at the will of the pilot. In those early days Britain lagged far behind the U.S.A. and Europe – mainly France. It was there in 1908 that the first Britons learned to fly and the Short brothers, (balloon makers and aeronautical engineers to the Aero Club), were to meet the Wright brothers who contracted the Shorts to build 'Wright Flyers' under license.
In February 1909 the (Royal) Aero Club and the Short brothers acquired Mussel Manor and grounds for a flying field at Shellbeach, Leysdown. Here the Short Brothers Ltd established the world's first airplane factory and were visited several times by the Wright brothers.
Many notable British aviation pioneers including J.T.C.Moore-Brabazon, the Hon. C.S. Rolls, Griffith Brewer, A.V.Roe, Frank McClean, T.O.M.Sopwith and many others carried out the first flights and conducted their flying experiments here.
The Hon.C.S.Rolls commenced practicing with a Short/Wright glider at Standford Hill, Eastchurch in late July 1909 and on the 20th November was the first to land a Short / Wright Biplane on a new flying field at Eastchurch.
The Short brothers and the (Royal) Aero Club moved their main operations to Eastchurch in early 1910.
In order to celebrate the achievements of these men who led the way, Eastchurch Parish Council formed an Aviation Centenary Committee, to organise events under the banner 'Sky Sheppey 2009'. Planning for this is now well under way. Initially planned as a small village event this has now developed significantly with the participation of aviation and other organisations, including the Royal Navy - Fleet Air Arm who will be celebrating the centenary of Naval Aviation in 2009..
It is our hope that we do justice to these daring pioneers, some of whom, including the Hon.C.S.Rolls and C.S.Grace, lost their lives in the process.
Tks M0DOL, Chris

_ (http://www.odxg.org/) Bonjour à tous
GB100SS Wab TR15 loc; jo 01 kj IOTA EU120 , Ile de SHEPPEY par le MEDWAY
REYNET GROUP , CHRIS M0DOL, MORRIS M0MAO, et GARY M0NNH .
Toutes bandes du 25 au 27 juillet compris le concours IOTA.
Il y a 100 ans en 1909, , Sheppey devint un centre de pointe pour la
course au plus lourd que l’air , contrôlé par l’homme et non pas seulement par
les vents.
Dans ces moments la France et les Etats Unis caracolaient largement en
tête des recherches . En 1908, les Britanniques comprirent qu’il fallait , eux
aussi , s’y mettre et les frères Short , fabricants de ballons et
ingénieurs de l’Aéro Club, rencontrèrent les frères Wright. Ils se mirent d’accord
par contrat et les frères Short commencèrent à construire des avions

Wright sous licence.
En février 1909, le Royal Aero Club et les frères Short achetèrent le Manoir Mussel à Shellbeach, Leysdown et les champs alentour furent transformés en terrain d'aviation.
C'est là que les frères Short construisirent la première usine d'avions, la Short Brothers Ltd, qui reçut plusieurs fois l visite des Wright .
De nombreux pionniers aviateurs britanniques de grande classe tels J.T.C.Moore-Brabazon, the Hon. C.S. Rolls, Griffith Brewer, A.V.Roe, Frank McClean, T.O.M.Sopwith , et bien d'autres débutèrent ici.
Hon.C.S.Rolls commença avec un planeur Short/Wright à Standford Hill, Eastchurch en juillet 1909 et le 20 nvembre il inaugurait le nouveau terrain d' Eastchurch, en y faisant atterrir un Short / Wright .

toutes les activités du Royal Aero Club et des frères Short étaient définitivement transférées à Eastchurch en 1910.
Pour célébrer ce centenaire, le Conseil Municipal d' Eastchurch a constitué le Comité du Centenaire de l'Aviation. Les manifestations en rapport sont sous le parrainage de la 'Sky Sheppey 2009'.
Prévu comme une fête de village , le centenaire bénéficie aujourd'hui de soutiens majeurs de l'Aviation et d'autres organisations comme la Royal Navy - Fleet Air Arm, qui célèbrent elles aussi le centenaire de l'Aviation 2009..
V'est notre souhait de rendre justice aux pionniers dont beaucoup, dont Hon.C.S.Rolls et C.S.Grace, perdirent la vie pour le progrès.

The *JULY 2009 Issue #907-A* files have been uploaded to the Golist web
site.
The weekly GoData files now include the LOTW information
and DXCC APPROVED OPERATIONS in the data file. Authenticated
EQSL users have been added to the data file, thanks to N5UP for this
data. I have started to accumulate data on DX Call Signs REJECTED by the
DXCC desk and their dates. Please send any of these rejections to me for
the Rejected project in GoWin. This Rejected list is also now in the weekly
data files.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser.? http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

I.C.P.O. Bulletin (July 09 - 17, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

08/07/2009: The German HAMs MD/DK1SG, MD/DG7SF, MD/DH1SBB, MD/DG1SBU, MD/DG3SHD, MD/DG5SBK, MD/DL1SPH, MD/DL8SAD, MD/DC5SAN and MD/DL6SBN will show up on the air from the Isle of Man (EU-116, WLOTA L 0449) between July 8-13th. They will work in SSB/CW/RTTY and PSK on 160m-10m using a wire pyramid for 160m/80m/40m, a Gap Voyager, a 5 band Spiderbeam on a 12m tower and a longwire. They will use the special callsign MD9Y (QSL direct via GD3YUM) during the upcoming IARU Contest. Listen for them on the usual IOTA frequencies. All QSL cards should be sent via the operator's homecalls. [DX Newsletter]

09/07/2009: Eduardo, CO8LY will be QRV 6 meters from Grid FL10, Cuba (NA-015, WLOTA L 0032), between July 9-13th. Activity will be on 50.102 MHz CW, 50.110 or 50.115 MHz SSB. QSL via EA7ADH. [N8OFS]

09/07/2009: ALAND ISLANDS, OH0/JA8BMK: Martti, OH2BH reports "Sailing out on Thursday morning (July 9) under command of captain Jaakko/OH1TX the group of Toshi/JA8BMK, Aki/OH1ZE and Martti/OH2BH will be setting the sail from the coast of Finland toward waters of Aland Islands (EU-002, WLOTA L 1373) in spite of a poor weather prediction. You can expect their activity starting late Thursday around 1400 UTC." Length of stay is not known at the present time. QSL via JA8BMK. {OH2BH]

09/07/2009: Hotang, YC0IEM will be active as YC0IEM/9 from Bali (OC-022, WLOTA L 2589) between July 9th and 27th. Expect activity on all bands/modes. QSL via IZ8CCW, direct or bureau. [F5NQL]

10/07/2009: Bob, K4UEE will be active from Kenya as 5Z4/K4UEE from July 10-17th, doing short term mission work. (see: www.410bridge.org/) He will be in Kwambekenya village located about 3-4 hours North of Nairobi. There are several different projects Bob will be involved in including a video project and demonstrating amateur radio in the local high school. He has an IC 706 MKII, and a 'Beam in a Bag'. The demonstration will occur next Monday and Tuesday (July 13th and 14th) from 2-5pm local time. Kenya is 7 hours ahead of us so time there would be 7-10 am EDST. Bob is hoping we will have propagation on 17m, and will be using 18.155 MHz. Just listen on and off as he will be doing some other instruction on his end and will not be transmitting for the entire 3 hours. You are welcome to call him periodically. Also, Bob hopes to be QRV for some DXing in the late evenings and early mornings local time from their hotel overlooking Lake Naivasha. He has a dipole for 30/40m and will concentrate on CW (of course). This is definitely not a DXpedition and operating time is limited. QSL via home call. [ZL2AL]

10/07/2009: A team from Wakefield and District Radio Society will be activating Holy island [aka Lindisfarne] (EU-120, WAB NU14, ARLHS ENG-224, TWLHD WLH G-011) off the Northumbrian coast from July 10-13th using the callsign GB1HI. QSL via M3ZYZ, direct or Bureau or eMail request. This operation also counts for the World Flora and Fauna Award (reference GFF-013). Further details are available on QRZ.com [Southgate ARC]

10/07/2009: Howard, WB4WXE will be active on 6 meters July 10-20th from the island of St. Lucia (NA-108, WLOTA L 1336, Grid FK93) as J6/WB4WXE. QRV with 6 element yagi and 350 watts. Operating site is situated at 2,000 feet ASL. Will also be on 17 meters plus others when 6m is quiet. QSL via home call, direct or by the bureau. [F5NQL]

10/07/2009: Look for VP9/WA4PGM to be active July 10-20th from Hamilton Parish, Bermuda (NA-005, WLOTA L 0201, WW Loc. FM72PI), with focus on 6 meters, using 5el yagi and 100W. QSL via home call, direct or bureau. [N8OFS]

FT5/G - GLORIOSO ISLANDS, AF-011
Confirming the news of last week the upcoming FT5GA DXpedition has been rescheduled to take place in August/September 2009. This opens the chance for two more operators David,F8CRS, and Bernard,F5LPY, to join the team. They will try to activate three stations simultaneously. If the DXpedition started as planned in July the whole schedule would be obsolete because the staff was looking for survivors of the crashed Airbus A310 of Yemenia Airlines. [DX Newsletter]

Less activity by 4U1ITU in the future:
Gerald Lander,HB9AJU, states that the callsign 4U1ITU will be put on the air only very seldom in the upcoming future. The restricted

activities are the result of a general assembly of the International Amateur Radio Clubs IARC in May. Several reasons led to this decision including increased security levels at the ITU headquarters, a changed recognition of amateur radio in international communication and last not least that 4U1ITU is not belonging to the most wanted countries anymore. The IARC decided to focus their activities on special modes or conference delegates and to limit all overnight and weekend activities as much as possible. Finally the new antennas were installed on top of the Varembe building. You can see them at:

8723. R1AND - what does it mean to be listed on the Golist as "logs on LoTW"

Yahoo group: GOLIST (2007 — 2010)
Date: 2009-07-11 14:27:53 UTC
From: Larry Gauthier (K8UT)
Topic: 8723 Message: 8723

Lately I've been working hard at confirming band/countries for the ARRL Challenge. I'm generally happy when the Golist states that a station has "logs on LoTW", for all the obvious reasons: faster turnaround; much cheaper; eliminates all the uncertainty about addresses, corrupt postal workers, IRCs vs green stamps, etc.

This morning I worked R1AND on 40m (a new band/country for me) and noticed that the Golist says "log on LoTW." Yippee! However, my old R1AND QSOs (1999) had never been LoTW-confirmed (nor were my direct QSLs <sigh>); their QRZ.COM entry says nothing about QSLing via LoTW; and the ARRL LoTW site lists R1AND's last upload as 11 July 2005.

I don't think this should qualify R1AND as having "logs on LoTW", and asked John to edit R1AND's Golist entry. A reasonable request? How does a station get listed as "logs on LoTW" in the first place? Or perhaps more important, how does it get de-listed?

Larry raises a valid question and one that I had to make a call on when
I decided to include LOTW stations in the Golist.
Here is how it works right now, hut it can change should the majority
dislike the current method.
I send out hundreds of emails to manager and dx stations to verify
routes,
managers and other info. LOTW and EQSL are one of those questions I ask.
The only time the situation gets confusing is when there are many
different Qsl
managers for the same call sign like R1AND and 3V8BB. I currently add a
station
to the LOTW when the manager tells me he has/will be uploading that dx
call to
LOTW. The upload maybe in the future, but I have it listed in the
Golist. If I do not
get a response from the manager, then I do not list it until a user has
told me they had
it confirmed by LOTW.
Lets look at a couple of examples and you tell which is the best method.
Station 3V8BB has 10 different manager for different time periods. Eight
of the
managers uploaded to LOTW and 2 did not. Do I list 3V8BB in the Golist
as LOTW?
Station R1AND has 5 different manager for different time periods, Only
one uploaded
to LOTW and the 4 did not, do I list R1AND in the Golist. Before you
answer, here is
what I WILL NOT do as I do not have the time nor records to support it.
I WILL NOT
list the dates of the uploaded logs to LOTW. ARRL will not provide me
with this info and
I will not be responsible for it. Now tell me what to do with the two
examples.
Please respond to the entire Golist reflector as I am really
interested in what you have to
say and think about this.

John,

My Ham radio computer crashed and of course the GOLIST went down with it. I have been trying to get it going again on my new computer, but so far I have been unsuccessful in getting the basic program installed. Downloading of new data still works fine, but without the program it does not do too much.

What do I need to do?

Well to add just a little more fuel to the discussion.
I do list 1B1AB in the Golist, but it is not valid for any awards that
I am aware of at ARRL or CQ. It is not even recognized by the ITU.
Should I list this family of stations?

Hi Folks
I was working on a small database problem and did some searches
on the Online database and discovered that it was not displaying the
data correctly. Not ssure how long it has been doing this as I never use
it to do any look ups. The web master and I have worked on the scripts
and it is now display the correct info. It still has a glitch that I
have not
been able to figure out. If a dx call has more than one Qsl Manager and
of couse more than one info field, it displays correctly all records but
then
it repeats all the records for each different manager/info field. Fills
up the
screen pretty good At least now you can understand the data displayed.
Are any of you Cold Fusion affictionados? The script is in CF and I
don't have any working knowledge of this language.

The *JULY 2009 Issue #907-B* files have been uploaded to the Golist web
site.
The weekly GoData files include DXCC APPROVED OPERATIONS in the
data file.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser. http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

I.C.P.O. Bulletin (July 16 - 24, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

14/07/2009: Pista, HA5GY is currently active from the island of Mallorca (DIE E-021, MIA MB-004, WLOTA 1902), Balearic Islands (EU-004) until July 20th as EA6/HA5GY/qrp with a FT-817 and LW, and inverted Vee antennas for 7-10-14 MHz. QSL via home call, direct or bureau. [HA0HW]

17/07/2009: Andy, DL7AT will be active July 17-24th as DL7AT/M from Norderney island (EU-047, N-05 for the German islands award). He will also activate the Norderney lighthouse (ARLHS FED-025, GLHA #39, WLH DL-021, WLOTA 1621). QSL via home call, direct or bureau. [rsgbiota.org]

17/07/2009: Robert/LA9QNA and his XYL Gro will be active as JW9QNA from the JW5E club station in Longyearbyen, Spitsbergen island (EU-026, WLOTA 0125), between July 17-22nd. Activity will include entries in the NA RTTY QSO Party (20m) and the CQ World Wide VHF Contest. QSL via LA9QNA. [OPDX Bulletin]

17/07/2009: For the CQ WW VHF contest W4APP will be heading to EM87. EM87, in the cental Appalachian coalfields, is one of the most needed grids east of the Mississippi. It appears to be the rarest grid in all of EM. It is characterized by a rural population, rough terrain, and poor road infrastructure. The operation will take place from the Breaks Interstate Park on the Va/Ky border in between Haysi (pronounced Hey Sigh) Va and Elkhorn City, Ky. They plan to be on the air no later than the afternoon of July 17th and plan to be active throughout the contest and throughout the evening on Sunday July 19th. Further info can be found at: www.w4app.com/ [N8OFS]

18/07/2009: Operators Luis CT1EEQ, Arlindo CT1EGW, Hermann CT3FN/HB9CRV, Antonio CU8AS, Jurgen DJ2VO and Ruedi HB9CQL will be active as CR2F between July 18-24th and July 27-31st from the Ribeirinha lighthouse (DFP FAZ-17, ARLHS AZO-020, WLH CU-007, WLOTA 1830, WW Loc. HM58QO), located at Cedros, on the island of Faial (EU-175, DIP AZ-007). QRV 80-6m using CW, SSB and RTTY. They plan to be active around 50.113 MHz with CR2W as call. The team will also participate in the RSGB IOTA Contest (July 25-26th), using the callsign CR2W, as a Multi-Single/Expedition entry. On July 29th and 30th operators Antonio/CU8AS, Hermann/CT3FN, Juergen/DJ2VO and Rudi/HB9CQL will be active from the Caldeira do Faial Natural Reserve (DPRN FF-212, WFF CTFF-46) using the callsign CR2N. QSL via CT1GFK, bureau OK; via email to cu8at@... . More information see: www.to-mk.com/neu/ . Online logs at: algarvedx.com/logonline/ [DE0MST]

18/07/2009: Members of the Nucleo de Radioamadores da Armada - NRA, namely Antonio/CT1CZT, Antonio/CT1EGH, Pedro/CT1EKY, Miguel/CT1ETL, Rodrigo/CT1BXT, Jose/CT4GN, Pedro/CT1JQC and Tony/CT1FFU will be active July 18th as CR6NRA from the Cabo da Roca lighthouse (DFP FES-01, ARLHS POR-007, Admiralty D 2108, WW Loc. IM58GS). This activation also counts for CT Flora and Fauna DPRN FF-011 and World Flora and Fauna WFF CTFF-011. QRV 80-10 meters, using SSB, CW and Digital modes, between 0800 - 1900 UTC. QSL via CS5NRA (QRZ.com). [CT1BWW]

18/07/2009: Alex, IK8YFU, and Giovanna, IZ8FEV will be active July 18-25th as IF9/IQ8PP from Favignana island (EU-054, IIA TP-011, MIA MI-025, WLOTA 1545). QSL via IK8YFU. [425 DX News]

18/07/2009: Operators Don/NN8B, Gary/KB8HTU, and Rich/K8HGY plan to activate Snake island (USi OH-052, Not IOTA), Guilford Lake, Columbiana County, Ohio, on July 18th. They will use the Triangle Amateur Radio Club callsign K8BLP. QRV mainly on 40 and 20 meters. QSL via K8BLP (QRZ.com). [USi]

18/07/2009: Rene/DL2JRM and Netti/DO6XX will be active from Vendsyssel-Thy / Nordjylland (EU-171, DIA NJ-001) using OZ/homecall/p from July 18th to August 1st, RSGB IOTA Contest (July 25-26th) included. QRV 80m-10m CW with 100W dipole/GP. QSL via home calls, direct or Bureau. [rsgbiota.org]

19/07/2009: Jean-Marc, F5SGI will be active from Belle Ile (EU-048, DIFM AT-015, WLOTA 0872, Grid IN87) from July 19-31st. He plans to operate CW on 80-6 meters, and to participate in the IOTA Contest. QSL via home call, direct or Bureau. [425 DX News]

19/07/2009: Once again members of King's Lynn Amateur Radio Club will be activating GB0CR from Castle Rising (CASHOTA G140, WAB TF62, WW Loc. JO02FT), near King's Lynn, in West Norfolk, on July 19th. QRV on all HF bands, using the club radio and a wire dipole. QSL via the RSGB bureau. [M0DOL]

19/07/2009: William, GM4UBJ will be active as homecall/p, holiday style operation, from the Isle of Skye (EU-008, IOSA NH07, SCOTIA CN14, WLOTA L 1626) from July 19-31st. He also plans to participate in the RSGB IOTA Contest (July 25-26th). QSL via home call direct, via the bureau, e-QSL and LOTW. [rsgbiota.org]

19/07/2009: Special event callsign GX4KPT/p will be aired July 19th from Courtenhall (CASHOTA reference G120, WAB SP75, WW Loc. IO92NE). Expect activity on as many HF bands and modes as propagation allows. QSL via M0DOL, direct or bureau. [M0DOL]

Her keel was laid down on 24 August 1944 by the Portsmouth Navy Yard in Kittery, Maine. She was launched on 1 January 1945 sponsored by Mrs. Slade D. Cutter, and commissioned on 28 April 1945 with Commander Slade D. Cutter in command. Initially, Requin carried heavier armament than usual for a fleet submarine, perhaps because Commander Cutter was one of the most decorated submarine skippers going to sea. She had an additional

five-inch/25-caliber deck gun, as well as two 24-tube five-inch (127 mm) rocket launchers, which were intended to be used to provide offshore bombardment during Operation Downfall, the planned invasion of Kyushu and Honshu. Their operating times will be roughly between 10 a.m. to 2 p.m. (+/- a few minutes) EST (1400 - 1800 UTC). A special QSL card will be sent to all contacts. Operation will be on 20 and 40 meters, only in the CW portion of the bands, of course. QSL via: North American QRP CW Club, RD 6 Box 122A, Kittaning, PA 16201 USA. [Southgate ARC]

SILENT KEYS -

James "Jim" E. Mullin, Mayfield Heights, Ohio - W8KKK SK:
This past week on Monday afternoon (July 6, 2009), Jim was taking down a 100' self supporting tower and the associated antennas with it. He had been up the tower two times in the placing of his gin pole, and the removal of the antennas. These trips were around rest breaks and lunch. It appears as if he was on his third trip up to re-position his gin pole to start taking apart and down the tower sections. His ground assistant had just finished taking some pictures of the tower and was putting his camera back in his car. As he turned away from the car he heard Jim hit the ground. He did not make any sound on his way down. It looks like his safety belt parted at one of the seams, and "Just let go." As of Saturday (July 11, 2009), his tool pouch and what was left of his belt were still on the tower at about the 98' level. Jim was 2 months shy of 70 years old.

Thomas F. Mc Duffie, KM6K and manager of the the San Diego HRO store passed away after suffering a stroke while driving to work July 10, 2009.

Long-time WAB square collector, SOTA Activator and Chaser Roy S. Hartley G0HDX, has passed away July 12, 2009, after suffering a suspected heart attack. Roy was on his way by train, from Lancashire, with fellow Summits on the Air Activator Phil Drew G1OPV to the Lake District to activate LD-056 Whitbarrow when Roy suffered the heart attack.

9G5XX - Abokwa Island AF-084, Ghana

DX World of Ham Radio received news from Silvano, I2YSB of an upcoming IOTA Dxpedition to Ghana. Location will be Abokwa Island AF-084.

Silvano states the 9G5XX team will meet later this week to discuss dates for the activation, which is looking likely to be sometime in November.

All information on 9G5XX will be available by this weekend and can be found at http://www.i2ysb.com/

Echoes of Apollo

A group of radio amateurs are planning a commemorative event to mark the 40th anniversary this month, of the Apollo 11 moon landing.

Called 'Echoes of Apollo', various activities are planned in July, for what the organisers describe as a 'Global Amateur Radio event'.

A number of historic sites in Australia and other countries will take part in this Echoes of Apollo event. HF radio stations will be set up near sites that took part in the original support for the Apollo 11 mission.

In Australia, most of these will have special call signs similar to those used by NASA in the original missions. Many of these sites will be staffed by people that took part in the original Apollo 11 mission as communications specialists.

The HF event is planned for the weekend and the Monday of 18-20th July.

You'll find more on Echoes of Apollo at their website http://echoesofapollo.com/ [Southgate ARC]

Midway Island 2009

Press Release Number 5 July 22, 2009

The K4M team has passed a very important milestone with the shipment this week of 2 tons of radios, linears, antennas (20 of them), radios (6), computers and interfaces, thousands of feet of coax and stubs, and various connectors, switches, wattmeters, and all the supplies you would expect from an operation on a remote Island. Below is a picture of a portion of the freight:

The gear will be stored in Hawaii until the supply ship leaves in 3 weeks to Midway.

Our charter flight to the Island is confirmed. The team is assembled. Fundraising continues on our website, www.midway2009.com <http://www.midway2009.com/> . If you haven't visited it in a while stop by and help support our effort. All pre expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXPedition*.*

This month we are highlighting three more team members. You can read all their history at

8757. Label Creep With RAC & DX4Win

When I print labels from the RAC (and WX4Win, for that matter), the labels print out in the top left corner and creep up an off the label as it prints down the page.

How do I set up the program/programs so this doesn't happen? I end up wasting a lot of labels!

The labels used are Avery 5160.

Thanks,

*Dick, I guess I see a little differently. For those DXer's that require Instant Gratification,
a confirmation via LOTW is available with a donation. For those DXer's that can wait till
the contacts are worked in the normal fashion, LOTW and Bureau is still an option.

LOTW has presented DXpeditions with a different problem. They are still in need of donations
and other financial help in putting these operations together and making it work. If they don't get
the funding to help this process, then there will be no DXpeditions. LOTW has no provisions to make
a donation to the DXPEDITION so, the groups have to work it another way.

Since I support many DXpeditions in two or more ways, this has never been a concern.
The ARRL says for a DXpedition to be valid for DXCC, they must confirm the contacts without charge.
This means you can work the DX today and you could get confirmation by either the bureau or LOTW
in 20 years. ARRL does not give a time table for confirmations to be made. SO, if a person donates
then the DXpedition group uses the best possible means to give you that confirmation as early as
possible, otherwise, you have to wait till all the work is done and the general mailing is made.
No different than it was 40 years ago except you can receive confirmation in some cases overnight.

If your group has more than 350 members, you may be experiencing problems like an out of date member list, new users not getting emails, or problems with unsubscribes.

See this blog post for background and to stay updated on where we stand with a fix:

http://tinyurl.com/RepDBbug
http://www.ygroupsblog.com/blog/2009/07/20/issue-update-new-members-not-showing-up-in-the-member-list/

And our apologies for the hassles we know this is causing. Solving this problem is the team's top priority.

P.S. If your group is less than 350 members or is experiencing other issues, the problem is almost certainly unrelated to this issue. As always, contact Customer Care if you need support from Yahoo.

The *JULY 2009 Issue #907-C* files have been uploaded to the Golist web
site.
The weekly GoData files include DXCC APPROVED OPERATIONS in the
data file.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser. http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

I.C.P.O. Bulletin (July 23 - 31, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

22/07/2009: Kostas/SV1DPI, Nikos/SV3BSF, Dimitris/SV1CIB and/Vasilis SV1DPJ will go to Kythira Island (EU-113, GIOTA INS-004, MIA MG-062 WLOTA L-1703) from late afternoon of July 22nd to July 26th. During the IOTA Contest the call will be SX8Z. Before the contest the operators will be active signing call/8. QSL for operators via bureau or direct. QSL for SX8Z via SV1DPI via direct or LotW. [SV1DPI]

23/07/2009: C6APR will be in the RSGB IOTA Contest (July 25-26th) from the Crooked Island Lodge, Pittstown Point, Crooked island (NA-113), Bahamas, as a Multi-operator, Mixed-mode, High Power, DXpediton entry. The team is Peter/W2GJ, Ed/K3IXD, Dallas/W3PP, and Jim/K4QO. Before and after the contest (from July 23 to 27th) C6APR will be on 80m to 10m including the WARC bands, CW and SSB. The team will sign C6AXD on RTTY and C6AQO on 6m (grid FL22). The calls are good for Bird Rock Lighthouse (ARLHS BAH-005, Admiralty J 4792) as well as IOTA NA-113 and Grid Locater FL22tt. All QSLs via K3IXD, direct or by the Bureau. [K3IXD]

23/07/2009: Members of the NA-128 Contest Group will activate the special callsign CG200I (Charly Golf Two Hundred India) from Ile Verte (NA-128, CIsA QC-015, Grid FN58) between July 23-26th, including an entry in the RSGB IOTA Contest (July 25-26th), to commemorate the 200th anniversary of the lighthouse (ARLHS CAN-244, WLOTA 1404). Operators mentioned are Frank/VA2RC, Martin/VA2ZO, Eric/VE2EDA, Dany/VE2EBK, Jean/VE2FSK, Steve/VE2TKH, Martin/VE2MTK and Guy/VE2QRA. The group will operate many stations from the lighthouse keeper's quarters on all bands (160-6 meters) and all major modes (AO-51, SSB, CW and RTTY/PSK31). During the IOTA Contest, a station will be dedicated to the contest exclusively on SBB or CW. The QSL is via VE2CQ, direct or Bureau. Note: NA-128 is made up of more than 45 islands, rocks and smaller reefs and more than half of them are accessible for future NA-128 expeditions. [VE2EBK]

23/07/2009: Members of the Dalkey Island Contest Group plan to activate Clare island (EU-121, WLOTA L 1935), County Mayo, for the forthcoming IOTA Contest which takes place July 25-26th. The callsign EJ1DD will be used in a '100 watt DXpedition' entry. QSL information is via EI7CC. Operators will be Paul/EI2CA, Paul/EI5DI, Tony/EI6EW, Peter/EI7CC, Sean/EI7CD, Seamus/EI8BP and Aidan/EI8CE. Look for activity also from the individual operators using the EJ prefix between July 23-27th (QSL via home calls). [F5NQL]

23/07/2009: David, EI3GKB will be active July 23-27th as EJ3GKB from the island of Inisheer [Irish: Inis Oírr] (IOTA EU-006, WLOTA 2314, WW Loc. IO53FB), Aran Islands, Co Galaway, including an entry in the RSGB IOTA Contest (July 25-26th). QRV 80-6 meters, before and after the IOTA contest. QSL direct only to EI3GKB (QRZ.com), with SASE/SAE and sufficient postage. [EI3GKB]

23/07/2009: The Cray Valley Radio Society will once again be active as G3RCV/p on the Isles of Scilly (EU-011) from July 23-28th on all bands, and we will sign M8C during the IOTA contest. There will be no 2 meter activity in the contest this year. QSL via G3RCV. [Pete's-DX-Newsdesk]

25/07/2009: Cezar, VE3LYC plans to operate as VY0O from the Ottawa Islands (NA-230, new one) for three full days between July 25th and 10 August 10th. Specific island's name and exact dates are not available at this time, but they will be announced a few days in advance of the operation. This will be Cezar's most difficult operation to date. The islands are 12-14 hours away from shore and transportation requires a large boat. Traditionally unstable weather pattern, unknown local landing conditions, high seas, the presence of ice chunks in Hudson Bay, potential presence of polar bears, all these and other logistical aspects make this trip extremely challenging. At this time Cezar seeks group and individual donors who understand and appreciate the difficult and expensive task ahead and are willing to be part of this effort. "Past support from EU stations has been disproportionate with their QSO demand (45% of QSOs but only 25% support for VY0A)", he says, but hopefully this situation will improve. [425 DX News]

Midway Island 2009

Press Release Number 5 July 22, 2009

The K4M team has passed a very important milestone with the shipment this week of 2 tons of radios, linears, antennas (20 of them), radios (6), computers and interfaces, thousands of feet of coax and stubs, and various connectors, switches, wattmeters, and all the supplies you would expect from an operation on a remote Island. Below is a picture of a portion of the freight:

The gear will be stored in Hawaii until the supply ship leaves in 3 weeks to Midway.

Our charter flight to the Island is confirmed. The team is assembled. Fundraising continues on our website, www.midway2009.com . If you haven't visited it in a while stop by and help support our effort. All pre expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXPedition.

This month we are highlighting three more team members. You can read all their history at http://www.midway2009.com/meettheops4.html

Hi all,

since years I try to QSL DX-peditions operated under HL0C/ - 2 - 4 and 5 from
various islands. I tried via bureau and directly. Never any reply since 2003.

Is there anyone who has a clue how to get these QSLs? There are several
new IOTAs for me.

Any help is really highly appreciated. Many thanks in advance!

Bonjour à tous

De retour de HB0, après 13jours d'activité et 1036 QSO réalisés le soir et tôt le matin, partagés entre CW (47 %), Modes Digitaux (35%) et Phonie (18 %). Le QTH était situé sur les hauteurs de Vaduz, avec un superbe dégagement sur la vallée du Rhin ... idéal pour la radio !

Le log est en ligne sur http://www.tuduri.net/f5lmj/Hb0/Hb0.htm et la carte QSL est prête à partir à l'impression. Tous les QSO seront confirmés par le bureau et sur LOTW.

>From ARRL Headquarters
Newington, CT July 30, 2009
To all radio amateurs

SB SPACE ARL ARLS005
ARLS005 Space Shuttle Endeavour to Deploy Student-Built Satellites

The space shuttle Endeavour is due to land Friday, July 31, but
before it leaves orbit it will deploy four student-built satellites,
all with telemetry downlinks in the 2 meter, or 70 cm, amateur
bands.

The twin spherical satellites -- named Castor and Pollux -- were
designed by students in cooperation with the Naval Research
Laboratory as part of the Atmospheric Neutral Density Experiment
(ANDE). Both satellites will transmit 1200-baud packet radio
telemetry on 145.825 MHz. Hams are encouraged to submit telemetry
reports with special QSLs and mission patches planned. Check the
ANDE Web site,
http://www.nasa.gov/mission_pages/station/science/experiments/STP-H2-ANDE.ht
ml
for updates.

Castor and Pollux will carry an FX.25 experiment that adds Forward
Error Correction to standard AX.25 packets. The hope is that FX.25
will improve communication efficiency while still being compatible
with existing packet equipment. The satellites will also
occasionally run GMSK/FX.25 modulation experiments at 9600 baud.

In addition to Castor and Pollux, Endeavour will also deploy student
satellites from the University of Texas and Texas A&M. The tiny
picosatellites, christened BEVO-1 and AggieSat2 respectively, are
part of an ambitious experiment that will ultimately culminate in
autonomous docking of picosats in orbit. For this mission, however,
BEVO-1 and AggieSat2 will launch as one unit and then separate to
collect position data and test a new NASA Global Positioning System
receiver known as DRAGON.

BEVO-1 will transmit Morse code beacons (20 WPM) or packet radio
data telemetry at 437.325 MHz. AggieSat2 will beacon at 436.250 MHz.
The satellites will primarily transmit 9600-baud packet telemetry
when over the United States. As with Castor and Pollux, reception

reports are welcome.

Orbiting at a relatively low altitude of 185 miles, these satellites should be easy to receive with standard FM transceivers and omnidirectional antennas. They should enjoy an operational life of 3-6 months and will likely re-enter the Earth's atmosphere within a year.

I.C.P.O. Bulletin (July 30 - August 07, 2009)
"Islands, Castles & Portable Operations"
Listing is by calendar date (day/month/year)
==========

30/07/2009: David, 3DA0DJ (GI4FUM/EI4DJ), will visit Swaziland for the third time between July 30th and August 11th. His team also includes Tony, 3DA0TB (G4LDL), Malcolm, 3DA0MH (GM3TAL), Gerry, 3DA0VA (M0VAA), Mike, 3DA0MM (NC4MM), and sowie Yuri, 3DA0EL (UT5EL). They plan to put up a scout station at the international Scout Camp located North of Manzini which will be active as 3DA0SS. The DXpedition team members will also operate using their individual callsigns from Hawane Resort near to Mbabane (WW Loc. KG53MS). They will use the antennas (for 160m-10m) which are already at the Hawane Resort operating two stations around the clock. QSL cards should be sent to the operator's homecall. The DXpedition homepage can be found at: http://www.gi4fum.co.uk/ [DX Newsletter]

30/07/2009: Jim, N6TJ, will once again be active from Ascension Island (AF-003, WLOTA L-1491) as ZD8Z between July 30th and August 7th. Activity will be on all bands CW/SSB. QSL via his new manager AI4U, direct or by the Bureau. [OPDX Bulletin]

31/07/2009: Merle/N6PYN and Brad/KA5CDJ plan to activate the Seal Islands (NA-239, new one) as N6PYN/KL7. They hope to be QRV 24/7 in late July (possibly early August) for at least two days. Their exact start date is not known, but will not be earlier than July 29th. QSL manager will be N7RO. They plan to operate SSB and CW on 20, 30 and 40 meters with 100 watts and a vertical dipole. [N6PYN]

31/07/2009: ZW6LH (PT2OP) and PR6S (PY6KW) will be active from several lighthouses in the state of Bahia July 31st to August 3rd, including participation in the ARLHS Lighthouse-Lightship Week (LLW). Both stations are valid for ARLHS, DFB (Brazilian Lighthhouses Awards) and the South American Lighthouses Award. QSL via homecalls. [PT7WA]

31/07/2009: Operators from DRAA (Dodecanese Radio Amateur Association) will activate Symi island (GIOTA DKS-032, IOTA EU-001, MIA MGD-030) between July 31st and August 3rd. Look for activity on all bands/modes. QSL direct only to SV5FRI (QRZ.com). [NG3K]

31/07/2009: Maurizio, IW4BLZ will be active as TF/IW4BLZ from Iceland (EU-021, WLOTA L-2975) from July 31st to August 11th. QRV 80-6m using ICOM IC706 MK2-G 100W and vertical antenna. QSL via home call, direct or Bureau. [425 DX News]

31/07/2009: Mike, K9AJ and Bruce, KD6WW plan to be active from Thomson island (NA-185, CIsA New One!), offshore Rankin Inlet, Nunavut, as homecall/VY0. QRV from local evening, Friday July 31 through to local morning, Monday August 3. Two stations, CW and SSB, on or near the usual IOTA frequencies. QSL to home calls. [DX World of Ham Radio]

01/08/2009: Look for Jim, AD5ZA/4 to be active August 1st from Santa Rosa island [aka Okaloosa] (NA-142, USi FL-003S), Florida. QRV 20 and 15 meter BPSK31; activation for PODXS 070 Club. QSL via home call, direct only. [rsgbiota.org]

01/08/2009: Toni, EA5RM is expected to be working in Bolivia during the month of August. He reports that he expects to be on the air during his spare time as CP1XRM. QSL via home call. [OPDX Bulletin]

01/08/2009: Members of the Portuguese Navy Hamradio Club - NRA (Nucleo de Radioamadores da Armada - NRA), namely Pedro/CU3DI, Alberto/CU3CY, Francisco/CU3AU, Paulo/CU3CC and David/CU3HQ will be active August 1st as CR2NRA from the Lajes lighthouse (ARLHS AZO-010, TWLHD WLH CU-004, WW Loc. HM68LS), Ilha Terceira (EU-175, DIP AZ-003, WLOTA L-0524). QRV 80-10 meters, using SSB and CW, between 0800 - 1900 UTC. QSL via CS5NRA (QRZ.com). [CT1BWW]

01/08/2009: Gilles/F4FGJ, Claude/F5MCC and Yveline/F-13049 will be active as F5MCC/p on August 1st from the Moulin à Tan (DMF 89-043), located in the city of Sens (CP 89100), Department Yonne/89 and Province Burgundy (DPF 05). QRV starting around 0600 UTC, on as many HF bands as possible 80-10m, using SSB and CW. QSL via bureau preferred and swl cards welcome. [F5NQL]

01/08/2009: PFPHW, Phil has received his assignment for the next two years, starting August, to Tahiti (OC-046, DIFO FO-002, WLOTA L-0885), French Polynesia. The callsign will first be FO/F5PHW, but a new one, under local form FO5xx is expected. Phil expects to be issued the FO5xx callsign as soon as possible after arrival. QRV HF, CW/RTTY and a little SSB, with 100 watts into a HF6V + dipôles and a 3 element beam for 10-15-20 meters. QSL via F8BPN via Bureau or direct or LOTW. More information at: f5phw.chez.com/ [F5NQL]

01/08/2009: Giacomo "Jack", IZ3DBA will be active August 1-10th from the island of Sardinia (EU-024, IIA SD-001, MIA MIS-035, WLOTA L-1608) on all HF bands. QSL via home call, direct or bureau. Website at: www.iz3dba.it/ [rsgbiota.org]

Geopark Certificate

For amateur radio stations/SWL's around the world who contact/hear Geopark stations, the English Riviera Geopark is offering a special commemorative European Geoparks Network radio amateur certificate for contacts with GB6GEO (instant qualifier), or two Geopark stations excluding GB6GEO. (this award will also apply to SWL's on a heard basis). This certificate, is endorsed by our Queens husband H.R.H The Duke of Edinburgh, with his own words congratulating the holder. Certificates will cost UK £2.20 each, Europe 3Euro and Rest of the world USD5.

Alternatively certificate holders to be the first in their country to claim the certificate will have an 'FC' suffix following the certificate

number. This denotes the first person in their country to claim the 'Geoparks' award. These certificate holders will be worth one point towards the basic certificate, and two holders are required to claim the award, or work any five (5) non first country certificate holders to claim it.

Certificate Manager/ direct qsl's to Martin Foster G3VOF QTHR or QRZ.COM Please also see qrz.com for the latest updates. Only log details necessary.

The *JULY 2009 Issue #907*-D files have been uploaded to the Golist web
site.
The weekly GoData files include DXCC APPROVED OPERATIONS in the
data file.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser. http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

Dear friends,
Finally I was able to install my antenna last Friday, 07/31/2009 and done my very first contacts on 20m, F, 5V, 6W,VU,W6...
Many thanks to Abdullah A61Q for the support given to obtain the necessary authorization from my landlord to erect an antenna on the roof of the building.
But, severe constraints on this roof: An Helipad platform + three towers for cellular network !
So, big limitation in height, no place to erect another tower for my Spiderbeam and the only choice remains on a very short vertical...or a wire antenna with a reduced shape.
So I decided to use the building structure and erected a ~142 ft loop, slope ~35°, delta design, low corner feed to the most cleared place, as some skyscrapers are under construction all around

My qsl manager, Jan SM5DJZ remains the same as when I was 9Q1TB (Democratic Republic of Congo)
Qsl design for standard qsl and eQSL will be ready on a short notice and QRZ.com will be updated soon.

Hpe to c u sn !!

EMIRATS ARABES UNIS :
De Philippe, F5LTB.
Chers amis,
Finalement j'ai pu installer mon antenne ce vendredi 31Juillet 2009 et pu effectuer mes premiers contacts sur 20m F, 5V, 6W, VU, W6...
Un grand merci a Abdullah A61Q pour son aide a obtenir l'autorisation de mon propriétaire d'installer une antenne sur le toit de l'immeuble.
Seulement il ya de grosses contraintes sur ce toit: Une plate-forme Helico et trois pylônes d'un opérateur gsm.
Donc limitation en hauteur, pas de possibilité d'installer un pylône supplémentaire pour ma Spiderbeam, donc choix restreint a une verticale ou filaire raccourcies.
J'ai donc utilisé les structure du bâtiment pour monter une delta loop de ~43m, la pointe en haut avec un angle de 35°, alimentée en bas sur un des cotés, dirigée vers l'endroit le plus dégagé car il y a encore des tours en construction.

SM5DJZ Jan, reste mon qsl manager comme lorsque j'étais 9Q1TB en République Démocratique du Congo.
Le design pour les qsl standard et eQsl est en cours de réalisation et l'indicatif sera ajouté a QRZ.com sous peu.
A bientôt sur l'air.

November 2009 - Vietnam
From November 4th to 17th DL7DF, Sigi will be on air from
Vietnam . We will be active from 160m to 10m in CW, SSB, RTTY and SSTV.
Our equipment consists of 3 transceivers (2 x K2, 1 x IC7000), 3 x kW
linears , 2 x 18 m Lowband Vertical, a 2 elem vertical for 40, a 2
elem vertical for 30, 2 Spiderbeam for 20/17/15/12/10, some Beverage
antennas as well as some laptop computers.
Opeerators: DK1BT, Manfred,DL4WK, Wolf, DL5CW, Andy,DL7DF, Sigi, DL7UFR,
Frank
Pilot for this DXpedition is DF3CB.
The QSL-Route is via DL7DF either direct to:

Sigi Presch
DL7DF
Wilhelmsmuehlenweg 123
D-12621 Berlin
Germany

or via the German QSL bureau DARC to DL7DF.
If you prefer a direct QSL please send a SASE and 1 IRC or 3
US$ for outside of Europe and 1 IRC or 2 US$ for mail within Europe.
When sending IRC's please check the expiration date, the new ones are
valid until the end of 2009. Any donations are very welcome and needed
for the high shipping costs.
If you do not provide the right return postage or a self
addressed envelope, we reply via the buro. Please only one call sign per
letter! If more than one, all additional cards go via the buro.
Postage needed for 1 envelope with 20 Gramm (FYI):
A letter within DL = 55 Euro Cent, a letter within Europe
costs 70 Euro Cent, a letter outside of Europe is 1.70 Euro. 1 US$ is
equal to 51 Euro Cent. So please keep in mind that 1 US$ - due to the
bad exchange rate between the US$ and the Euro - does not cover the
postage needed for an overseas airmail letter or for a letter within Europe!

Hello everyone....
Several weeks ago, I put out a notice that The KP1-5 Project (they
brought you K5D) was looking for some people to activate some NWRs
during NWR
week in October.
Here is a reminder of that event and more information. Won't you
consider operating from a National Wildlife refuge near you?
73, Bob-K4UEE

Press Release
National Wildlife Refuge Week 2009
Sharing the Good News via Amateur Radio
The KP1-5 Project, which brought you the 2009 Desecheo Island DXpedition,
is pleased to announce that it is serving as national coordinator for
Amateur Radio's
observation of the 2009 National Wildlife Refuge Week, Sunday October
12 to Saturday
October 18, 2009.
The goal is to combine your communication skills with your enjoyment of
the outdoors to help others learn about the National Wildlife Refuge
System. Only authorized, responsible access to refuges is sanctioned by
this event.
To operate from a National Wildlife Refuge:
1. Review guidance information available at _www.nwrweek-radio.info_
(http://www.nwrweek-radio.info/) then contact
info@... (mailto:info@...) to request
coordination through our clearinghouse.
2. Obtain permission from the refuge manager to operate within the refuge.
Submit your operating plan to _info@..._
(mailto:info@...) to have your operation listed on our
web site.
Operating Tips:
. Operate one day or the entire week, subject to the refuge manager's
authorization.
. Use your own call sign, a club call sign or a 1x1 special event call
sign.
. Use SSB, PSK31, RTTY, CW, etc., and describe refuge features and
wildlife to those you contact.Be a good steward of the refuge. Your
presence in wildlife
areas should be passive, minimizing impact and leaving habitat unaltered.
Several ham operators who have experience operating from refuges are
available to answer questions and offersuggestions.
Contact 2009 National Wildlife Refuge Week Amateur Radio coordinator Brad
Farrell K4RT at _info@..._ (mailto:info@...) .

POLAND – remaining :
NO MORE WAR Award rules :
On 1st September 1939 at 4.45, the German armoured cruiser
Schleswig-Holstein opened fire on the Polish military outpost on Westerplatte in Gdańsk.
Although German bombers had launched a bomb attack on the city Wieluń 10
minutes earlier, that event is generally considered to be the beginning of the
Second World War. Without having declared war, Germany attacked Poland
from the West, the North and the South.
On 17th September, on the basis of the secret pact Ribbentrop-Mołotow,
without having declared war neither, Poland was attacked by the Soviet Russia
at the whole Eastern border. Despite the formal declaration of war,
directed to Germany by its allies – France and Great Britain, regular forces of
the Polish Army were fighting until 6th October, without any help.
In order to honour that heroic defensive war and to reminisce about the
main places of fight, the rules of this award have been established – with
the motto „NO MORE WAR".
1. The award action „No More War" is being organised for honouring
the 70th anniversary of the outbreak of the Second World War in Europe and
for paying homage to the heroic Defensive War 1939, and it will last from
1st September until 6th October 2009.
2. On that occasion, 24 special event stations will be active: 21
stations with suffixes containing one letter and 3 stations with suffixes NMW.
3. The special event stations will be active on various HF and VHF
bands (on various modes).
4. Polish stations claiming for the award „No More War" should make
contacts with special event stations. With the suffixes of their callsigns
- containing one letter, one should compose the slogan „No More War". In
case when one letter for composing the slogan is missing - a contact with
any station with the suffix NMW will be valid instead, in conformity with the
rules of the award.
5. Foreign stations claiming for the award „No More War" should make
contacts with special event stations. With the suffixes of their callsigns
- containing one letter, one should compose the slogan „No More War" or
make contacts with 3 special event stations with the suffix NMW. In case
when some letters for composing the slogan are missing - contacts with
stations with the suffix NMW will be valid instead, in conformity with the rules
of the award.
6. After having made contacts with all 24 stations, one will be
awarded the sticker „excellent". In order to be awarded that sticker, one
should submit an extract from the logbook.
7. Short wave listeners claiming for the award „No More War" should

listen to contacts of stations active during the action. The rules of the award „No More War” are identical with the rules concerning ham radio senders.
8. Claims with the exact surface mail address of the claimer should be sent via e-mail or by post to the mail address of the organiser.
9. The award is free of charge.
10. The action is financially supported by the Ministry of National Defence.
11. Any kind of assistance at the action is welcome.
Wiesław SQ5ABG is the author of the concept, and Czesław SP2UKB is the coordinator of the whole action.

POLOGNE, rappel :
Diplôme "NO MORE WAR :
Règlement :
Le 1-er septembre 1939 à 4.45, le cuirassé Schleswig-Holstein a ouvert le feu vers le poste militaire polonais sur Westerplatte à Gdañsk. Bien que les bombardiers allemands aient commencé un bombardement aérien de la ville de Wieluñ 10 minutes plus tôt, cet événement est généralement considéré comme le début de la deuxième Guerre Mondiale.
L'Allemagne a attaqué la Pologne de l'ouest, du nord et du sud, sans avoir déclaré la guerre. Le 17 septembre, en vertu du pacte secret Ribbentrop-Mo³otow – sans avoir déclaré la guerre non plus, la Pologne a été attaquée par Russie Soviétique, le long de toute la frontière d'est. Malgré la déclaration formelle de la guerre, adressée à l'Allemagne par ses alliés – la France et la Grande-Bretagne, les troupes régulières polonaises luttaient jusqu'au le 6 octobre.
Pour honorer cette guerre de défense héroïque et pour rappeler les lieux principaux de bataille, on établie le présent diplôme avec l'épigraphe: „ PLUS JAMAIS DE GUERRE".
1. On organise l'action de diplôme „No More War" afin d'honorer le 70-ème anniversaire de l'éclat de la deuxième Guerre Mondiale en Europe et afin de rendre homage à la Guerre de Défense héroïque 1939, et cette action va durer du 1-er septembre au 6 octobre 2009.
2. À cette occasion, 24 stations spéciales vont être actives: 21 stations avec des suffixes contenant une lettre, et 3 stations avec le suffixe NMW.
3. Les stations spéciales vont être actives sur les bandes HF et VHF diverses (émissions diverses).
4. Les stations polonaises demandant le diplôme font des contacts avec les stations spéciales. Avec les suffixes de leurs indicatifs - contenant une lettre, on compose le slogan „No More War". En cas de manque d'une lettre nécessaire pour composer le slogan, les conditions du diplôme acceptent le contact alternatif avec une station contenant le suffixe NMW.
5. Les stations étrangères demandant le diplôme font des contacts avec les stations spéciales. Avec les suffixes de leurs indicatifs - contenant une lettre, elles composent le slogan „No More War"

ou font des contacts avec 3 stations spéciales contenant le suffixe NMW. En cas de manque de lettres nécessaires pour composer le slogan, les conditions du diplôme acceptent des contacts alternatifs avec les stations contenant le suffixe NMW.
6. Après avoir fait des contacts avec toutes les 24 stations, on va attribuer l'étiquette „excellent". Pour obtenir cette étiquette, il faut passer un extrait du log.
7. Les radioécouteurs demandant le diplôme font des écoutes de contacts des stations actives pendant l'action. Les conditions d'obtention du diplôme sont identiques aux celles concernant les radiotransmetteurs.
8. La demande - contenant l'adresse postale exacte du demandeur, on l' envoie par courrier électronique ou courrier terrestre à l'adresse de l' organisateur.
9. Le diplôme est gratuit.
10. L'action est soutenue financièrement par le Ministère de la Défense Nationale.
11. Chaque type de soutien de l'action est bienvenu.

For Immediate Release

3B8FQ reports that he will leave Mauritius by boat on Tuesday, 11 August, enroute for St. Brandon, AF-015. Rachid will operate solo as 3B7FQ from 12 August through the end of the month--and possibly a few extra days in early September. Look for him on all bands, 30 through 10M, although Rachid expects 40 & 20M to be most productive. He will use both CW & SSB, as conditions allow.

As in Rachid's earlier travels to 3B6 and 3B7, operating time will be shared with his primary mission of performing maintenance on the island's meteorological equipment. He expects to use the island's G5RV and a vertical with a 100 watt transceiver powered by a 12 volt battery that will be charged daily.

Rachid likes to use "the 8s" whenever possible on CW. Here are his anticipated frequencies:

CW: 7.008, 10.108, 14.008, 18.078, 21.008, 24.898, 28.008
SSB: 7.050, 14.191, 18.141, 21.241, 24.941, 28.491

If future plans come together, Rachid may operate from 3B9 sometime after his return, and hopes to operate from 3B6 again in November.

QSL via K5XK, direct preferred.

73,

Ron, K5XK

29/08/2009: The Tri-County Amateur Radio Club, WC5C will activate Pelican Island (USi TX-050, Not IOTA, Tarrant County), located in Eagle Mountain Lake, Texas, on August 29th (1400z-2200z). Club members will travel to the island by boat, kayak and canoe. QSL via WC5C (QRZ.com). [USI]

04/09/2009: Look for Juergen, NF6J to be active as VO2/NF6J from Battle Island (NA-044, CIsA NF-049) between 1300z September 4th to 2300z September 11th. QRV 30, 20 and 15 meters, CW only. QSL via DL7RV, direct or bureau. [rsgbiota.org]

05/09/2009: RESCHEDULED - Cezar, VE3LYC plans to operate as VY0O from the Ottawa Islands (NA-230, new one) for three full days between September 5th to 8th. Specific island's name and exact dates are not available at this time, but they will be announced a few days in advance of the operation. This will be Cezar's most difficult operation to date. The islands are 12-14 hours away from shore and transportation requires a large boat. Traditionally unstable weather pattern, unknown local landing conditions, high seas, the presence of ice chunks in Hudson Bay, potential presence of polar bears, all these and other logistical aspects make this trip extremely challenging. At this time Cezar seeks group and individual donors who understand and appreciate the difficult and expensive task ahead and are willing to be part of this effort. "Past support from EU stations has been disproportionate with their QSO demand (45% of QSOs but only 25% support for VY0A)", he says, but hopefully this situation will improve. [425 DX News & VE3LYC]

10/09/2009: Look for Frank, DK5FT to be active as CT8/DK5FT from the island of Sao Miguel (EU-003, DIP AZ-002, WLOTA 2016), September 10-22nd. Expect activity on all bands/modes, propagation permitting. QSL via home call, bureau preferred. [rsgbiota.org]

19/09/2009: The Tri-County Amateur Radio Club, WC5C will activate Greer Island (USi TX-058, Not IOTA, Tarrant County), located in Lake Worth, Texas, on September 19th (1400z-2200z). Club members will travel to the island by boat, kayak and canoe and by foot across a causeway. QSL via WC5C (QRZ.com). [USI]

26/09/2009: Dave, AH6HY will be active holiday style from the island of St. Eustatius (NA-145, WLOTA L 1851) from September 26th to October 1st. QRV 40-10 meters, mostly SSB with some CW. QSL via home call, bureau or direct. [NG3K]

29/12/2009: Wally/VK6YS and Nigel/VK6NI plan to activate Robertson Island, in the Pelsaert group (OC-211, WW Loc. OG71AC) as VK6YS between

December 29, 2009 and January 4, 2010. They are looking for up to two operators to join them. Please contact Wally at vk6ys@... if you are interested, for more information. Further information closer to the expediton date. Web site at: www.westozdx.net/ [rsgbiota.org]

SPECIAL EVENTS -

08/08/2009: Look for special event station 8J3YS to be active on all bands/modes from August 8th to November 8th to celebrate the 50th anniversary of Yasu-city, Shiga prefecture, Honshu (AS-007, JIIA AS-007-001, WLOTA 2376), Japan. [JJ1WTL/AC6IM]

08/08/2009: Special event station 8J8WA will be aired on all bands/modes from August 8th to September 8th to celebrate the 22nd All Japan Health and Welfare Festival in Sapporo(-city), Hokkaido(-pref), Hokkaido (AS-078, JIIA AS-078-001, WLOTA 2967), Japan. QSL via the JARL Bureau. [JJ1WTL/AC6IM]

08/08/2009: The Formula 1 Spanish Grand Prix will take place in Valencia. Look for the following special callsigns to be active from August 8th to 23rd: AM5FUV (Op Juan, EC5BZR), AO5FUV (Op Pepe, EA5UB), AN5FUV (Op Vincent, EB5GGB), EG5FUV (Op Jose, EA5FL) and EH5FUV (Op Nando, EA5GVZ). They will be active mainly on the HF bands. A special award will be issued to those who will make at last 3 QSO's with 3 different stations. QSL Manager will be Jose, EA5FL. All QSOs confirmed direct or bureau. Further information can be found at QRZ.com. [F5NQL]

08/08/2009: On the weekends of 8 and 9, the 22 and 23 August, Marches Amateur Radio Society will be operating GB1SSB from the Old Racecourse, Oswestry to celebrate the 60th anniversary of the first British amateur station to use SSB. The station belonged to H Woodhead, G2NX, who resided in the Oswestry area. The adoption of SSB was one of the greatest technical advances in amateur radio since the arrival of the superheterodyne receiver. GB1SSB will be operational on HF, VHF and UHF on phone and, hopefully, PSK31. QSL via the RSGB bureau. [GB2RS]

08/08/2009: The Norman Lockyer Observatory Amateur Radio Group will be on the air Saturday 8 August 2009 in support of the South West Astrofair, which is being run by the Norman Lockyer Observatory in Sidmouth, Devon, England (EU-005, WLOTA 1841, WAB SY18, WW Loc. IO80JQ). The demonstration station will use the permanent NoV callsign of GB2NLO and will be operational on 160m, 80m, 40m and 20m using SSB, CW, PSK31 and SSTV as appropriate between 0900 and 1800 UTC. There will also be demonstrations of satellite communications on 2m and 70cm. The aim is to demonstrate amateur radio to all visitors, encourage new entrants to the hobby and to make as many local and DX contacts as possible. Passing of greetings messages will, hopefully, be a feature. QSL via the RSGB bureau. See www.gb2nlo.org/ for details. [GB2RS]

09/08/2009: Special callsign 8N7IOTA will be active on all HF bands/modes from August 9th to September 30th to celebrate Sendai(-city) & Miyagi prefecture Elegant Travel Campaign, Honshu (AS-007, JIIA

AS-007-001, WLOTA 2376), Japan. (IOTA: Izushima Island, Ohshima Island, Tashirojima Island and Ajishima Island). QSL via the JARL bureau. [JJ1WTL/AC6IM]

09/08/2009: Members of the Bittern DX Group will be active August 9th using the special callsign GB2CLB for Cromer Lifeboat Day, in Cromer, Norfolk, England (IOTA EU-005, WLOTA 1841). QSL via M0CNP, direct or by the RSGB Bureau. [Bittern DX Group]

09/08/2009: Norfolk County RAYNET will be operational on Sunday 9 August with a Special Event Station, GB4NCR, from Walcott in Norfolk, England (EU-005, WLOTA 1841). Operations will be on 2m and 80m SSB with a primary frequency of 3.663MHz. Note that 40 will be used if 80m isn't open. QSL cards are available and can be send either via the Bureau or direct to G4PSH with a stamped self-addressed envelope. During this event, Exercise Sea Spray will take place in cooperation with the local community and Flood Wardens for this area. [GB2RS]

13/08/2009: Members of Ternopil Amateur Radio Club will use special callsign EM360B between August 14-18th, to mark the 360th anniversary of historical battle near the city of Zboriv. QSL via UY5BC. [OPDX Bulletin]

13/08/2009: Operators Tom/WY3H and his son Ethan/W3IRS, and also John/K3WWP will operate N3AQC (NAQCC and FISTS Club Station) as a special event station on August 13th from the USS Requin [sand shark] (SS/SSR/AGSS/IXSS-481, Tench-class submarine), which is dry-docked in the Alleghney River in Pittsburgh, Pennsylvania. Their operating times will be roughly between 10 a.m. to 2 p.m. (+/- a few minutes) EDT (1400z-1800z). A special QSL card will be sent to all contacts. Operation will be on 20 and 40 meters, only in the CW portion of the bands, of course. History: The Requins' keel was laid down on 24 August 1944 by the Portsmouth Navy Yard in Kittery, Maine. She was launched on 1 January 1945 sponsored by Mrs. Slade D. Cutter, and commissioned on 28 April 1945 with Commander Slade D. Cutter in command. Initially, Requin carried heavier armament than usual for a fleet submarine, perhaps because Commander Cutter was one of the most decorated submarine skippers going to sea. She had an additional five-inch/25-caliber deck gun, as well as two 24-tube five-inch (127 mm) rocket launchers, which were intended to be used to provide offshore bombardment during Operation Downfall, the planned invasion of Kyushu and Honshu. [NAQCC]

14/08/2009: Members of Ternopil Amateur Radio Club will use special callsign EM360B between August 14-18th, to mark the 360th anniversary of historical battle near the city of Zboriv. QSL via UY5BC. [OPDX Bulletin]

SIX METERS & UP -

Perseid Meteor Outburst -
This year's Perseid meteor shower could be even better than usual.

According to NASA's Meteoroid Environment Office, a filament of comet
dust has drifted across Earth's path and when Earth passes through it,
sometime between 0800 and 0900 UT (1 - 2 am PDT) on August 12th, the
Perseid meteor rate could surge to twice its normal value.

Check spaceweather.com/ for details and observing tips.

Perseids on your iPhone:
Spaceweather.com is pleased to announce a new iPhone/iPod application
dedicated to the upcoming Perseid meteor shower. It features a Perseid
countdown clock, news alerts, an easy-to-use sky map, and a live gallery

of photos from around the world. Sky watchers of all types will find it
a valuable companion when the shower peaks later this month.

The *AUGUST 2009 Issue #908* files have been uploaded to the Golist web
site.
The weekly GoData files include DXCC APPROVED OPERATIONS in the
data file.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser. http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

Hi friends
FRENCH POLYNESIA – TAHITI:
Received from Phil F5PHW ;
To day for my 40th birthday I've received my new callsign for the next two years : FO8RZ.
QSL via LOTW or via F8BPN either direct or via the French Ref-Union bureau.
The vertical antenna has been set up and I'll be on the air for the first time on next night (Tahiti time)
The other antennas are here and will be set up later (Wires 80-40, and triband beam 14-21-28).
But understand we are , I and family, in full moving in, so we have a lot of things to do before thinking of Ham radio; so I'll be active from time to time only to begin.
The web page updating will be done allso later.
73,

Phil

Hello,
we have added one more operator to the crew with
Uwe (DJ9HX) and now are 8 Op´s, so that we have
the opportunity to run 4 stations simultanious, in order
to work the pil-up.
Please publish our WEB-page
www.conwayreef2009.de (http://www.conwayreef2009.de/)
which shows all the details. Please feel free to also
publish our callsign: 3D20CR

Plamen, LZ3FM, plans to activate Biosphere Reserve Kamchia, LZFF-011, between 10-20 Aug 2009, during his holiday. Callsign to be used will be either LZ01WFF/2 or LZ3FM/2. Equipment will be IC-746 plus 4-band GP and Dipole

antennas. Activity will be on HF + 6m, mainly CW with some SSB. QSL via LZ1PJ, direct or via bureau. E-mail requests for bureau cards are accepted (lz1pj@...). Write QSO details and callsign worked, since I manage other calls too.
NOTE: LZ01WFF is used for activation of other WFF references by other operators. I will manage this activation only. For other activations listen to ops instructions.

Bonjour à tous
POLYNESIE FRANCAISE – TAHITI:
Reçu de Phil, F5PHW:
Bien arrivé en FO.

Pour mes 40 ans, j'ai reçu ce matin même mon indicatif FO8RZ.
La QSL est via LOTW ou via F8BPN buro, CBA.

Le matériel est monté avec juste la verticale pour le moment. Par contre,
le terrain n'est pas tellement dégagé et je suis entouré d'arbres. Le
montage de la beam 14-21-28 et du doublet 40-80 se fera ultérieurement.
Les émissions commenceront ce soir.
Je ne serai pas trop actif pour le moment car on doit finir notre
installation.
Le site WEB sera mis à jour prochainement.

MFJ Acquires Cushcraft (Aug 7, 2009) -- On August 7, MFJ Enterprises announced they had purchased the Cushcraft Amateur Radio antennas product line from Missouri-based Laird Technologies effective July 31. According to MFJ, Cushcraft -- makers of HF/VHF/UHF vertical, beam and Yagi antennas for the Amateur Radio community -- will continue to be manufactured in Manchester, New Hampshire. "We are excited to have the Cushcraft Amateur Radio Antennas product line alongside our other five companies," said Martin F. Jue, President and founder of MFJ Enterprises, Inc. "This product line increases our ability to offer our customers a wide range of antenna options at different prices. Customers will be able to choose from Cushcraft Amateur Radio antennas, Hy-gain and MFJ antennas through one source." MFJ purchased Hy-gain in 2000 the company also owns Ameritron, Mirage and Vectronics. Jue said that the Cushcraft line will bring more than 50 new products to MFJ's Amateur Radio product line. "We will add more new products to this antenna line and will continue the Cushcraft Amateur Radio antennas name long into the future. Cushcraft Amateur Radio antenna product customers will appreciate the continued and expected top-quality manufacturing of this product in New Hampshire and the MFJ commitment to superb after-the-sale service and tech support in Mississippi," said Jue. The 120 page 2010 MFJ catalog will include the entire Cushcraft Amateur Radio antennas product line. MFJ has set up a special customer support line -- 662-323-5803 -- to handle Cushcraft antenna product technical support, parts requests and customer services.

The XRØYA DXpedition to Easter Island will take a place between October 31 and November 15, 2009. It will be a lightweight, small expedition led by 6 operators:
SQ8X Stan (inventor of the expedition), SV2KBS Victoria, NI1L Leszek, Marco CE6TBN, PA3C Aart and SP7HOV Zbig. Thanks to fantastic support of Radio Club de Chile we will have an unique opportunity to activate Rapa Nui on 30 meters. Since the island is still most wanted on this band in Europe, 30m

will be or priority.
The unique location in conjunction with the ham radio hobby is going to be our experience of life-time. We are glad we will be able to share it with you live from the island. Feel free to read the latest news & to leave your comments below.

SB QST ARL ARLB028
ARLB028 Vanity Call Sign Fees to Increase September 10

On August 11, the FCC announced that the cost of an Amateur Radio vanity call sign will increase $1.10, from $12.30 to $13.40.

Now that notice of the increase has been published in the Federal Register, the increase will take effect in 30 days, September 10, 2009.

The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new 10 year term.

The notice in the August 11, 2009 Federal Register, entitled "Assessment and Collection of Regulatory Fees for Fiscal Year 2009," includes regulatory fees. These fees are expected to recover a total of $341,875,000 during FY2009, encompassing all the Services the FCC regulates.

For more information, see the recent ARRLWeb article, "FCC Looks to Raise Vanity Call Sign Fees for Second Consecutive Year" at, http://www.arrl.org/news/stories/2009/05/18/10825/?nc=1 .

QSL via DB0BL, direct or bureau. Full information can be found at: www.datenfunk.org/dl3g

PA - NETHERLANDS - To celebrate 400 years of uninterrupted friendship between The Netherlands and U.S.A. the B.I.G. amateur radio group

(www.pa6big.nl/) has launched a special call: from PC400BKL (until a maximum of 1000 QSO's are made with different amateurs). The call will also be operated by PC2F from 31 August till 27 September 2009. The participating B.I.G. members are: PC2LR, PA7JB, PE1EZU, PE2BER, PA7ML, PC2F, WP3UX, PE1PGA and NL-13405. QSL via PC2F, direct or bureau or eQSL. Full information is available at QRZ.com under the callsign PC400BKL.

13/08/2009: Operators Tom/WY3H and his son Ethan/W3IRS, and also John/K3WWP will operate N3AQC (NAQCC and FISTS Club Station) as a special event station on August 13th from the USS Requin [sand shark] (SS/SSR/AGSS/IXSS-481, Tench-class submarine), which is dry-docked in the Alleghney River in Pittsburgh, Pennsylvania. Their operating times will be roughly between 10 a.m. to 2 p.m. (+/- a few minutes) EDT (1400z-1800z). A special QSL card will be sent to all contacts. Operation will be on 20 and 40 meters, only in the CW portion of the bands, of course. History: The Requins' keel was laid down on 24 August 1944 by the Portsmouth Navy Yard in Kittery, Maine. She was launched on 1 January 1945 sponsored by Mrs. Slade D. Cutter, and commissioned on 28 April 1945 with Commander Slade D. Cutter in command. Initially, Requin carried heavier armament than usual for a fleet submarine, perhaps because Commander Cutter was one of the most decorated submarine skippers going to sea. She had an additional five-inch/25-caliber deck gun, as well as two 24-tube five-inch (127 mm) rocket launchers, which were intended to be used to provide offshore bombardment during Operation Downfall, the planned invasion of Kyushu and Honshu. 14/08/2009: Members of Ternopil Amateur Radio Club will use special callsign EM360B between August 14-18th, to mark the 360th anniversary of historical battle near the city of Zboriv. QSL via UY5BC. [OPDX Bulletin]

15/08/2009: DQ11APOLLO is operated by the German club in Luedinghausen (N28) with the special DOK Apollo11. Responsible for the station and also acting as QSL manager is Thomas, DF3JO. The first QSOs were made on July 16-24th to celebrate the 40th anniversary of the first landing on the moon on July 20, 1969. The call will be activated during several occasions in 2009 and 2010: Fieldday August 15, 2009; Apollo 12 November 14-24, 2009; Apollo 17 December 07-19, 2009; Apollo 8 December 21-27, 2009; Apollo 14 January 31-Feb 9, 2010; Apollo 9 March 03-13, 2010; Apollo 13 April 11-17, 2010; Apollo 16 April 16-27, 2010; and Apollo 10 May 18-26, 2010. QSL via DF3JO, direct or bureau. The QSL card has yet to be printed. The first delivery of the QSL-cards is sheduled in December. [F5NQL]

15/08/2009: Members of Sands Amateur Radio Contest Group will be operating a number of special event stations on Saturday 15th August to celebrate Galloways Society for the Blind "The 25th Anniversary of the Cross Bay Walk" led by Queens Guide Cedric Robinson MBE. The walk generally takes around 3 hours and needs The Queens Guide to navigate between Arnside and Kents Bank safely because of the quicksands around

the bay that have taken many lives over the years. The first appointment was in 1536. Cedric is the 25th appointed Queen's Guide to the Sands, Cedric a local fisherman has been leading the walks since 1963. The callsigns to listen out for are: GB2GSB located at Arnside Knott which overlooks Arnside and a good part of the walk; M0SCG/M will be operating from the tractor which follows the walkers and can be used if anybody becomes too exhausted or ill during the walk; and GB4GSB Located at the end of the walk at Kents Bank. A special certificate is on offer for amateurs and SWLs who work any of the stations. To obtain a certificate an A4 SAE and a cheque for £2.50 made out to SARCG should be sent to our QSL Manager: Ian Maude (G0VGS), 21 Colwyn Avenue, Bare, Morecambe, Lancs LA4 6EQ, England - U.K. Once printing costs are covered, any money left over will be donated to Galloways Society for the Blind.

16/08/2009: On Sunday, 16 August around 16:00 UTC a Special Event Station with the call sign TC17EQ will participate in the Memorial Event for the tragic earthquake, which occurred in the town and region of Izmit (Turkey) on 17 August 1999. The event will be attended by representatives of the countries that provided international assistance following this disaster 10 years ago. In recognition of their key role in emergency communications, the Turkish IARU Member Society, TRAC, has been invited to be part of the official program with a Special Event Station and with two of their emergency communication vehicles. The earthquake in 1999 occurred in the early morning hours of 17 August, but the official memorial ceremony will start in the evening of 16 August and the the visit of the Ambassadors is scheduled for the period 19:00-20:00 UTC on August 16. The memorial ceremony is scheduled for 00:02 UTC on August 17 and the plan is to operate until at least 01:00 UTC on August 17 but it may be extended further. TRAC would in particular appreciate contacts with HQS and other stations from the countries of which official representatives will be present at the event. So far, the embassies of 4X, 9A, A7, DL, ET, EU, G, HA, HZ, JA, LZ, OK, OZ, SV, UA, VE, and YI have confirmed their participation. TC17EQ is expected to be QRV on 20m and 40m, primarily in SSB, mostly near the respective Center of Activity Frequencies for Emergency Communications, and on 30m in CW and PSK. [Southgate ARC]

21/08/2009: Special event station SN120OSP will be active from August 21st to October 31st from Gorowo Ilaweckie, Poland, to celebrate the 120th anniversary of the creation of the volunteer fire brigades. QSL via SP4CUF, direct or bureau. [425 DX News]

The following operation has been approved for DXCC:

7O1YGF - Yemen
Operation from April 16, 2000 through April 26, 2000

After reviewing recently-received information regarding the 7O1YGF
operation, and after additional dialogue with a leader of the
DXpedition, the DXCC desk has approved this operation.

Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow the options below:

Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.

Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission. You must fill out an application form, however.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. We will work with the 7O1YGF team to use Logbook of the World if possible.

Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009. We encourage applicants to handle this sooner rather than wait until the last minute.

Dear QRP Friends, CW Fans and Contesters,

"Club Log is a web-based application which uses a database to analyse amateur radio log files, which are uploaded in the common ADIF format.

Using the logs, it is possible to build band-mode league tables of amateurs' QSOs, provide efficient log search tools and create most wanted lists for DXCC entities (both over all time and in recent history, or by mode for example). Also, Club Log can give back to its users the ability to find "wanted" DX spots, and other analysis of their logs which might be hard to do with normal logging software."

The *AUGUST 2009 Issue #908-A *files have been uploaded to the Golist
web site.
The weekly GoData files include DXCC APPROVED OPERATIONS in the
data file.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser. http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

Hi all
Hungary, HA.
Sanyi, HA0HV started to use special call sign HG400HV few days ago, and will operate with it to the end of the year (31-December-2009). He is celebrating to that event when his town was established by the "hajduk" and they gived name "Hajduboszormeny" to their settlement. Now Hajduboszormeny is a lively town in Eastern Hungary with a population of approximately 32,000 people. Sanyi does his operating on all HF+6+2m bands on CW, SSB and Digital modes from KN07. QSL via HA0HV, via HA Bureau, or direct via his QRZ.com address. (MMMonVHF Newsletter 2009-06-12) 12 Jun. 2009 - 31 Dec. 2009

Hello Guys, I (OZ6OM) will be QRV in the Nordic Activity Contest Thursday evening (10 th. September) between 17 and 21 UT.
I intend to keep activity round 50.173 MHz (SSB/CW) and 50.230 MHz / 50.236 (JT6m).
I´m not sure the weather permit going "hill topping", from JO55CE 128 masl. (one of the highest points within 100 Km), as high wind is forecasted. But other wise I will be QRV from JO55EJ with a 6elm. XZ yagi - and have a decent shoot in all directions. .

L'opération suivante a été approuvée pour le DXCC/

7O1YGF - Yemen
Expédition du 16 au 26 août 2000.
Après relecture de la récente documentation reçue et concernant l' opération 7O1YGF , et après de nouvelles discussions ave le leader de l'expédition, le Bureau du DXCC a décidé d'accepter l'expédition Yemen 2000, 7O1YGF .
Eu égard au délai écoulé entre l'expédition et son acceptation , nous demandons à ceux qui souhaiteraient ajouter cette entité à leur DXCC de choisir parmi les options suivantes soit :

- - Envoyer la carte seule au DXCC Desk, avec une enveloppe SASE
ou frais de poste pour le retour hors USA. Dans ce cas, le contrôle sera
fait gratuitement. Si la carte 7O1YGF est envoyée dans un paquet d'autres
QSL, elle sera traitée à part.
- Présenter la carte à un contrôleur agréé DXCC. Le contrôleur
fera suivre la soumission au DXCC desk pour enregistrement . Là encore ce sera
fait gratuitement pour cette seule carte ; Vous devrez remplir une feuille
de contrôle pour cette carte.
Dans tous les autres cas, les demandeurs peuvent inclure cette carte avec d
'autres envoyées au contrôle et dans ce cas elle sera traitée normalement.
Nous travaillons avec l'équipe 7O1YGF, afin de télécharger le carnet de
trafic sur le LotW.
Rappel, de la date limite pour l'inscription sur le listing annuel du DXCC
et à l'Honor roll, fixée au 31 12 2009. Nous encourageons les demandeurs
de ne âs attendre cette date limite.

8825. 7O1YGF have now been uploaded to LoTW

The logs for 7O1YGF have now been uploaded to LoTW. Please follow this procedure if you want to claim credit:

As with paper applications if you submitted 7O1YGF in the past and had it rejected, we will accept an e-application via LoTW and you will not be charged a submission fee for 7O1YGF only.

Make sure you have uploaded your QSOs. DXCC cannot open and search the logs for your QSO since doing this will not show the match that is required for a LoTW confirmation;

Access your account and begin the application process;

If you select only the 7O1YGF QSOs you will not be assessed the fees that LoTW will report back to you. If you choose other QSOs a regular submission fee will apply;

Complete the application (all 4 parts) and DXCC will place your e-application on the list for processing;

Special note for 7O1YGF applications ONLY: On Part 4 of the LoTW application click "Payment by mail" This step is VERY important to assure proper handling. If you clicked on part one any QSOs other than 7O1YGF you must make proper payment.

Again: The above is ONLY for 7O1YGF submissions. Applications with other QSOs will be handled, and charged, as a regular submission.

DXCC will not acknowledge completion of the application. When finished, your numbers in LoTW will reflect the completion of your e-application.

If you achieve Honor Roll or Top of the Honor Roll from this submission and you would like to order the wall plaque, you can send me an e-mail or fax your order or send the order form by regular mail.

Midway Island 2009

Press Release Number 6 August 22, 2009

The K4M team has passed two important milestones this week. First we are pleased to present our transportation to Midway on October 9^th 2009. The team has chartered the G1 with the call sign N8E as shown below (picture taken on Palmyra).

Secondly, all radios, computers, antennas, coax, and the rest of the tons of gear have left Hawaii on a supply ship to Midway and will wait for the team there.

Fundraising continues on our website, www.midway2009.com <http://www.midway2009.com/> . If you haven't visited it in a while stop by and help support our effort. All pre expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXpedition*.*

This month we are highlighting three more team members. You can read all their history at: http://www.midway2009.com/meettheops5.html

Hi all

GLORIOSOS 2009, Official Press Release:

The FT5GA team has in hand, the flight tickets from Paris CdG to the St Denis Réunion Island airport.
The departure is scheduled on September 11th and the return on October 8th.

The information about the French Forces Transall flight from Saint Denis to Grande Glorieuse will be published as soon as the FASZOI Hq will have confirmed them. (FASZOI = French Armed Forces for the South Indian Ocean Zone)

The stay on Grand Glorieuse is considered having about three weeks length.

All the gear has been picked up and is now ready packed on pallets, to be sent to the Reunion island, in the next few days.
Thanks especially for that to the Provins ARC, F6KOP members Serge, F6AML and Frank, F4AJQ.

Please forward and spread this information without any change.

US COUNTY HUNTING - USA-CA

K8MR - Jim - August 22 to August 23 - SSB and CW
I will be out mobile in the Ohio QSO Party on Saturday, August 22. 1600z to 0400z 8/23. Full OQP info is available at www.ohqp.org/ (NOTE: NEW WEB SITE FROM LAST YEAR). My operation in order: Carroll, Tuscarawas, Harrison, Guernsey, Belmont, Monroe, Noble, (Guernsey), Muskingum, Morgan, Perry, Hocking, Fairfield, Pickaway, Fayette, Greene, Madison, Clark, Champaign, Union, Logan, Hardin, Wyandot, Crawford, Marion, Morrow, Richland, Ashland. Maybe a few more common ones on the way home headed north on I-71. We presently expect at least ten mobiles out in all parts of the state. [County Hunter Web]

K8RYU/R - 22 August to 23 August - SSB and CW
Making the usual trip thru SE OHIO for the Ohio QSO Party. In expected order, SCIOto, PIKE, JACKson, LAWRence, GALLia, JACKson (again), VINTon, MEIGs, ATHEns, WASHington. This year I am solo, so I will not have as much time on-air in each county. I will check 3545 from every county and make noise there, as well as the higher bands, as they have shown some sign of life these past few days. I will post any changes on www.ohqp.org/ (new website this year). Additional note: I am often in Noble, Morgan and some WV counties, with radio. [County Hunter Web]

QSL INFORMATION -

7O1YGF now in LoTW:

The logs for 7O1YGF have now been uploaded to LoTW. Please follow this procedure if you want to claim credit:

As with paper applications if you submitted 7O1YGF in the past and had it rejected, we will accept an e-application via LoTW and you will not be charged a submission fee for 7O1YGF only.

Make sure you have uploaded your QSOs. DXCC cannot open and search the logs for your QSO since doing this will not show the match that is required for a LoTW confirmation;

Access your account and begin the application process;

If you select only the 7O1YGF QSOs you will not be assessed the fees that LoTW will report back to you. If you choose other QSOs a regular submission fee will apply;

Complete the application (all 4 parts) and DXCC will place your e-application on the list for processing;

Special note for 7O1YGF applications ONLY: On Part 4 of the LoTW application click "Payment by mail" This step is VERY important to assure proper handling. If you clicked on part one any QSOs other than 7O1YGF you must make proper payment.

Again: The above is ONLY for 7O1YGF submissions. Applications with other QSOs will be handled, and charged, as a regular submission.

DXCC will not acknowledge completion of the application. When finished, your numbers in LoTW will reflect the completion of your e-application.

If you achieve Honor Roll or Top of the Honor Roll from this submission and you would like to order the wall plaque, you can send me an e-mail or fax your order or send the order form by regular mail.

Mickey "Santa Claus" Hicks, WO6T (SK)
WO6T -- known to many amateurs and their children as Santa Claus -- passed away Sunday, August 9. He was 79. For the past 38 years, Hicks, a ham for almost 50 years and a long-time Amateur Radio instructor, would get on the air for 10 days each December as W6S (Whiskers-6-Santa). Mark Slater, WI6J -- Hicks' QSL manager -- said Hicks was an avid DXer, contester and rag chewer: "He had a passion for radio and making new friends through the hobby he enjoyed so much. Mickey will be greatly missed." Slater said that he will continue to confirm WO6T/W6S QSL requests "indefinitely." Hicks, of Bakersfield, California, was a member of the ARRL A-1 Operator Club and a long-time member of the ARRL, the Northern California DX Foundation, the Central Valley DX Club and the Kern County Central Valley Amateur Radio Club. Midway Island 2009

Press Release Number 6 August 22, 2009

The K4M team has passed two important milestones this week. First we are pleased to present our transportation to Midway on October 9th 2009. The team has chartered the G1 with the call sign N8E.

Secondly, all radios, computers, antennas, coax, and the rest of the tons of gear have left Hawaii on a supply ship to Midway and will wait for the team there.

Fundraising continues on our website, www.midway2009.com . If you haven't visited it in a while stop by and help support our effort. All pre expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXpedition.

This month we are highlighting three more team members. You can read all their history at: www.midway2009.com/meettheops5.html

ILLW 2009 WRAP UP -
This annual amateur radio event held on the 3rd full weekend in August has once again brought amateur radio operators, lighthouses and the public together again to promote International goodwill, lighthouses and amateur radio. This year’s event, held on 15-16th August, saw an all time record number of 442 participants from 50 countries transmit from a lighthouse somewhere near their place of residence.

The ILLW is in its 13th year having commenced its existence in Scotland in 1995 as the Northern Lighthouses Award for ham radio operators. In 1997 it became an international affair and has grown each and every year since. This year saw a 10% increase in submitted entry forms which can be viewed on the web site http://illw.net . Alaska was a first this year with an entry for Sentinel Island. Germany listed 55 lighthouses, Australia 49, USA 47, and England 43. Malaysia celebrated their Lighthouse Weekend with 9 lighthouses taking part. The Azores, Balearic Islands, Egypt, Slovenia, Panama were some of the smaller countries represented with one entry from each.

All in all a very successful event. Looking forward to 2010.

Kevin, vk2ce.

Hello Folks,

As many of the old timer's know, I used to keep a list of "Regular world nets", that are currently QRV on the LF and HF bands.

I stopped doing the listings in 2004, as printing and postage was getting expensive. Plus the fact that nowadays, people search online for information.

I have been requested, to try and update the listings and post it in online in PDF format.

So with this in mind, if any of you call into, or listen to any regular nets around the world on the LF or HF bands, (Including local club nets), can you send me the following info please?:

Net Name,
usual Controllers callsign,
day of the week (or ALL if daily),
Net start time - UTC,
usual QRG,
Mode,.
Language - if other than English.

I will then try to build up a "current" list over the coming months, in both Doc and PDF formats and email it to anyone that requires a copy.

Mail to: dx_newsdesk@... OR
dx.newsdesk@...

When completed, it will be downloadable from:
http://www.dx-newsdesk.co.uk/

Many thanks in advance for your help.

The *AUGUST 2009 Issue #908-B* files have been uploaded to the Golist
web site.
/*Be sure to download this weeks data file. It contains a new
GoWin.exe file version 2.19*/
The weekly GoData files include DXCC APPROVED OPERATIONS in the
data file.
Use the DOWNLOAD button in your GOWIN program or this link in your
web browser. http://golist.net/dlauth.cfm
It is recommended that you open up GOWIN after downloading the data file
update and on the top bar click on FILES/CLEANUP FILES and run this
routine to clear all the old update files from the program folder.
This will prevent any lookup problems for you.
Now is a good time to send in your RENEWAL to GoWin if your subscription
is about to expire.

Hi friends
Official release:
GLORIOSOS 2009 and Magic band.
The propagation forecast for the Magic band from Gloriosos is very bad at the expedition time, quite in all directions.

Taking advice from 6 meters specialists , they inform us that chances to give FT5GA to world hams are very low and even less.
The only one antenna available is a 2 el HB9CV, with no other possibility to bring an or several other more efficient one(s), included for EME; So it has been considered we had to focus on HF bands.
So we sadly decided to concentrate our activity only from 160 to 10 meters..
We ask the 6m community to understand our decision.
73
Didier, F5OGL, Team leader,
Via Maurice, F5NQL, in charge of the Internet communication for FT5GA.

Bonjour à tous :
Communiqué officiel :
GLORIEUSES 2009 et Magic band.
Les prédictions de propagation sur le 6 mètres, la Magic band, depuis Glorieuses, au moment de l'expédition, sont très mauvaises , quelque soit la direction.
Selon les spécialistes du 6m consultés, les chances de donner FT5GA aux OM du monde entier sont très minces voire pire.
La seule antenne disponible est une 2 él HB9CV, sans autre possibilité d'emmener une ou plusieurs autres plus efficaces, y compris pour l'EME. En conséquence nous avons donc jugé qu'il valait mieux nous concentrer sur les bandes HF.
Nous avons donc décidé avec regret de trafiquer uniquement sur les bandes 160 à 10 mètres.
Nous demandons à la communauté des adeptes du 6m, de comprendre notre position.

Didier, F5OGL, Chef d'expédition,
Via Maurice, F5NQL, en charge des communications Internet pour FT5GA.

I am off on my travels again to 8Q7:

Andrew, G7COD, will be operational for the seventh time from the Island of Embudu in the Kaafu Atoll, Maldives, AS-013 using the call 8Q7AK from 11th October to 25th October 2009. Using SSB and CW on the 80 to 10 metre bands including WARC, he will be operational every day from approximately 07:00 to 08:30, 09:00 to 10:30, 13:00 to 1500 and 17:30 to 18:00 UTC.

Spot frequencies to be used are:

3.793, 7.063, 14.190, 18.133, 21.253 and 24.953 MHz SSB ? 10KHz to allow for qrm.

3.503, 7.003, 10.103, 14.003, 18.073, 21.003 and 24.893 MHz CW ? to allow for qrm.

For comprehensive details of qsl information etc, please check 8Q7AK on QRZ.COM

IMPORTANT NOTE: I am completely up to date with the return of qsl's for those received direct and/or eqsl's from previous activation's'. If you have not received yours, please send your qsl again.

IMPORTANT NOTE: If you have not received a return qsl for cards sent via the bureau this is because of the slow process rate. I will return cards via the bureau as soon as possible, as and when I receive them from the bureau.

All qsl's should be sent via the bureau or direct to G7COD.

Please note: 8Q7AK is approved for DXCC credits.

I have an Omni VI+, matching Ten Tec power supply, all filters(5), and Ten Tec desk microphone for sale. They were my dads W4PZV's. The radio is an 8 to 9 with just some minor scratches on top and a little worn paint off of the black heatsink in back of the radio. The radio is electonically sound. I am asking $1200 for all. Total price in 1997 was $3310 for all. I have the original boxes to ship in. Buyer pays shipping and insurance.

Further information and log search can be found at: sx8di.blogspot.com/ [SV2GWY]

29/08/2009: Look for EG6CIB to be active August 29-30th from the Cabo Llebeitx/Cap Llebeig lighthouse (FEA E-0282, ARLHS BAL-025), located on the island of Dragonera (DIE E-025, MIA MB-198, WLOTA L-0660), Balearic Islands (EU-004). Schedule: Saturday - Aprox 1400-1800z, SSB 7050-7150 Khz. 19:00-21:00, SSB 3670-3750 Khz; Sunday - Aprox 0500-0700z, SSB 3670-3750 Khz. 07:00-10:00, SSB 7050-7150 Khz. QSL via the Spanish bureau or direct to EA6JN (QRZ.com). [ARLHS]

29/08/2009: François/F5JNE and Claude/F5MCC will be active August 29th as F5JNE/p from the Castle du Puits (DFCF 45-053), located in the city of Faverelles (CP 45420), canton [county] of Briare (DDCF 4505), Department Loiret/45 and Province Centre (DPF 07). Starting around 0630 UTC, CW/SSB, 80 then 40m. QSL via the bureau preferred and SWL cards are welcome. Important notice to the Summer Challenge F5CED of the Union Francaise des Telegraphistes UFT, ending on August 31st entrants: on 80m by request on SSB, F5JNE can send his own UFT member report in CW on the same frequency. Those who need Claude F5MCC's UFT member report can get it also. After 0730 UTC, they will be both on the 40m UFT frequency (7013 KHz). [F5NQL]

29/08/2009: Frans, ON4LBN will be active the morning of August 29th as homecall/p from the Castle of Halloy (BCA reference NM-047), in Braibant (20 km to the south of the town of Namur). QRV 80 and 40 meters. QSL via home call, direct or bureau. [ON4LBN]

29/08/2009: Mike/RA1ALA, Alex/RX1AW and George/RW3AKN will be active as homecall/1 from Nemetskiy Kuzov Island (IOTA EU-147, RRA RR-02-09, RDA KL-11), Kuzov archipelago, from August 29th to September 4th. Look for them on, or near, the usual island and IOTA frequencies. QSL via home calls, direct or by the bureau. [RA1ALA]

29/08/2009: The Tri-County Amateur Radio Club, WC5C will reactivate Pelican Island (USi TX-050, Not IOTA, Tarrant County), located in Eagle Mountain Lake, Texas, on August 29th (1400z-2200z). Club members will travel to the island by boat, kayak and canoe. QSL via WC5C (QRZ.com). [USI]

31/08/2009: Rolf, DL6ZFG will leave for Sardinia (EU-024, IIA SD-001, MIA MIS-035, WLOTA L-1608) on August 31st and will spend his holidays there until September 18th. He will work holiday style using all modes mainly on 20m, 30m and 40m signing IS0/DL6ZFG. He may switch also to SSTV if requested so. He also hopes to be active from the WWF parks IFF-014 and IFF-259. His equipment includes an ICOM 706MK2G with 100 watts, verticals and mobile antennas. QSL via home call, direct or bureau. [F5NQL]

31/08/2009: Cezar, VE3LYC plans to operate as VY0O from the Ottawa Islands (NA-230, new one) for three full days between August 31st to September 3rd. Specific island's name and exact dates are not available at this time, but they will be announced a few days in advance of the operation. This will be Cezar's most difficult operation to date. The islands are 12-14 hours away from shore and transportation requires a large boat. Traditionally unstable weather pattern, unknown local

landing conditions, high seas, the presence of ice chunks in Hudson Bay, potential presence of polar bears, all these and other logistical aspects make this trip extremely challenging. At this time Cezar seeks group and individual donors who understand and appreciate the difficult and expensive task ahead and are willing to be part of this effort. "Past support from EU stations has been disproportionate with their QSO demand (45% of QSOs but only 25% support for VY0A)", he says, but hopefully this situation will improve. [425 DX News & VE3LYC]

01/09/2009: Dave, EI3IO hopes to be QRV shortly from A9, as he is in the process of moving to the Kingdom of Bahrain from Ireland. He is likely to be in Bahrain for at least 2 years. No callsign info is available as yet. You may find Dave on 20m from September onwards and he wants to be QRV on 160m for the 2009/2010 winter season, depending on the time it takes to obtain residency, etc. His QTH will be on the outskirts of the Manama, Bahrain Island (AS-002, WW Loc. LL56FE), which appears to be good for all bands 160m to VHF. Dave plans to be QRV on most MF, HF and low VHF bands. However as many of you know 6m is currently not available in A9. [EI3IO]

01/09/2009: George, K3GV, will be active between September 1st and September 28th as K3GV/VY2 from Prince Edward Island (IOTA NA-029, CIsA PE-001, WLOTA L0523). Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via home call, direct or by the bureau. [K3GV]

01/09/2009: Allan, VK2GR and his XYL Josette will be active as P29CW from Kiunga, in the Western Province of Papua New Guinea (OC-034, WLOTA L-0084, WW Loc. QI03PV) between September and December. Activity will be only during his spare time because he is there working with "Australian Doctors International" (ADI - www.adi.org.au/). They will be providing a patrol based medical service in the Middle and North Fly Districts of the Western Province of PNG. Due to the anticipated work load and the lack of power in the villages, P29CW is not expected to be active on the many field trips during this period of operation. The field trips will be on the Fly River by boat and on foot. Essentually they will be 2 weeks out in the field and one week back at Kiunga. Their license shows that they can operate from Daru, Daru Island (OC-153, WW Loc. QI10OW) and Kiunga, PNG. QSL direct to Tommy, VK2IR with 3 USDs or new IRCs. [QRZ.com]

03/09/2009: Anthony, F4EUG will be active as FG/F4EUG from Guadeloupe Island (NA-102, DIFO FG-001, WLOTA L-0644) from September 3-10th. Look for activity on all bands/modes. QSL via home call, direct or by the bureau. [rsgbiota.org]

04/09/2009: Kuny/W1FPU (7L1FPU) and his nine-year son Yoshiki/KH0UA (JF1UCV), Tomo/N2QP (JQ1OCR) and his wife Yuri/KE7TWK, Hajime/AH0BR and Moto/W1NDE will be active as AH0BT from Chalan Kanoa, island of Saipan (USi NI002S, WLOTA L-1333), Northern Mariana Islands (OC-086) from September 4-7th, including a Multi/Single entry in the All Asian DX

Phone Contest (September 5-6th). QSL via 7L1FPU, direct or by the bureau. [NG3K]

04/09/2009: Don/G3BJ and Hilary/G4JKS will be on vacation in the South Pacific during September 2009. They will be active as: FO/G3BJ - Austral Islands (Rurutu OC-050 and Tubuai OC-152) from September 4-16th; ZK2BJ - Niue (OC-040) from September 18-25th. Mostly QRV on CW - 3.5 to 28 MHz - no 17m or 12m, using a K3 and a Butternut HF6. QSL direct to G3BJ (QRZ.com). [DX World of Ham Radio]

04/09/2009: Operators Theo/PA1TK, Kees/PA5WT and Rob/PA3GVI will be active as LX/homecall between September 4-7th. Look for Kees and Rob to focus on the HF bands between 80-10 meters using CW and SSB. While Theo operates in the IARU VHF Contest on 144 MHz (2m). QSL via their home callsigns. [OPDX Bulletin]

04/09/2009: Look for Juergen, NF6J to be active as VO2/NF6J from Battle Island (NA-044, CIsA NF-049) between 1300z September 4th to 2300z September 11th. QRV 30, 20 and 15 meters, CW only. QSL via DL7RV, direct or bureau. [rsgbiota.org]
